OVER THE WIRES.

The Latest Details of the Disaster at Quebec.

200 PEOPLE BURIED ALIVE.

Georgia Legislators Will Probably Fight a Duel—A Murderer Hanged—Eastern News.

QUEBEC, Sept. 20.—Last night several thousand tons of rock slid from Cape Diamond, at the end of Dufferin terrace, to Champlain street, 300 feet below, demolishing in its course seven dwellings.

TWO HUNDRED UNDER THE DEBRIS.

It is known that at least 200 bodies still remain under the pile of debris.

The loss is very great. Some of the workmen who are deprived of homes lose all their furniture and other effects and all their summer's earnings. Many are left virtually penniless at the commencement of the Canadian winter. The injured have been nearly all removed to the Hotel Dieu by the men of the battery aided by a detachment of cavalry.

THOUSANDS VISIT THE SCENE.

The scene of the terrible disaster is being visited by thousands, who block up the narrow street and make it difficult for anyone to move. Being but one narrow street between the rock and the river there is a complete stoppage of traffic, except by climbing over the debris.

A large force is engaged in searching the ruins, and the shipping office in the Dominion government building is being turned into a temporary morgue. Over twenty bodies are lying in it. It is difficult to identify some, so much have they been disfigured and crushed. Several persons reported missing have turned up, but it is thought that there will be ten or more victims added to the list. A complete list of the injured cannot be made yet, as they were removed to the different hospitals and to friends' houses.

The city council is holding a special meeting to consider what is the best course to be pursued to complete the work of recovering the remaining bodies.

It is feared that a large part of the rock adjoining the slide will come down, as large crevices have appeared and rain is still falling.

People are moving out of the threatened houses.

Citizens are sending in money to relieve the immediate distress among the homeless women and children.

The site of the landslide of last night is almost identical with that of the one which occurred in 1841, when eight buildings were crushed and thirty-two persons killed.

GEORGIA LEGISLATORS.

Six of Them Propose to Settle Their Wrath by Dueling.

ATLANTA, Sept. 20.—The Georgia legislature was quite belligerent yesterday and last night, and three couples of representatives are negotiating through friends. These negotiations may end in explanations on the floor, or in visits to the surrounding states for the purpose of fighting. The first and second misunderstandings arose during a debate on the proposed industrial school for girls, and the third on the proposition for the legislature to visit the battlefield of Chickamauga. The three sets of candidates for admission to the dueling ground are Representatives Tignor and Atkinson, Felton and Brooks, and Fonte and Thurman.

The Pension Office.

WASHINGTON, Sept. 20.—Major William Warner will leave this afternoon for Deer Park in response to a communication from President Harrison. The president desires to fee Warner in connection with pension commissionership.

Irrigation Matters.

OMAHA, Sept. 20.—The United States senate committee on irrigation is here listening to the statements from citizens of this section on the matter in hand, and Senator Stewart, of Nevada, is at the head of the committee.

A Murderer Hanged.

MOORHEAD, Minn., Sept. 20.—Thomas Brown was hung here this morning for the murder of Policeman Scull on the night of October 17, 1888. The drop fell a few minutes after 4 A. M. Brown faced death calmly and died without a struggle.

LOST IN THE NORTH.

Two Daring Explorers Supposed to be Perishing.

WINNIPEG, Sept. 20.—Count De Saineville and Mr. Von Everest, noblemen, who left here five or six months ago with the object of going farther north than Lord Lonsdale, have been heard from, the letters having been written over two months ago, dated from Chippewayan. They had a rough experience on Lake Hobiska, and during a storm were driven on an extensive mud deposit. When the water receded the boats were left in the mud two miles from open water, and through this they had to carry all their supplies and their boats. When they started they intended pushing north to Point Barrow, the most northern point of Alaska. They expected to reach Point Barrow by the middle of August. They not yet reached there, and it is feared that harm has befallen them. It is likely the Hudson Bay Company will send out a search party from Fort Chippewayan.

STORAGE BATTERIES.

Cost of Running Street Cars in Brussels.

Electrical Review.

The storage battery electric cars have now been is regular passage service for a little over two years in Brussels, and a report has just been made of the cost of motive power during that time. The motive power included the renewal of batteries, the wear and tear on moters and machinery, the generating and storing of the energy and repairs and replacements generally—in fact, every element that can be underseed by an engineer to be motive power.

It has been found that the cost of motive power has been a trifle less than 3 cents per kilometer, or about 5 cents per car mile: in this, the cost of maintaining the batteries has ammounted to 1 3-5 cents per car miles.

It may be of interest to know that the estimate of the cost of motive power as based on the experience of the Electric Traction Company on the Fourth and Madison avenues, New York, and prepared prior to the report at Brussels and without any knowledge of the cos there, is within a fraction of being the same. The company finds the cost of motive power on Madison avenue to be 5.3 cents per mile. In the cost of motive power as estimated in New York, however, was included interest on investment, amounting to 1.8 cents, or 3.5 cents per mile net, including depreciation on battery, cost of generating current and handling of batteries.

INSURE.

Julius Gradwohl calls the attention of the citizens of Albany to insure before it is too late. He represents seven insurance companies who carry a capital of $76,000,000, with a cash deposit in the state of Oregon of $350,000.

Farmers who have spent the entire year in producing a crop of wheat should run no risks now, but promptly get insurance upon the crop and guard against fire, for if they lose their crop by fire, it is a calamity to the whole community as well as an irreparable injury to them.

Seattle, Ellensburg, Vancouver and Spokane Falls has nothing to do with our companies; the losses will all be paid and still we are ready for business, the same as after the Chicago fire.

Disarming an Unseen Foe.

"This was sometime a paradox," as Hamlet says. Since, however, the people of America and other lands have been enabled to pit Hostetter's Stomach Bitters against that unseen foe, malaria, it is no longer a paradox, but an easy possibility. Whatever malaria evolves its misty venom to poison the air, and decaying unwholesome vegetation impregnater the water, there, in the very stronghold of miasma, is the auxiliary potent to disarm the foe and assure efficient protection. Fever and ague, bilious remittent, dumb ague and ague cake, no matter how tenaciously they have fastened their clutch on the system, are first forced to relax their grasp and eventually to abandon it altogether. But it is preventive force that should chiefly recommend the Bitters to persons dwelling in malaria-cursed localities, for it is a certain buckler of defence against which the enemy is powerless. Cures, likewise, dyspepsia, rheumatism, kidney and billious ailments.

Take Notice.

All persons indebted to the late firm of Bardue & Robertson will please call at the store and settle their accounts without delay and greatly oblige, J. M. Bardue, successor to Bardue & Robertson

PocketCutlery.

PUBLIC LANDS.

Annual Report of the United States Land Office.

SETTLING THE PUBLIC DOMAIN

The Year's Record in the Way of Filings, Surveys, Ect.—Swamp Lands and Mineral Claims.

WASHINGTON, Sept. 19.—The annual report of Acting Commissioner of the General Land Office William M. Stone has been submitted to the secretary of the interior.

In opening his report Commissioner Stone refers to the accumulation of business in the office which has been left over from former administrations, and which was partly due to the increasing work of the local land offices. The system in force, he says, was not promotive of the speedy dispatch of businsss, especially in the case of the board of review, created by Commissioner Sparks, which he abolished, as a hindrance of good, safe and quick work in the office.

On Mr. Sparks's unfortunate and unwarranted suspicions that a widespread system of fraud prevailed, and Mr. Sparks's assertion as to the proportion of fraudulent filings to the total number of filings made and relinquished, which may be estimated in round numbers at 100 per cent., Mr. Stone says: "This wholesale arraignment of the claimants on the public domain should not have been made without the most conclusive evidence to sustain it."

The report goes to say that no general misconduct on the part of the Western settlers has been found.

During the year 70,141 agricultural patents were issued, covering 11,791,116 acres of land, an increase over the preceding year of more than 3 000,000 acres. Mineral patents to the number of 913, covering an acreage of 17,996, were issued. There were patented for the benefit of the railroads under the law, 425,046 acres, and under the swamp land grants to the states, 259,721 acres. States selections, under the educational grants, were approved to the extent of 132,350 acres, and lands to the Indians were patented under various acts to the amount of 159,390 acres.

The total cash receipts of the office from the sales of land and fees were $9,270,225, a decrease of more than $3,000,000, as compared with the previous year.

During the year surveys were accepted to the amount of 4,544,372 acres, principally in Dakota, Montana and New Mexico.

The report referred to the unsettled condition of the private land claims in New Mexico and Arizona, and the urgent need of congressional action to settle the titles in these territories.

Referring to the act of March 3, 1889, which authorizes the secretary of the interior to adjust each of the railroad grants, and if any had been erroneously certified or patented to commence proceedings to cancel them, the report states that of the pending selections 21,560,846 acres have been suspended, awaiting action by congress.

Attention is called to the fact that more than 80,000,000 acres of land have been claimed under the swamp land act in the various states, Florida alone, while having a total acreage of but 37,031,520 acres, having lists filed for 22,221,469 acres as swamp land. "There can be no doubt," says the report, "that large quantities of land, amounting to millions of acres, have been patented to the states erroneously as swamp lands, when in fact they were and are good agricultural lands."

The report recommends the repeal of all the laws relating to the public timber, and the enactment of a general law, plain, concise and unmistakable in meaning.

Fewer fraudulent entries have been made during the year than for many years past, owing to increased vigilance, but several cases are mentioned in the report where syndicates have sought to obtain coal lands by fraudulent means, and in one case, had they succeeded, the commission alone would have amounted to $550,000.

The opening of Oklahoma is referred to as the most important event for several years in the administration of the land office.

Let us give the readers of the HERALD a little timely advice. Hot weather is coming and with it colic, cholera morbus, dysentery and diarrhoea. The only safe way to combat these diseases, is to keep some reliable remedy at hand, and all who have tried Chamberlain's Colic, Cholera and Diarrhoea Remedy will admit that it is the most prompt, reliable and successful medicine known for these complaints. It costs but 25 or 50 cents, and may be the means of saving you or your family much suffering if not life itself, before the summer is over. For sale by Foshay & Mason

Wheat is worth 61 cents.
