Drawing to take place Nov. 30th, 1890. The corner jewelry store. "You Ain't In It!" Unless you order a nice 25-cent spring chicken for your Sunday dinner at Mueller & Garrett's, the leading grocers.

THE FIRST GOLD BRICK.

Taken From the Albany Company's Mines in the Santiam District.

For a good many years there has been more or less prospecting and preliminary work done in the Santiam mines, but it has been served for the Albany Mining and Milling company of this city to produce such tangible results as to promise to develop a permanent and successful operation of the mines. Yesterday there was displayed in the window of the Linn County Bank the first gold brick taken from the mines, which attracted attention during the day. The brick weighed nearly 220 lbs. The product of 3 1/2 tons of ore was on from their new mill, the smaller piece of the ore, another having also been a flow "stud" same lot of ore taken from the same mine. A large and continuous ledge of the same quality of ore is in sight and the successful working of these seams now assured, on a scale that will afford a rich return to the investors of the company and will prove an important industry for Albany. The company expect to begin soon to run their present mill night and day, and are already arranging to put in a 20 stamp mill and two very large and newly improved pumps, three well-drilled and well-equipped fire companies, two excellent steam fire engines of the latest pattern, a hook and ladder company, and a most efficient fire department, all in addition to building within the limits, a very recent extension of the line limits. Our facilities for extinguishing fire being superior to those of Portland and Salem, but not such as are rated under rate book No. 2, while Albany is rated under book No. 3; that there is in contemplation by the city authorities a provision by municipal regulation for the putting of horses on our steam fire engines, that during the last eight years our efficient fire department, has shown itself able to cope with any and all fires that have occurred, and that the losses during that time to insurance companies doing that business here have been only nominal. In view of these facts we petition the board to make an order rating the city of Albany under rate book No. 2 instead of rate book No. 3.

INSURANCE RATES.

A general stirring up among our business men has been in progress for a day or two over the rates of insurance charged by the insurance companies.

Considering that the risks of fire limits and our brick buildings constantly increasing in numbers, and the excellent facilities for extinguishing the fires that may start, the present rates are really extortionate, and certainly unfair to our city. Taking these facts into consideration the city officers and insurance agents, yesterday signed the following petition: To the Pacific Insurance Union: We, the undersigned insurance agents for the several companies, do hereby represent to the State of Oregon, its city officers, property owners and citizens of Albany Oregon, would beg leave to represent that the city of Albany is as well protected from loss by fire as any town in the state, having an abundant water supply furnished by the Santiam water canal and ditches, and cisterns, well and favorably distributed throughout the city, one of the best water works in the state, fed and supplied by two very large and newly improved pumps, three well-drilled and well-equipped fire companies, two excellent steam fire engines of the latest pattern, a hook and ladder company, and a most efficient fire department, all in addition to building within the limits, a very recent extension of the line limits. Our facilities for extinguishing fire being superior to those of Portland and Salem, but not such as are rated under rate book No. 2, while Albany is rated under book No. 3; that there is in contemplation by the city authorities a provision by municipal regulation for the putting of horses on our steam fire engines, that during the last eight years our efficient fire department, has shown itself able to cope with any and all fires that have occurred, and that the losses during that time to insurance companies doing that business here have been only nominal. In view of these facts we petition the board to make an order rating the city of Albany under rate book No. 2 instead of rate book No. 3.

THE SPOKANE EXPOSITION.

A Correspondent Gives a Vivid Description of the Place and Fair.

To the Editor of the Herald: While your readers have had interesting reports from the Mechanics' Fair in Portland, we have noticed nothing from the Industrial Exposition at Spokane. Thinking it deserved some notice, we will speak briefly of some of the interesting features. In selecting a place for such an exposition one could have been better chosen than Spokane Falls, for that city in itself presents almost a modern wonder in its rapid growth and the energy with which it has battled with difficulties and overcome them. Its progress and development, amidst these hindrances is certainly remarkable. The curious visitor now sees few traces of the recent fire unless indeed he inquire into the cause of so many new looking buildings and the numerous edifices of building materials which the streets are blockaded. The entire business portion of the city is characterized by a fire-haunted newness, which attracts and charms the interested spectator. But the surprise at such progress is only equalled by the admiration called forth by the size of the buildings and the beauty of design and architecture. Many of the principal buildings are six and seven stories high, and the modern style is noticeable in the private residences. The Glover residence built of granite and brick at a cost of \$80,000, and the cutter residence costing \$70,000, draw exclamations of pleasure from all observers. The fine dwellings are mostly built of combinations of granite and stone with great variety of shape and finish. But let us turn toward the exposition building. It is easily found, for by day the flags of different nations are seen floating from its roof, while at night its glass front makes it a blaze of light. Before entering we think of the great difficulties overcome in its erection. A few weeks before time for the exposition to open, the workmen who were pushing the work toward completion, joined in a strike, refusing to work until their demands for shorter hours and higher wages were granted. Not being willing to meet these demands, the business men of Spokane left their stores and took up the interrupted work, some working two and three weeks until men could be brought from Idaho and adjoining districts to complete the building. For this reason the opening of the exposition was delayed a week later than intended, and many places thinking it would be an entire failure did not send exhibits as they would otherwise have done. Still the exhibits are good. The display of fruits, grains and vegetables is profuse. The famous Palouse county sends one of the largest exhibits in this line, the central figure being immense shells of grain, and the surrounding mammoth vegetables and fruits. Near by is a Medical lake in miniature, with a tank of the medical water. In addition to agricultural products, Yakima shows a greasy irrigation pump in full operation, and some fine specimens of Anthracite coal, and have aroused a great interest in the mining districts adjoining Spokane. To view of the value of the mines represented in this department, a number of the best mineralogists for the development of mineral resources of the country. In addition to her printing department and model cottage, Seattle sends a section from a tree 9 1/2 feet in diameter, and the prize float in lumber made by the long-forever's union. There is also a section from a tree of her large trees, and a fine collection of birds and animals. But mention of the many places and interests represented here, so we pass the many firms with artistically arranged wares, Pass the Spokane business college with its students showing their proficiency in telegraphy, shorthand and typewriting, pass the W. C. T. U. with apartments tastefully draped with the banners of the different unions, its tank of ice water inviting all thirsty ones to drink, and pause before the paper mache model of Port Townsend, which has attracted so much attention, manufactured by E. T. Callen at a cost of \$3,500. It represents an area of 14 1/2 miles by 12 1/2 miles on the scale of one inch for every 250 feet. It is a model of the city, with streets, sidewalks and business houses, and its connection by rail and water with the surrounding country. Six bodies of water and fourteen towns are shown in the model and the various industries and agricultural districts lying adjacent to Port Townsend. This is the first paper mache model built west of the Rockies. It is intended to send it to Portland next year and in '93 to place it on exhibition at the World's Fair. It is so pleased with this method of advertising that she proposes to send a model of the entire state to the Columbian exposition. The walls of the art department are covered with productions of various degrees of merit. We were attracted by one painting entitled "The Palace of the Caesars," and were surprised and pleased to learn that the artist was J. F. Brown, formerly of Salem, Oregon, where for years he was engaged in the mercantile business. He has four paintings on exhibition and receives many deserved compliments on his success as an artist. His little son, aged four years and six months, has also a picture on exhibition for painting. His landscape scene on exhibition is a remarkable production for one so young. The department of Indian relics is certainly unique. A tepee surrounded with different articles of clothing, wampum, bows and

Ballot Reform For Oregon.

The Dalles Times-Mountaineer: The Australian ballot system will receive a fair test in the approaching election in Washington, as it has been of the new state. Both parties in Oregon, at the last general election, adopted in this manner of voting, and it is expected that the next legislature will pass a law putting this system in force. It is in any manner the most honest and the most reliable of voting methods. Both parties in Oregon, at the last general election, adopted in this manner of voting, and it is expected that the next legislature will pass a law putting this system in force. It is in any manner the most honest and the most reliable of voting methods. Both parties in Oregon, at the last general election, adopted in this manner of voting, and it is expected that the next legislature will pass a law putting this system in force. It is in any manner the most honest and the most reliable of voting methods.

They Want Their Money.

The census enumerators in this vicinity—both those of the first count and also those of the second—have under consideration the prospect of forming a mutual and savings institution of census enumerators says the Salem Statesman. Their idea in doing this is not because they desire a place in which to place their money, for as yet not one of the enumerators has received his pay for the hard work done by him in taking an invoice of Uncle Sam's people and counting their noses as it were.

Oregon Apples Going to England.

A Portland firm shipped eastward on Tuesday last a car load of Oregon apples that were purchased by a New York dealer for export to England. Each apple was carefully examined and wrapped in paper before packing. They are getting two more cars ready for the same destination. Who can tell where the Oregon Fruit industry will end?

Church Notice.

The following services will be held at the Presbyterian church to-morrow: Preaching at 11 A. M. by the pastor. Subject: "The gospel in secular life." Sabbath school at 12:15 P. M. Y. M. C. A. meeting at in the lecture room at 6:45 P. M. Subject: Believers, What? Why? Results of faith. Preaching at 7:30. Music, sacred and otherwise. Seats free, all will be made welcome.

Use Bages-Dandelion Bitters for digestion, dyspepsia and all kindred diseases.

Use Bages-Dandelion Bitters for digestion, dyspepsia and all kindred diseases.

REMARKABLE FACTS.

Heart disease is usually supposed to be incurable, but when properly treated a large proportion of cases can be cured. Thus Mrs. Elmina Hatch, of Elkhart, Ind., and Mrs. Mary L. Baker, of Ovid, Mich., were cured after suffering 20 years. S. C. Lumber, druggist at San Jose, Ill., says that Dr. Miles' New Heart Cure, which entered the former, "worked wonders for his wife." Levi Logan, of Buchana, Mich., who had heart disease for 20 years, says two bottles made him "feel like a new man." Dr. Miles' New Heart Cure is sold and guaranteed by Starnard & Unsick, book or wonderful testimonials free.

Land Sharks.

Land sharks styling themselves Stone & Co., agents of the New York Land Company, have been operating at the Dalles for some weeks. Thursday the United States marshal nailed them before the court, which bound them over one in \$250 and the other in \$1500 bail in default of which the marshal locked them in his room, instead of in jail. Today they were not to be found. Their plan was to locate a person on timber land, the applicant paying \$100 and the company giving a worthless note for \$1000 for the land on perfection of title. These same sharks were in Albany about a year ago.

This Morning.

You can get the best celery, cauliflower, cabbage, turnips, beets, apples, pears, bunches, butter and eggs, and all kinds of fresh bread, pies, cakes, cookies, etc., at Blackburn & Pironi's.
