WASHINGTON, April 9.—The senate today passed the house bill appropriating \$75,000 to supply the deficiency occasioned by Silecott's defection.

The senate resumed the consideration of the Montana election case, and Duff concluded his argument in favor of the democratic claimants. Turp presented an argument on the same side of the question. The Montana cases were laid aside, and the Chinese census enumeration bill was taken up.

Evarts said he regarded the amendments reported by the census commissioner, as an improvement on the house bill, and was willing that they should be adopted, but as to the merits of the bill itself it was his design and his duty to debate it at some length.

Mitchell explained the purpose of some of the amendments that he had offered. He did not like the bill very much as it came from the senate committee it was, he said, absolutely worthless and insufficient. He desired to have the pending bill amended to require Chinese to show that they were residents on the 1st of October, 1888, the date of the Scott expedition act, instead of as the senate amendment proposes on the 1st of June, 1890.

Heard said his idea and notion of legislation on the subject was to pass a law that would exclude the Chinese from coming to the country after a certain date, but he would treat the Chinese already here fairly.

Mitchell agreed with Heard. Without action the senate adjourned.

To pass this bill, he asserted, would be the entering wedge which would separate the colored people from the republican party.

Wilkinson of Louisiana said he would not emulate Great Britain in building ships, but China had a better fighting armament than the United States. IS IT FICTION? Immense Wealth Supposed to be Buried on Hez Caple's Farm. Tradition says that in the year 1841 a Spanish bark was riding at anchor opposite the present site of Columbia City and near the farm now owned by Hez Caples. There was a large amount of treasure aboard the vessel, and the crew conspired to obtain possession of it. They murdered the captain, the mate and the cook, and buried the gold and silver in the vicinity of Caple's farm, so at least is the report.

The inconsistent shade of this tradition, however, is the burial of the treasure when the assassins had un-wardly control of the bark. But as the story is told, some of the Spaniards subsequently returned, endeavoring to recover the money, yet without success.

Others who became acquainted with the fact that a great fortune had been buried on or near Caple's farm, made unsuccessful attempts to find it, but always with serious results to one or more of the searching parties.

At a spiritualistic meeting in this city some five or six years ago a spiritist claimed to have had a revelation as to the identical spot where the Spaniards had covered up their ill-gotten wealth, which never gave them a moment's happiness or enjoyment.

Several of the spiritualists, reposing confidence in the revelation visited Caple's farm, and, after searching several days, they discovered a large deposit of small rocks at a depth of a foot in the soil, and supposed the money to be buried beneath it. While they were at work removing the rocks one of the men dropped dead. This created such consternation among the rest that the party abandoned their labor.

No further efforts to secure the hidden treasure were put forth till last week, when another party went on this evident wild goose chase. Among them was one William Matthews, who succeeded in locating the treasure deposit. While delving underneath it, in the expectancy of unearthing a huge fortune, he struck a mass of human bones. During the few moments consumed in examining them, Matthews was transformed into a raving maniac. After that his associates also abandoned the work.

Matthews was brought to this city on the steamer Alarm last Friday and is now under the care of his friends, who will cause his removal to the insane asylum should he not soon recover his reason.
