**GRAPPLED THE BURGLAR.**  
A Poor Place to Sleep—Silver Certificates Five Millions in Certificates—Not Day in New Jersey

**NEW YORK, Sept. 6.**—Interesting figures are printed regarding the cotton crop. It is estimated that it will reach 8,000,000 million bales this year, which is the largest known in the history of the country. An agent here purchasing for a European house says the crop is nearly one-third larger than last year and the quality will be good. Reports are that the Indian cotton crop will also be very large.

**FIVE MILLION DOLLARS.**  
That is said to be the Amount Added to the Circulation.

**NEW YORK, Sept. 6.**—A financial expert here claims that the monthly statements of the treasury department show that all silver purchases so far have put only \$1,300,000 of new treasury notes into circulation. He says this is the result of elaborate calculations, and says one reason is the notes issued are of too large a denomination to use. He also says the net addition to the circulation by all disbursements in August is only \$5,000,000.

**HE FOUGHT FOR HIS MONEY.**  
But the Burglars Finally Got Away With It.

**OAKLAND, Sept. 6.**—About 10 o'clock last night W. Snyder, a store-keeper at Niles, this county, was counting his money and putting it in a sack to take to a safe in the house near by, when a masked burglar put a pistol in his face. Snyder knocked the pistol down, when his companion came in and presented another pistol. A scuffle ensued and Snyder was beaten on the head and face. They took a sack of coin containing \$300 and went out, locking the front door. When Snyder recovered he went out the back door and entered his house with blood streaming from his face and head. One shot had been fired, grazing Snyder's face; two other shots missed the mark. The burglars made their escape.

Fish, smoked, dried, salted, pickled, fresh, frozen, packed in ice or otherwise prepared for preservation, not especially enumerated or provided for in this act at 15 cents per pound.

A Colored Bishop Gives His Brethren a Severe Lecture.

**Chicago, Sept. 6.**—At today's session of the African Methodist Episcopal Zion church conference, now meeting here, there was a heated discussion over the fact that many ministers are short in their payments to the general fund. Bishop Lomax closed the debate with a vigorous speech, in which he said that if the older ministers could not do their duty by the church, younger men would be selected. He admonished them to cease digging out classical sermons to their congregations and to talk common sense, and advised them in case they could not make a better showing, to leave the pulpit, hire a mule and go to plowing.

**SHE CAN RUN THE MACHINE.**  
A Charming Young Lady Who Has Been an Engineer Three Years.

**Chicago Herald.**  
To see a woman running an engine in real life is a genuine novelty. The fair-sex occasionally runs engines in novels, on the stage and so on, but a real, live female engineer is a new sensation. Of course this one is in Chicago, and of course she is young and very pretty. They always are. But the romance of this one case is cut out by the cold-blooded announcement that she is not doing it to save a husband, lover or father's life or liberty. She is purely mercenary. The stipend drawn at the end of each week is all that she is after. Her name is not known. Perhaps this is the romantic part of it, perhaps otherwise. Be this or that, if it may, she is a flesh and blood reality. When a reporter for the Herald called at the place where this novelty works he stated his business to a young lady clerk and asked to see the woman who runs the engine.

"A lady is our engineer," tittered the clerk, "but she is busy, and can't see any reporters."

"Can she be seen?" was asked.

"No," was the reply. "She will see no one unless it is an examiner of engineers, and then she will be found ready and anxious to answer all questions."

The lady engineer has had charge of the Bee Hive Laundry engine for about three years, during which time she had no trouble and has apparently been well able to attend to all the duties devolving upon her. Her principal claim for competency, however, is that she has taken her engine apart and put it together again. Questions to be propounded to her by the reporter were furnished by an engineer but she declined to answer any questions at all unless they came from the Board of Engineers.

E. C. Dickey, of the Board, said, in regard to this woman: "If a woman can successfully pass the required examination, there is no law to prevent her continuing the practice of engineering. This case will be rightly looked into, and unless this lady engineer can tell all about an engine, she will have to give up her place to a competent engineer."

**Novelties in wash dress fabrics.**

A Repetition of Last Winter's Coal Famine in San Francisco.

**THE FOREIGN TRADES UNION.**  
The President's Vacation—Writing Letters to the Queen—Farmers League—News from the Old World.

**CASCO CITY, Col., Sept. 6.**—A terrible accident occurred on the Denver & Rio Grande at 4:50 A. M. to-day near Adobe. Train No. 61 was running in two sections. The first section had 100 tons of coal loaded with laborers and had a boiler derailed some four miles before Florence. The second section derailed into it with terrific force, completely smashing the coaches and injuring from thirty-five to forty men and killing a number outright. The bodies of five have already been recovered and twelve more are still missing. The wounded are now being cared for at the depots at Florence, Coal Creek and Canon City. Physicians are in attendance.

**THE PRESIDENT'S VACATION.**  
He Will Transact but Little Business While Away.

**CRESSON SPRINGS, Sept. 6.**—This is rather an uneventful day for the president. He arose somewhat refreshed from his trip yesterday. Secretary Halford said the president would not act upon any official matters before Monday, and only thereafter on such as is absolutely necessary. He added there was no truth in the report from Washington that the president had selected Michener, of Indiana, first assistant postmaster general, vice Clarkson.

**THE COAL MARKET.**  
There Will Probably be a Shortage in San Francisco this Winter.

**SAN FRANCISCO, Sept. 6.**—J. W. Harrison, the coal broker, in his weekly circular, issued to-day, says: "Arrivals during the week have been from the northern mines, 820,432 tons; from foreign sources, 820,200 tons. There is no very marked change in the high prices of last week, but at already advanced prices only a limited amount can be purchased by any single buyer. That the market is in a precarious condition cannot be questioned. If the coast colliers do not materially increase their shipments, there will, unquestionably, be a marked shortage for our demands this winter."

**CANADA Favors Reciprocity.**  
OTTAWA, Sept. 6.—All the cabinet ministers were asked to express an opinion on Senator Sherman's resolution. They were reticent, but seemed inclined to regard it with some favor and were of the opinion if the proposal passed the senate it would be taken up by the parliament of Canada.
