SECRET SOCIETIES.

A. O. U. W.—Safety Lodge No, 13; meets every Monday evening at the G. A. R hall on Ferry street, between Second and Third, Albany, Oregon. Strangers in the city and transient brethren cordially invited to attend.

EDITORIAL NOTES.

An ex-army captain wants the government to approve his plans for establishing a connected line of relief stations and hotels across the ocean.

A poor old gentleman named Norcross has recently been taken to a hospital for insane people in Massachusetts, who claims to be the inventor of Erricson's Monitor, plans of which he says were stolen from him.

American push and genius go all over the world. Pekin, China, is to be illuminated by electric lights under a contract just made with the Westinghouse Company at Pittsburgh. In this country the electric light has fo.lowed the railway, but in China it will precede it and the illumination will tend to disperse the superstition which thus far has prevented railway construction.

The revolution in Brazil gives the coffee speculators the chance they have wanted, and of course they seize upon it and advance the price. These vampires allow no opportunity of fattening upon the necessities of the people to escape. them. Coffee has long since ceased to be a luxury and has become an actual necessity, and speculating upon it should be made impossible.

The strike among the men in Vienna, who were engaged in the mother-of-pearl trade, which trade was almost exclusively confined to that city, it is said will give the dealers the power to advance prices tc American purchasers. That is about the usual result of strikes. The consumers bear the real expense and the "trust" companies reap the reward, while the laborers in the long run gain no benefit.

It is said that the Spanish American delegates now assembled in Washington in attendance upon the Pan-American Congress, express the utmost astonisl ment to see President Harrison walking the streets unattended and unguarded. When those Spanish American republics learn that warring factions, that make it necessary to guard the lives of their rulers, are the enemies of good government, and must cease, then they will begin to enjoy the benefits of a free republic.

It is satisfaction to learn that two young San Francisco fast men who induced two farmers daughters to quit their homes and go to the city, and then tried—without succeeding—to get them to enter houses of ill fame, will have to answer for their crime before the courts. It is to be hoped that they will be indicted, tried and severely punished, to the end that future licentious would be dispoilers of virtuous young ladies may have a wholesome example to deter them from their foul work.

Possibly the visit of the leading Mormons of the Salt Lake City Mormen Church, to the Winnipeg colony of that persuasion, may mean more than a friendly parochial call. The party of visitors include President Woodruff of the Mormon church and Mrs. Woodruff, George Q. Cannon, late Territorial Representative for Utah in the American Cangress and Mrs. Cannon; Brigham Young Jr. and a Mr. Smith, nephew of the Mermon prophet, Joseph Smith. If the visit should portend any considerable hegira of Mormons to the British provinces on our north, the general conclusion would be let them go in peace.

The extent of the use of the telephone in this country is hardly appreciated. It is said that the longest distance over which conversation by telephone is daily made in this country is between Portland Me., and Buffalo, N. Y., about 750 mies. There are more than 170,000 miles of telephone wire in operation in the United States, over which 1,055,000 messages are sent daily. About 300,000 telephones are in use in this country. It is further stated the longest telephone circuit on the continent of Europe has been recently opened The line is from Vienna in Austria to Leipsig, and every word could be perfectly understood and the voice recognized without difficulty. The distance between the two cities by rail is something less than three hundred miles, but the telephone wires, instead of being carried along the routes of the railways, where the noise of passing trains was found to interfere materially with the working of the long distance instrument, are strung along the highways, where the results are found to be much better, and the actual distance on these routes is nearly three hundred and fifty miles. A strange fact has been noticed in connection with this route. While the speaker at Vienna is heard with clearness and accuracy at Leipsig, and all points along the route as at Prague and Dresden, a speaker at either of these points is heard with much mere difficulty at Vienna. The electricians of the company are as yet unable to furnish a satisfactory explanation of this phenomenon.

NEW TO-DAY.
