YAQUINA HARBOR

The Government Work—Report of the Improvement as in Progress.

From Captain T. W. Symon's annual report to the department of the government, the following extracts are made:

The usual prevailing depths over the bar, at low water, before improvement, were from seven to eight feet. Three distinct channels existed, known as the north, middle and south channels. The middle channel, though free from rocks, was usually the shoalest of the three, and was little used.

The north channel, besides being long and narrow, was so studded with rocks as to be considered un-navigable. Owing to the shifting nature of the bar, these channels were constantly changing both in position and depth. The mean rise of the tide was 7.1 feet.

PLAN OF IMPROVEMENT. The project adopted in 1881 was to run out a dike or jetty on the south side of the entrance, so as to confine the water to a narrow channel and the flow to be deflected northward, with a view to opening and maintaining the middle channel with a least depth of seven feet at high water.

As originally projected, the dike was to start from near low water line and run out into the sea a distance of 2500 feet, and was to be two feet above mean low water. The beach on the line of the jetty, from high water level, was to be protected by sinking gabions in the beach with sand placed over them, and by covering the surface with a layer of mattresses and stones.

The stone for the jetty was to be deposited in place from barges, and crabs were to be used, if practicable. It was found, however, that crabs could not be used on account of the strong currents and high seas, and that the ocean swell even in quiet weather was too great to permit the use of stone barges. Accordingly the jetty had to be built from the shore end, by carrying the stone out over a narrow way, and was begun at high tide line instead of at low tide line, thus making the total projected length of the jetty in 1881, 3700 feet.

In 1884 the jetty was extended shoreward a distance of 315 feet to close a gap in the south channel by the sea, making the total projected length of the jetty about 4000 feet.

The present project, adopted in 1888, is to raise the south jetty to full length without extending it seaward, thus making its total length 3748 feet, and to construct a mid-tide jetty on the north side of the entrance, about 2300 feet in length, extending from the north end along and behind the reef, putting out from the head to a point opposite the end of the jetty, and distant from it about 1000 feet.

The result on the harbor entrance was to keep the channel more in one place and to increase the depth of the bar. The south channel, however, has been shut off and the tendency of the waters to go north restricted.

The result of all this work has been to cause the channel to run in a direct line out to sea, and to maintain an ordinary depth of eleven to twelve feet at low water.

RECOMMENDATIONS AND REMARKS. The recommended amount of \$75,000 for the completion of the present project made by my predecessor, was believed by people interested in the improvement of the bay to be too small; and in consequence a re-estimate was asked for and under instructions from the engineer department, was made by me, and it, with my report, was printed in Sen. Ex. Doc. No. 47, Fifty-first Congress.

A careful study of the action of the sea on the jetties, during the past winter, convinces me that the cross section of the jetties estimated for their first exposure, and that the results desired can be equally obtained and maintained by jetties of smaller cross section. The sand has formed in behind the south jetty, so that it is practically a revelation wall, rather than a jetty. If the same thing occurs at the north jetty, as recent events seem to indicate, the total cost to "surely complete and give the requisite strength and stability to the work, according to the present project, will be very materially reduced from the amount previously estimated at \$75,000, to (Sen. Ex. Doc. No. 47, Fifty-first Congress, first session,) if the amount, in Senate bill, of \$185,000 is secured for the work this year, I estimate that with the present budget of \$125,000 the project will probably be completed the next year, his will probably be enough to fully complete the project depending on the difficulties met with in building the north jetty and the readiness with which the sand formation continues.

FUTURE OPERATIONS. It is expected with the money available from the next appropriation, if any such there be, to complete, as far as possible, the north jetty, before undertaking any work on the south jetty.

EVANGELICAL RUPTURE AGAIN.

The readers of your paper have no doubt wondered at the discussion relative to the trouble as above noted.

This I. B. Fisher, who has of late appeared in the city papers so often under his signature as pastor of the church, defender of the suspended bishops, Bowman and Escher, poses as a great defender of the church at large, and also very especially a defender on Judge Smith's decision in the Naperville injunction case, published in your paper July 10, which is a true copy of that decision in substance and when he says that it is not the knows that he is misrepresenting the facts. Why does he wish to deceive the readers of your paper? Simply this. Allowing that decision to appear before the public, directly or indirectly, has an important bearing on the members of this church.

He knows that he was not appointed to this place as pastor by the Oregon annual conference, he makes his pretended claims under a title signed of five and a quarter years ago, and signed by Ed. J. Bowersox, elected as presiding officer. He (Ed. J.) talks so much about loyalty and about majority. Oh, consistency! He knows that he has not been a member of the conference met at the 24th inst. I suppose he was alluding to Ed. J. Bowersox, who is this Bowersox? I cannot tell the public anything about Ed. J. Bowersox. He has been with us for twenty years. His light is still bright and shining and whose honesty and integrity is beyond question. He is not a stranger here. He is a stranger here.
