CONGRESS ON SILVER

THE action of the present congress upon the silver question is watched with great solicitude by the people, especially those who have the welfare of the working and producing classes at heart.

According to the latest report of the Director of the Mint, the total silver product of the United States in 1888 was 43,000,000 ounces; that of the two American continents 97,000,000 ounces and that of the whole world 110,000,000 ounces.

The inevitable perpetual motion comes to the front with the springtime. Nashville, Tennessee claims the honor this time, but as usual the inexplicable mysteries of the intricate mechanism are unexplainable, so only the bald headed fact of its discovery is related to us.

Postmaster General WANA-MAKER estimates that to adopt the strict eight hour system, as a days work in the postoffices of the country, would entail an additional expense upon the government of over two million dollars.

Not a California Bear. Anybody can catch a good kind of bear. The trouble is to get the man who caught the bear.

C. W. AYERS, ARCHITECT AND SUPERINTENDENT. Office over First National Bank Building, Albany, Or. Work solicited from all parts of the country.

THAT HACKING COUGH can be so quickly cured by Shiloh's Cure. Warranted to sell by Foshay & Mason.

This tendency of the increased purchases of silver to increase its price will be aided by the provision in the proposed act that they are to be paid for by a corresponding issue of paper money.

THE MARKETS.

ALBANY April 30.—The markets are very quiet, there being no movement in either wheat or oats.

ALBANY QUOTATIONS. Wheat—61¢. Oats—50¢. Flour—\$4.25 per 50 lb. Potatoes—\$1.25. Beans—16¢. Corn—12¢. Lard—12¢. Hams—12¢. Butter—12¢. Eggs—12¢. Bacon—12¢. Hay—12¢. Timothy, \$16, oats and wheat, \$12.

The advocates of free trade, sometimes as the saying is "let the cat out of the bag." For instance the London Iron and Steel Journal, commenting on the tin plate business says:

"The most important item in the proposed new schedule is that affecting tin plates. The duty is now 1 cent per pound, and the suggested tariff is 2 cents and 2.10 cents per pound. If this is carried the occupation of three-fourths of those engaged in the tin plate trade will be gone, and our manufacturers and their workmen if they continue in the business must employ their capital and experience on the other side of the Atlantic.

The great obstacle to tin plate-making on a large scale in the States is the entire absence of cheap female labor, so necessary in the industry, and so abundant in Wales, but if the enormous duty of 12s. a box is adopted, possibly the labor difficulty may be got over. Until the bill is actually passed, we shall continue to believe that the people of America will refuse to impose upon the consumers of tin plates this enormous tax. Tin plates cannot possibly be made in the States so cheaply as they can be in this country; the existing duty is ample proof of this; and to abolish the duty entirely would be more appropriate than to increase it."

The admission that cheap female labor can be obtained in Wales and not in this country speaks volumes in favor of protection.
