Croup Can Be Prevented. We want every mother to know that croup con be prevented. There is no question about this; as it has been done in thousands of cases, and you may depend upon it that when a child takes the croup it is wholly owing to the negligence of its parents. True croup never appears without due and timely warning; a few hours or a day or two before the attack, the child becomes hourse. This hourseness is the first indication of croup, and is a sure sign that croup is to follow, unless promptly and properly treated. The free use of Chamberlain's Cough Remedy as rirected with each bottle,

under the heading "To prevent croup," will dispel all symptoms of the dis ease. This first sign of croup, hoarseness, may be overlooked by young mothers or those not familiar with the disease. Under such circum-stances, or when not properly treated, the hoarseness becomes more marked, and the child shows shows symptoms of having taken cold, then a peculiar, rrugh cough is developed. Even at this stage Chamberlain's Cough Remedy will prevent the croup, but after the cough has developed the croup is liable to appear at any moment. The proper way is to keep a bottle of this remedy at hand, it costs but 50 cents, and only a few doses, or at most nso over a third of a bottle, is required to dispei all symptoms of the disease Can you afford to risk so much for go little? There is not the least danger in giving this remedy in large and frequent doses, which are always required, as it contains no injurious substance. As proof of this fact we refer to John L. Olson, of Des Moines, whose 18-months old boy drank the entie contents of a 50 cent bottle of Chamberlain's cough remedy without the least injury. Certainly it made the baby vomit very freely; but after taking a nap he would have been glad to have drank another bottle of the remedy, as he liked it. A similar instance occurred near Valley Springs, Dakote. Mrs. Mattie Johnson's twoyear-old daughter, Annie, drank a full This remedy has been the sole re-liance of thousands of mothers for ercup, and especially as a proper for

"This was sometime a paradox," as Iamlet says. Since, however, the people of America and other lands have been enabled to pit Hostetter's Stomach Bitters against that unseen foc, malaria, it is no longer a paradox, but an easy possibility. Whatever malaria evolves its misty venom to poison the air, and decaying unwhole-some vegetation impregnater the water, there, in the very stronghold of miasma, is the auxiliary potent to disarm the foe and assure efficient protection. Fever and ague, bilious remittent, dumb ague and ague cake, no matter how tenaciously they have fastener their clutch on the system, are first forced to relax their grasp and eventually to abandon it alto-gether. But it is preventive force that should chiefly recommend the Bitters to persons awelling in malariaursed localities, for it is a certain buckler of defence against which the enemy is powerless. Cures, likewise, dyspepsia, rheumatism, kidney and illious ailments.
