

Morning Daily Herald

ON SALE. The DAILY HERALD will be on sale each morning at H. J. Jones' book store, where it can be procured at 5 cents per copy.

JOTTINGS ABOUT TOWN.

Choice bleached celery at Mueller & Garrett's. Parker Bros. have just received a fine lot of Southern Oregon grapes. Be sure and see the fine display of choice delicacies for Sunday at Mueller & Garrett's to-day.

Baker City will have a \$50,000 reduction plant. The town is now lighted by electricity.

The pumpkin pie sociable at the G. A. R. hall to-night will be a pleasant place to pass the evening.

A slight fall of snow was reported yesterday at Green Basin, on the front of the Oregon Pacific.

Stamping done at the Ladies Bazaar. A large line of new and beautiful designs just received from the East.

There will be services at the Universalist church on next Sunday at 11 o'clock and in the evening by Dana Thomas.

The bottom below Buena Vista is wonderful for potatoes. Henderson Murphy alone has dug 8,000 bushels.

D. C. Ireland, that veteran newspaper man, has again assumed charge of the Astoria Pioneer.

The new school house at Lebanon will be completed about Christmas. D. C. Schell, of this city is contractor.

Joseph Talt is agent for the Union Mutual Accident Association of Chicago, a company that has many superior features.

In reply to the query "To what do you attribute the result of the election?" Senator M. S. Quay answered "To lack of votes."

S. W. Reese, of Green Basin, Marion county, is in the city. He reports the Green Basin Lumbering Company's flume as being nearly down to the railroad.

A large number were present and a very pleasant time had at the social at the residence of G. E. Casabianca. A delightful social was also given at the residence of Mrs. Payne.

On Sunday Nov. 9th, 2 o'clock p. m., the German Lutherians will hold service at the First Presbyterian church. Preaching by the Lutheran minister Rev. Gust E. Meyer from Mt. Angel.

The dresses worn on the stage by the Baby and "Little Crystal" are imported direct from Paris, and are causing quite a furore amongst the mothers in Denver, where the "Hearts of Oak" is now playing at the Broadway theatre.

J. J. Bumgardner, of Echo, says the range is very poor and stock will be in poor condition for the winter in consequence. The range came too late to start the grass before the frost nights came, preventing it from growing.

Mr. Jesse Wilkins, the popular landlord of the Occidental hotel of Corvallis, has sold out of that place, and yesterday passed through this city on his way to Astoria, where he has purchased the well known McCallan house, of which he will take immediate charge.

A gentleman showed us a specimen of coal this week from a mine lying thirty miles east of Lebanon on the Santiam, which bears a closer resemblance to anthracite than anything we have yet seen. The quality of the coal and the extent of the vein warrant an early development.

Gottfried Brose, who killed Shields Loomis in Crook county, Sept. 25, 1889, was tried at Prineville last week, found guilty of manslaughter and sentenced by Judge Shittuck to eight years in the penitentiary, and to pay a fine of \$500.

The Eugene Register says: "Rev. I. D. Driver was arrested Monday charged with cruelly beating a boy named Jones, who had been in his apple orchard. He was tried in Justice Kinsey's court before a jury last evening and was acquitted."

William Bare was indicted by the last grand jury of Morrow county for two crimes, incest and larceny. He was arrested Monday and is in custody.

Charles Mueller and mother are expected home from the East soon. Mr. E. E. Goff left yesterday for Roseburg, where she will visit her brother a few days.

Mrs. Eva Bringham, of Pendleton, is visiting in this city, the guest of Mrs. Frank Purdon.

Geo. W. Davis, of Shedd, was in the city yesterday. Hon. C. J. Shedd was in the city yesterday.

Merrill Fish started for Salem yesterday on a bicycle, expecting to return to-day.

Charles Mueller and mother are expected home from the East soon. Mr. E. E. Goff left yesterday for Roseburg, where she will visit her brother a few days.

Mrs. Eva Bringham, of Pendleton, is visiting in this city, the guest of Mrs. Frank Purdon.

Geo. W. Davis, of Shedd, was in the city yesterday. Hon. C. J. Shedd was in the city yesterday.

Merrill Fish started for Salem yesterday on a bicycle, expecting to return to-day.

Charles Mueller and mother are expected home from the East soon. Mr. E. E. Goff left yesterday for Roseburg, where she will visit her brother a few days.

Mrs. Eva Bringham, of Pendleton, is visiting in this city, the guest of Mrs. Frank Purdon.

SANTIAM MINING DISTRICT.

Its Development of the Mine is Progressing Rapidly.

The attention of the public is now very largely directed to the Santiam Mining district, and to the developments that are being made there.

The Albany company have, in placing their mill and in making their first successful run, attracted attention, and are really making the district again a valuable acquisition.

Mr. J. W. Gardner, one of the miners of this now fast becoming famous district, was registered at the Ross house yesterday, and in answer to the inquiry of a HERALD reporter, as to a recent trip to Driggs mountain and the location of claims there, gave the following:

A party of three, composed of H. W. White, J. W. Gardner, and Geo. P. Harris, started upon the trip of September 10th, going in by the way of Gates. The first property visited and examined was that of the Golden City company of Albany. Their property comprises several claims on Canal Fork mountain, The Golden City and King Solomon claims have been the fullest developed. The first named has a tunnel run about 100 feet, running across a formation to cut a ledge, the showing on which in the form of surface work in a shaft and other excavation brings out an immense volume of ore of a fair working grade.

KING SOLOMON. At this point the development is in the form of an open cut and tunnel and a shaft, making a fair showing of ore; also a large string ledge of thirty or forty feet.

From this point about a half-mile distant, we reached the WHITE PRINCE. One of the Albany company's ledges. The development here consists of a shaft and some open cuts, showing a large body of ore of average quality. On down the hill, on an extension from it, we next find the CANNON LODGE.

The development here consists of a tunnel forty feet running with the ledge all in quartz. The next claim is the RED BULL.

The development at this point consists of a tunnel, 268 feet running with the ledge, all in quartz of a good quality, \$25 and \$10 specimens having been picked up. Also a cross cut of 168 feet, showing that the main ledge is 22 feet wide from wall to wall. Another development consists of a shaft sunk 35 feet running on the foot wall all in quartz of \$400 and \$500 ore. Onward to the southeast we went to reach the WHITE HILL.

The development on this claim consists of a level of different depths, varying from 50 to 300 feet, of the latter class. Some ore has been stopped in this mine, and was worked in the old mill before it burned down, giving good results. The next is the BLACK BEAR.

The development consists of three tunnels on this ground, varying in length from 50 to 200 feet. All the development is with the course of the leads all in quartz and gangue of good quality. The next claim is the CORA ANN.

The development of this claim consists of a tunnel 40 feet all in quartz, some of an extra fine quality, showing fine first-class specimens of free gold. The next claim is the GOLDEN FLEECE.

The development here is small there being only a 15-foot shaft, all in ore of excellent quality. The next is the ALBANY MILLING and Mining company's claim, on the banks of the Santiam river.

The development at this point consists of two tunnels about 75 feet each, of a different character of ore, consisting of galena, silver and gold ore, of excellent quality, and a fine concentrating proposition.

Passing from this point about four miles up the Santiam river, we find the Pacific group claims, which have attracted so much attention already. No work or development has been done on this property, as the outcroppings were so large and strong that it was not necessary. The rock being of a uniform character, showing \$20 in free gold per ton. The owners of this property are arranging for a mill to be erected in the spring.

Passing from this point southwesterly about three miles, beneath the shadows of Lookout Mountain, we find all of the great daily newspaper represented in the names of this group of mining claims. First.

THE EXAMINER. This is a mammoth ledge, as shown by the development, consisting of tunnels and shafts, plenty of lead ore in sight, of a gold, silver, lead and zinc character of a concentration, amazing proposition. On up the hill on the same lead is the ALTA CALIFORNIA.

The development on this property shows it to be of a free gold character. Alongside of this claim is THE OREGONIAN.

The development on this claim shows an immense body of ore. Assays from this property made at Salt Lake show this ore to carry 40 per cent lead, 20 ounces silver, \$10 in gold and 15 per cent zinc. Next to and northwesterly from this claim and adjoining the Examiner, we find the RECORD UNION.

The development on this claim shows ore of the same character. Passing westward across McQuade

CREAK WE FIND THE COMSTOCK.

This is a twenty foot ledge from wall to wall, good showing of ore of the same quality. Adjoining this claim northwesterly we find the OPHIR.

Good showing of ore here for the amount of work done, supposed to be an extension of the last named claim. A fine northwesterly recent strike shows that this ledge did not stop at the Ophir. Crossing Galena mountain to the westerly we came to the Galena mines. The QUEEN LEDGE.

of which is the principal, which shows by surface workings to be an immense ledge, solid blocks of galena ore a foot square, having been taken out on the surface. The development consists of a tunnel starting far down the mountain side intending to cut this ledge 750 feet below the surface. 600 feet of said tunnel having been completed, 150 or 175 feet more is expected to tell the story. Other adjoining properties here make good showing.

We now cross back to the Quartzville district. Here we find the famous Bonanza and her sister properties that make up the valuable claims being worked by the Albany Mining and Milling company.

THE BONANZA. The development on this property consists of two shafts and open stopes, the ore from which was worked in the form of a mill, slaving a fraction of over 9 ounces of refined gold from 5 1/2 tons of ore. Also a tunnel 75 feet in which it will connect with the shafts and stopes. Going down the tramway 1100 feet we come to the building of the Albany company, the principal of which is the mill consisting of two small boilers, one of which runs the steam power stamps, also one engine that runs the crusher and the new Firau corrugated belt concentrator.

Passing on up the gulch we find the LINCOLN. Another of the Albany company's claims. The development here consists of two tunnels of 40 or 50 feet each, showing this to be as near a perfect concentrating ore as it is possible to find.

The Morning Star and other properties are also in this locality but we will not stop to describe them now, but passing to the Canal Fork mountain to the Canal Fork mines. Here at one time there was a mill operated, and a great deal of work done, \$400 having been taken out of a small piece of ground here before the mill burned down. These people have now started in earnest as they have a large working tunnel in 550 feet, drove running across formation and another 150 feet will probably tell what this rock is good for. A number of fine prospects are around this locality.

Another of the Albany company's claims. The development here consists of two tunnels of 40 or 50 feet each, showing this to be as near a perfect concentrating ore as it is possible to find.

The Morning Star and other properties are also in this locality but we will not stop to describe them now, but passing to the Canal Fork mountain to the Canal Fork mines. Here at one time there was a mill operated, and a great deal of work done, \$400 having been taken out of a small piece of ground here before the mill burned down. A GUNNING TRIFF.

The Portland Telegram relates the story of a very clever and unique thief in that city.

Mr. W. C. Warriner's residence at No. 145 Seventh street, was visited by a polite thief Tuesday afternoon at 4 o'clock, who operated very neatly. He called to look at a room which was for rent. It was a nice room and he liked it very much. The young man was tall and graceful, and pleased with everything. Had not his partner been there? No? Oh, he was so badly disappointed. "Must wait, you know, till my partner sees the room. He will soon be here, and with your kind permission, I'll await him," he said to Mrs. Warriner. Of course he could wait. He did so, and took a seat, while the lady busied herself with her household duties. Ten minutes passed. Mr. Roomhunter said he guessed he had lost the number. He would call again and take the room next time. About an hour later Mrs. Warriner came home and found that while he had not taken the room, the thief had taken \$10 in Sunday school money which was stored in a box setting on a writing desk. Within a foot of it was a box containing \$100 in currency which the thief had overlooked.

"Hearts of Oak." At the opera house on next Tuesday, Nov. 11, evening, ought to draw a large audience. Both play and company are among the very finest which will be seen here during the present season. The piece had a run of one hundred nights at the Fifth Avenue Theatre, New York, and will be given with the complete cast, costumes and effects of its original production. The company is a superb one in every way and is headed by Jas. A. Herne, an actor of excellent reputation. One of the strongest features of the play and which has caused its great success is the delightful child interest running through it. The part of Little Crystal will be assumed by Hazel Regan, who, without doubt, the cleverest child on the stage to-day. Her ability is said to be really marvellous, and she fits through her role with an ease, grace and naturalness which many an older actress might imitate with profit. This child was one of the first to play "Little Lord Fontleroy," and is considered the best exponent of the part. Her name is said to be something fabulous for one of her tender years.

October Weather. The signal service department for the Pacific division issues a weather review for October in which the statement is made that the most striking feature for the weather for October has been the marked deficiency in rainfall through out the Pacific coast states. The cause for this decrease in precipitation is due to a falling off in the number of storms which have entered the North Pacific coast from the Japan current, and, also, more especially to the fact that these storms have passed eastward at a higher latitude than in previous Octobers. The amount and direction of rain depends upon the latitude of the storm from the Japan current is one of the most important features of Pacific coast weather and is worthy of the careful attention of the public.

Strange Accident. A strange accident occurred on the steamer Columbia near Reeders landing a few days ago, says the Times-Mountain. John Bernard, a sturgeon fisherman, was hauling in a huge fish, when it suddenly took a turn and before he could get clear of the line he was dragged overboard and very near drowned. Some assistance could reach him. Bernard is a brother to the man who was run down and drowned from a fishing boat by the steamer "G. Reed" about two years ago. He was in the boat the time his brother was drowned. By a strange coincidence the accident a few days ago occurred at exactly the same place where the fatality occurred two years ago.

Skeleton Found. While Mr. Pettis and Mr. Landers, of Cheney, were hunting one day this week in the vicinity of Weaver's ranch, three miles southeast from this city, they discovered the skeleton of a human being deposited under the roots of a tree. The ghastly find has been there many months as there was no flesh on the bones. Various articles were found scattered around, among them a pack saddle and riding saddle, sack of flour, pair of broadcloth pants and an ax, scissors and other articles.

Big Fruit Shipment. W. R. Garrett returned yesterday from the eastern part of the county. While out he had chased 10,000 pounds of dried fruit. He states that he has shipped to Portland this fall 140,000 pounds of dried fruit, which is quite an item as it furnishes Linn county fruit growers with a home market for their products.

Police Court. A calm like that at eventide, after precipitation has prevailed, police and justice court in this city. For the past week the only cases reported are that of Jas. Milard for vagrancy who was given three days in the city jail. E. S. Levitt, was up yesterday for being drunk and disorderly and fined \$5 by Recorder Henton.

Sudden Death. A 10 year old daughter of Mrs. King died suddenly Wednesday morning of meningitis. She had been sick only about 24 hours, and was not considered dangerous until a few hours before death.

FROM CROOK COUNTY.

Old Winter will soon throw his mantle over our valleys and hills. Be prepared for his rigorous coming. Don't trust to Providence for showers of manna in the shape of feed and shelter.

Mrs. R. C. Jesse, whose limbs were horribly broken some weeks ago is getting along remarkably well under the circumstances, but it will be some yet before she will be able to go about.

Sheepmen who moved their flocks out of the mountains early last month missed a few weeks of mountain pasturing they might have had, so warm and beautiful has been the weather; but it is nevertheless dangerous to be safe.

All Prineville needs at the present time is more grit, more push, more vim, more energy, more churches, more schools, more morality, more harmony, more cordiality, and more advertising; the whole to be mixed and sweetened with a railroad.

The Oldest Native Oregonian. Linn, Or., Nov. 5, 1890. Salem Journal: Much has been said lately through the different papers of the state, as to who is the oldest native Oregonian living, but the one who we believe has the right to claim that honor, has for some reason, not made herself known to the public until now. She is Mrs. S. O. Henness, living near Gates on the Linn county side of the river. She will be better known to many as Miss Sallie Olinger, who taught school and successfully in the public schools of Linn, Lane and Marion counties. Her parents crossed the plains in 1843, swelling the number of those hardy pioneers who first made the perilous journey across the continent with ox teams, heaving their way as they came. And it was while the weary half emigrants were making their laborious way through the Blue mountains, that amid the height and depth of that vast wilderness Mrs. Henness first drew the breath of life. The lady physician who attended her mother at her birth and who christened the youthful mountaineer, giving her her own name "Sarah," is still living, or was less than a year ago, in the person of Mrs. Owens, of Southern Oregon, mother of the well known lady physician, Dr. Owens Adair of Astoria. These are facts well known to a few old Oregonians still living, and if anyone can beat this let that one come forward, and Mrs. H. will step gracefully down and out, yielding the honor to the "oldest Oregonian" to the more deserving. A FRIEND.

A Young Lady Kills a Cougar. Saturday at twilight, while a housewarming was in progress at Thomas C. McAdam's farmhouse on the Nookack, a tremendous splash was heard in the brook hard by. All rushed to the stream where a cougar was found eating a fine salmon he had just caught. The men, without alarming the great cat, went for their guns, and when about to fire heard the crack of a rifle, and the cougar leapt into the air and fell in the brook dead. A bullet passed through the left ear into the neck and severed the spinal cord. Miss Maud Durning had done the deed from the second-story window, at a distance of 175 yards. All joined hands and sang the hymn which the lion and the lamb in the center. It is only a few days ago that Miss Durning killed a huge bear, that is now being stuffed.—Whatcom Reville.

A FATAL MISTAKE. Physicians make no more fatal mistake than when they inform patients that the nervous heart troubles them from the stomach, a little consequence. Dr. Franklin Miles, the noted Indiana specialist has proven the contrary in his new book on "Heart Disease," which may be had free at Stanard & Cusick who guarantee and recommends Dr. Miles' unequalled New Heart Cure, which has the largest sale of any heart remedy in the world. It cures nervous and organic heart diseases, short breath, fluttering, pain or tenderness the side, arm or shoulder, irregular pulse, fainting, dizziness, nervousness, etc. His Restorative Nervine cures headache, fits, etc.

Teachers Examination. Notice is hereby given that the regular public examination of teachers for Linn county will take place in Albany, commencing at 10 o'clock on Wednesday, Nov. 20, 1890. All teachers desiring examination will please be present at the beginning. Teachers desiring state certificates should present their recommendations from district boards at the above time. G. F. RUSSELL, County School Supt.

Excellent Condition. County School Superintendent Russell has been visiting part of the schools of the county. He was especially well pleased with the condition of the schools in Halsey and Shedd. Prof. Michener in the former place and Prof. Truelove, in the latter, are both efficient, live, go-ahead teachers, and he trusts their respective schools up to a high standard of excellence.

Directors Meeting. At the meeting of the directors of the Y. M. C. A. at their hall, Prof. H. Young was unanimously chosen as general secretary of the association. It was voted to secure rooms for the winter on the second floor of the Bank of Oregon building. A gymnasium will be fitted up in the back rooms. Next week is the week of prayer, appointed for the entire country, and meetings will be held every evening. All men invited.

A WONDERFUL ARRAY.

New Goods in Quantities To Suit the Most Fastidious.
