The loss caused by a fire in the residence of Mr. Pike, owned by Isom & Lanning, which occurred on the 12th inst., has been paid in full by the Sun Ins. Co. of California, for which Mr. Julius Gradwohl is agent. The loss was adjusted in a satisfactory manner by the repairing of the building by the company, making it as good as before.

The school will remain in Pendleton until the prospective new government school building on the reservation is finished. And it is understood there is a possibility of its being allowed to remain there permanently.

A Clever Painting. Some beautiful paintings from the brush of Mrs. Nellie Monteith are on exhibition in the show window of Guiss & Son's drug store. One especially, a milk-maid and Jersey cow, and accompanying landscape, showing a pasture studded with daisies, is a clever bit of work and exhibits a remarkable talent. Pocket Gallery. The largest and finest display every brought to this valley just received at Stewart & Sox's. Call and examine.

THE SANTIAM MINES.

A Ton of Ore to Be Sent to San Francisco For a Working Test. The Albany Mining and Milling Company has now a force of men at work in two of their mines up the Santiam. They have struck the ledge at a distance of about forty feet from the mouth of the tunnel, and have taken out some very rich ore. They are now arranging to ship a ton of ore to San Francisco for a practical working test.

Hiram W. Giddings, who is superintendent of the Dry Gulch Company, of Salem, has also accepted the position of superintendent of the Golden City Mining Co., of this city, on both of which a force of men are now at work. A large quantity of powder and supplies enough to last a winter have been shipped up to Gatesville, and will from there be packed into the mines. The quality of the ore recently taken from the mines up the Santiam leaves no room for doubt as to the fact that they can be worked on a paying basis, and the companies now organized to develop them are nearing the completion of their task. The members of the Albany Mining and Milling Company are sanguine that the result of the test from the ton of ore soon to be shipped to San Francisco will establish the value of their mines and will result in extensive machinery being put in to work them.

Recent assays show that from an average lot of ore taken from one of their ledges enough lead and silver was taken out to pay for working, leaving from \$32 to \$50 per ton of gold as a profit. REAL ESTATE TRANSFERS. The following transfers were recorded yesterday: M. Gerhart to Conrad Meyer, power of attorney, \$100. James Pipe to Chas. Essig, lot 6, in block 3, Pipe's addition to Albany, 150. J. H. Mullan to Sarah C. Van Horn SW. Qr. block 59, Albany, 1650. The Grismer-Davies Company's engagement for this city on November 1st has been postponed, as the company has made a change in their route which will bring them here a week or two later. The Eckert & Duncan Opera Company will play "His Majesty" and "Pauline" on November 4th and 5th. This is said to be a charming company. Mr. Eckert was formerly manager of the Juvenile Opera Company. The Chicago Comedy Company, which played a two week's engagement in this city last winter, will return and begin a week's engagement on Nov. 13th.

The River Boats. The Salem Statesman says: The Mobelet for Portland yesterday morning after an up river trip unprecedented in boating on the Willamette river. Forty-eight hours were consumed in the round trip between this point and Albany. Perhaps no man could have gone over the route at zero stage of water but Capt. Jim Smith, whose twenty-five years' experience in logging, steamboating and towing on this river was brought into play plying the boat through devious channels presenting the only passageway. Capt. Smith is filling the berth of the regular chief of the boat, Capt. Bell, who is lying on a malarial bed at Portland. His illness, however, is not regarded as serious. Twenty tons of hops and 110 sacks of apples were picked up at Buena Vista. To this load were added at Salem, 16 tons of generally assorted freight, including 5000 apple, peach and plum trees consigned by H. Leach to Seattle parties. The Mobelet will reach Salem from Portland Saturday, returning as soon as her cargo can be discharged, and a down load shipped. The feat performed by reaching Albany with the river at the zero stage is something never before accomplished by any vessel on the upper river.

Boring Artesian Wells. The recent extreme dry weather in Eastern Oregon is turning more attention to the question of supplying water from artesian wells. The Times-Mountaineer, of The Dalles, says: "We have advocated boring for artesian water in this neighborhood, and we are glad to see a movement on foot with this object in view. Sufficient money has been subscribed to begin the work and continue it for some length of time, and we feel certain that more will be forthcoming when needed. If a supply can be secured by this means it will be both economical and healthful, and the force will be sufficient for all purposes.

Congressman Hermann. Congressman Binger Hermann was a passenger on last night's train, going to Roseburg. He was seen at the depot by a Herald reporter. He said that the recent marriage of his daughter to Dr. Miller, of Roseburg, was not an elopement, and that her husband was not objectionable to him. He merely desired that his daughter should finish her education before the marriage occurred. Congressman Hermann will leave in a few weeks for Washington. On the conveying of congresses it is expected that the federal appointments in Oregon will be made, for which there are plenty of applicants.

GOVERNOR PENNOYER'S HOBBY.

What Senator Dolph Thinks of the Governor's Portage-Railway Scheme. Governor Pennoyer's plan to construct a portage railroad at The Dalles, instead of a boat railway or canal and locks, has been received in Washington and is being somewhat discussed there. Being asked his opinion on the subject Senator Dolph said it looked as if the matter was to be made a political hobby and ridden to death. The Oregon delegation in congress were united in their efforts to secure the removal of obstructions at this point by some speedy and proper method Senator Dolph said, and in getting an appropriation for the examination of the river at this point by the board of engineers. The board, consisting of some of the most eminent engineers of the army, which was appointed a year ago, examined the obstructions, surveyed the river, and under directions of the secretary of war had since visited England and France to examine similar works; that Colonel Mendel was now in San Francisco engaged in comparing the report, which he was assured would be ready before the meeting of congress, and that he believed it would be in favor of the best railway; that the governor had first advocated a boat railway, but in a recent speech before the waterway convention at Portland had advocated the canal and locks, and was now advocating the ordinary standard gauge, portage railway, which would require the handling of freight twice, and would be operated when there were appropriations for that purpose, and stopped when there were none.

Senator Dolph said further that he did not believe there was anything in the governor's statement that boats which could navigate the Upper Columbia could not navigate the lower river, but that such statement, coming from such source, would undoubtedly be used against the delegation in their efforts to secure an appropriation for the work, and that the secretary of war would base his recommendations upon the report of the engineers, and not upon the opinions of persons having neither skill nor experience upon such matters. Congress, he said, had never undertaken the construction of railroads, and that he did not believe it was possible to secure an appropriation for such purposes.

The City Jail. The old shanty, which disgraces the name of city jail at present has one occupant, James Davis, who was arrested at the Oregon Pacific depot for vagrancy. It had a couple of other occupants, a few days ago, but they kicked off one corner of the roof and crawled out. This has been done so often and so easily by the city's prisoners that such an occurrence has lost all value as a newspaper item under the heading of "A Jail Break." The sorriest tramp in the country cannot be kept in the city jail unless he chooses to remain for a night's lodging among the vermin of the old hut. Still some people will maintain that the city does not need a new city prison.

The Woolen Mills. Two more car loads of machinery arrived yesterday for the woolen mills. About four car loads are yet due. The machinery is now being put together, and on or before the first of January the mills will be in operation. The building is a substantial brick structure containing three stories and a basement, and is about finished. A portion of the machinery from the Brownville mills has been brought over and will be put in the mills here. A sufficient quantity of wool has been purchased to keep the mills running from January 1st until after the next clip is ready for delivery. The mills will be a credit to Albany.

Colonel—I'll give you ten, and if you take Joy's Vegetable Sarsaparilla that will be long enough. Fred H. Blocker, of the Baldwin Hotel, San Francisco, writes: I have spent many a dollar for medicines, but the only thing that ever stopped my liver trouble and dyspepsia was Joy's Vegetable Sarsaparilla. Gustav Solomon, of 223 Valencia street, San Francisco, writes that it has entirely freed him of indigestion and sick headaches.
