The tendency of the times in the field of newspaper work, happily for the readers of the papers, is to adhere strictly to the truth in every instance.

NOTICE OF DISSOLUTION OF PARTNERSHIP.....

Mr. GEORGE is writing a new book. The American public have special cause to pray for deliverance. He says he is paying special attention to definitions, because

political economy is largely a matter of definitions. The special object of writers of the Henry George class of writers is to make definitions impossible, for sophistries and visionary theories without foundation in possible facts are the substance of what they write.

CONSIDERABLE of a fight is going on in various localities against endowment life insurance concerns. In our neighboring state of California the fight is waxing warm, and the Chronicle says that people who belong to associations like the Order of Workmen, etc., should not be induced to make common cause with the endowment concerns. Every one recognizes that the Workmen's order is a purely co-operative concern in which every member is equally interested.

The report comes that a gold bearing quartz vein has been found in Irvington, New Jersey, and that great things may be expected from it. These stories are periodically promulgated, but the statistical output of the gold mines east of the Rocky mountains is infinitesimal in proportion to the same character of mines west of the Rockies. Gold mines on the eastern slope are mythical in their nature, in fact do not pan out well.

ALTA says it is said that all the applicants for experiment with the Brown-Sequard elixir are men, and that not one woman has offered to try it. This shows their good sense. They are willing to quit when they get through, but man, fool man, insists upon trying to remain in this world after he has passed the age of use and ornament.

A SAN FRANCISCO syndicate are starting the scheme to raft lumber in logs upon the ocean, in the manner that the Joggins raft was taken from Nova Scotia to New York. The rafts will be cigar shaped and contain 12,000,000 feet of lumber, and will save \$2 per thousand feet in freight by rafting the logs.

A SHOEMAKER working in a Lynn, Mass., factory, has been offered \$100,000 for a one-tenth interest in a gold mine he located nine years ago in Colorado. He will probably forsake the last.
