OPENING NIGHT.

The Brownsville Woolen Mills In Albany.

NOW SUCCESSFULLY RUNNING.

Large Crowd to Successfully View the Machinery—Already at Work—Late-coming and Novel Sight.

By invitation the citizens of Albany gathered at the bank of the new woolen mills building on the corner of the Willamette, just above the field of the Woolen Mills, last evening to view the splendid new building and the machinery of the mills in operation.

Nearly everybody was there and the crowds of delighted spectators gathered around the perfectly running looms, carding and spinning machines in operation, with satisfaction and great interest. The electric lights, with which the mill is thoroughly supplied, gave each part of the intricate working machinery and saw with what precision and perfection the work was accomplished.

Albany may well be proud of this fine structure and useful industry that has been built up here and adds so much to our material prosperity.

Under the management of its officers, Hon. J. M. Moyer, president, and ex-Courtesy Clerk J. P. Gilbreath, secretary, the mill, while at Brownsville proved a great success, and here under the same management, with added facilities and with the latest improved and best machinery that could possibly be procured, it will be doubly successful. The superintendent, Mr. James P. Haswell, is a young man thoroughly conversant with every detail of woolen manufacturing. Business was everywhere present about the machinery, watching the work and directing the operations. The company is extremely fortunate in securing the services of so careful, efficient and popular an official.

The building is of brick on a stone foundation, three stories high, most thoroughly and substantially built, it is planned with the greatest care and pains, taking with reference to the work to be done, and fully meets the requirements of the case. The motive power is furnished by the water fed by the anti-steam engine, with a powerful engine always in reserve in case of emergency, and to furnish the steam for the mill, the entire building and keeps the temperature at the proper degree all the time.

Certainly those who visited the building last evening, and who were crowded from 8 to 10 o'clock, could not be pleased with the interesting sight presented. The improvement in machinery is simply wonderful, and here it could be seen in its greatest perfection.

Our citizens can feel perfectly satisfied that the \$2,500,000 expended to secure this splendid factory was money well and profitably invested.

Home industry makes home products and the manufacturer is free for the world's markets, and for home use, and gives employment to industrious and thrifty citizens, and advances the material welfare of the country.

Extra Values. To show the valuation of property in the city of Portland, we give the following from the Oregonian: "Mr. Graham Glass, who recently sold his fine lot fronting on First street south of the old high property, to Mr. C. B. Maxwell for \$25,000, yesterday bought from Joseph Hume the fifty-foot frontage on the west side of the street on which are the two brick stores occupied by M. A. Gust & Co. and Carl's bar, for \$20,000. In October, 1887, Mr. Hume, a well-known business man, now residing in Berkeley, Cal., bought this property for \$67,500, which yielded him nine per cent, yearly since he became the owner of it. This will give an idea of the gradual but steady appreciation in the value of the property here. Mr. Maxwell and Mr. Glass both consider that they have made a profitable investment and it is not likely that either of them would sell today for an advance of \$5,000."

Business Change. Messrs. Hawkins, Luffell and E. E. Allen, proprietors of the Albany furniture store, have bought of W. S. Denham his wife's work on Water street, including the ground, for \$3,000. Mr. Denham has also purchased the furniture business of this firm and will conduct the business.

Drug Store Sold. Messrs. Guis & Son have sold their drug store in this city to Dr. I. W. Starr and Charles H. Cusick. Dr. Starr is a well known physician and a competent druggist. Mr. Cusick is a young man of energy, and they will make a profitable firm. Mr. Guis and his son will remain in Albany and engage in some business here. They are successful business men, and turn over a thriving business to their successors.

New Years. The first day of 1890 passed off very quietly in this city. It was ushered in the last stroke of 12 for the old year, raised by the ringing of the church bells. The banks and some business houses observed the day by remaining closed. The young ladies of the Y. W. C. T. U. received callers at their hall during the day, and held a very pleasant social and lunch in the evening.

If you want a choice cup of tea try my 40 cent tea in bulk. C. E. Brownell.

THE OREGON PACIFIC.

What Has the Pacific Done for the Past Year?

The year 1889 was a most successful one for the Oregon Pacific. It was the first year since the opening of the line to the coast that the amount of freight carried exceeded the amount of passenger traffic. It is a fact that the Oregon Pacific has carried more freight than any other line on the coast, and it is a fact that it has carried more passengers than any other line on the coast.

The Oregon Pacific has also done much for the people of the coast. It has opened up new markets for the products of the coast, and it has made it possible for the people of the coast to travel more cheaply and more comfortably than ever before.
