For Female Irregularities... Faber's Golden Female Pills... absolutely pure...

### KNIGHTS OF LABOR.

In Council at Denver—Question Discussed, THE AMERICAN HOG ON TOP

New York Bank—The Efficiency of the Signal Corps—Boards in Sacramento—A Victim of Gas.

Denver, Nov. 11.—The general assembly of Knights of Labor convened this morning with about 200 delegates present. General Master Workman Powderly, read his annual address, after which the assembly adjourned until tomorrow. Powderly in his annual address, touching on economic policy of government, said in part: "I have not, as an order, adopted the tariff or anti-tariff clause in our preamble, and I do not advise amble such a thing now. We should, however, throw open the doors of our assemblies for the discussion of this great problem, so members may become educated in the basic principles of protection and free trade. I recommend that on and after the first of January next it shall be permissible for local assemblies to discuss the question, which will bring the greatest good to the greatest number, high tariff or free trade. Thus we do not commit an order to either school, and yet allow our members to take up for discussion and agitation that vital question."

Mr. Powderly dwelt at length upon the New York Central strike. He said in part: "The public press, from Buffalo to New York, was with few honorable exceptions under influence of the Vanderbilt system with chosen servants of public traveling on passes, with editors of papers along the road subsidized in the same manner, it became impossible for workers to get the public ear or place their grievances before officials of the company without subjecting themselves to dismissal. Referring to the visit of committees of men to railway officials, Powderly said the idea of meeting on a level of equality with employees for the purpose of discussing terms of agreement was repugnant to men whose aristocratic tendencies were given birth beneath the shadow of the house of Vanderbilt's and means to put a stop to these importunities were sought for. The plot of picking off spokesmen, in order to terrify others, was resorted to and one after another was discharged in hope that the lesson would be of practical value to the company in terrorizing rank and file. Referring to the correspondence with Master Workman Lee, Powderly said: "Many malicious persons and papers presumed to interrupt my language as being in favor of conspiracy to start a strike, either during the presidential year or when the world's fair is in progress. What I said was that if the organization could be kept until the world's fair, the New York Central would not be able to refuse any just concession. Those who saw conspiracy in that sentence would, if they were just, say that no just concession should be refused in any year. I am opposed to strikes, but if the men are to gain anything they must be organized, and they must be prepared to strike even though we never do it. If 1893 should be the best year to gain what is just, refusal should be given, that would be the best year to strike and not at a time when no preparations have been made."

### WORK OF THE SIGNAL CORPS.

Gen. Greely Says That It is Growing More Efficient. WASHINGTON, Nov. 11.—The annual report of chief signal officer Gen. Greely, says there has been a decided improvement in the condition and efficiency of the army as regards signal practice. The most important event in connection with the work of the signal corps has been the unprecedented successful establishment and maintenance of an elaborate system of heliograph signaling in the department of Arizona, longer distances being attained than ever before. Referring to the weather branch of the service, Gen. Greely says the duties devolving personally on the forecast officer permit less than one-quarter of a minute on an average in which to decide, formulate and express a forecast for a state or district, regarding any meteorological element, such as weather, temperature and wind. Rarely can a minute be given to predictions for any particular state or district. Notwithstanding all these difficulties there were only fourteen occasions last year on which the severe cold waves were not predicted, 98 per cent of all important cold waves being predicted.

Speaking of tornadoes, General Greely says it appears from the data on hand that in no state may a destructive tornado be expected to occur oftener than two years and that areas over which total destruction can be expected is exceedingly small, even in the states most liable to these violent storms.

Gentlemen, get one of those fine dress shirts at E.

### FINANCIAL STRAITS.

The Duchess of Marlborough Has Quite Brought Against Her.

BIRMINGHAM, Nov. 11.—English society is much interested at the information cabled from America to the effect that the American duchess has had several judgments rendered against her in New York on behalf of creditors in Birmingham. That Duchess of Marlborough should borrow money from this Pittsburg of England is a queer, but investigation shows ample reason for it. It is no secret that the duchess has in every possible way to raise money, and it is well known here that the American trustees of the duchess should have done their best to frustrate her benevolent intentions. Although the money lenders in London are willing to take her reversionary interests as security, special stress has been laid on the security of a particular lot of land owned by the duchess, which appears to be complications of title. The money borrowed in Birmingham was obtained by arrangement with the duchess's solicitor in London, who happens to have a partner a lawyer in Birmingham, Robert Harding Millward. This loan was doubtless secured on the strength of the \$2,000,000.

### REVENGEFUL EMPLOYEES.

Being Discharged They Resort to Desperate Measures. WILMINGTON, Del., Nov. 11.—It is now believed that the terrible explosion of the extensive Dupont Powder Works near this city on October 7, which resulted in the death of ten workmen, an old lady and a child, and the injury of a number of others, may have been the work of a gang of frebugees, who are especially organized to do harm to the Dupont family. The burning of a large barn belonging to William Dupont on Saturday night was a light case and four horses was no doubt the work of incendiaries. The frebugees are supposed to be revengeful employees who were discharged at the death of General Henry Dupont, as several attempts were made this spring and summer to burn up the Dupont Powder Works. Thus far three of the Dupont's barns have been burned, and it is expected that a reward of \$8000 will be offered and that detectives will be put on the case.

### The Wherry in Stocks.

New York, Nov. 11.—Everything was excitement on change this morning. Several failures were reported. Decker, Howell & Co., Villard's brokers, were among those to assign to day. Assignee Crouwell said this afternoon, "The liabilities are about \$10,000,000 and the assets at the present market price largely exceed that sum. The liabilities are almost entirely to banks and bankers on loans made in the course of business and are well secured. The cause of the suspension was the inability to borrow the necessary amount of cash required in a day's business. The firm's transactions were very large, it being necessary to borrow several millions daily. The firm had abundant collateral to-day and it was matter of absolute inability to get money on the best securities, owing to the extraordinary money stringency now prevailing. The firm of Decker-Howell was one of the most prominent on the stock exchange. It was identified, not only with Villard stocks, but with the Standard oil interests, and also carried the accounts of some of the largest stock operators in Chicago. Whitney & Co. have been heavy losers in several stocks of which they carried a large line and some of which for months past have been unsalable. It is not known yet whether the aggregate liabilities will be sufficient to attachment was issued this afternoon against Nightengale Bros. & Knight, silk manufacturers, of Patterson, N. J., for \$43,069 in favor of Walker, Son & Co. The assignee of the Walker firm said that the attached firm owes them \$41,000.

### Crime in Sacramento.

SACRAMENTO, Nov. 11.—Mrs. Edith Stone suicided this morning with laudanum. She was 37 years old. The cause of the suicide is unknown. Judge Armstrong this morning sentenced Con O'Neill and Thomas Downey, freight car burglars, to ten years each at Folsom. W. R. Kelly, who participated in the same crime, has been sentenced to fourteen years' imprisonment.

### Guessing Contests not Included.

WASHINGTON, Nov. 11.—In response to inquiries by Postmaster-General Wainmaker, as to whether advertisements in newspapers of the "guessing contest," in its various phases, is in violation of the revised statutes as amended by the anti-lottery act of September 19, Attorney-General Miller has submitted an opinion in which he holds in the negative.

### A Victim to Gas.

SAN FRANCISCO, Nov. 11.—Mrs. Frank Bishop, of Weymouth, Mass., last night, on her way to friends at Alameda, Santa Clara county. She was found dead in bed this morning, having been asphyxiated by gas.

### NEW YORK CARRIERS.

Railroad Employees Conspire to Deceive the Officials. SENSATIONAL SHOOTING. No More Free Alcohol—The Guatemala Insurrection—An Insane Baker—A Failure of New York Brokers.

New York, Nov. 11.—Through an investigation instigated by Chief Inspector Rathbone, he learned that many post-office attaches, principally carriers, were in collusion with the green goods men. The rule of the department is that no carrier shall deliver letters that bear a suspicious address to any place to which they are directed. The investigation convinced the inspector that 15 of the letter carriers, at least, were violating the rule. The names of the letter carriers are withheld, pending action on their cases at Washington. They were caught by a decoy letter.

### RESTRICTION TO BE REMOVED.

The American Hog Can Soon Engage in Travel to Europe. WASHINGTON, Nov. 11.—The secretary of agriculture is in receipt of a communication from Minister Carr, at Copenhagen, in which Carr states that a petition recently presented to the Danish government by the leading importers of Copenhagen, asking the removal of the restrictions against American pork. Carr adds that the opinion of the Danish government in Denmark that in the near future American pork will be admitted to all the countries of Europe.

### Guns for the Cruisers.

SAN FRANCISCO, Nov. 11.—Guns for the new cruisers San Francisco and Charleston have arrived at Mare Island. The Charleston, which, when last heard from was at Honolulu, is expected to arrive here between the 15th and 20th of this month. She has aboard some of the guns belonging to the San Francisco, and immediately upon her arrival the work of taking them off and putting on her own will be commenced. A Fraternal Congress. PITTSBURGH, Nov. 11.—The fourth annual meeting of the national fraternal congress, comprising nearly all the beneficial organizations in the country, began here this morning. Sixteen societies with a combined membership of 1,100,000 were represented. The convention will be in session several days. Killed by a Pig. LEXINGTON, Ky., Nov. 11.—Dr. Boswell Gorham, a prominent physician, was shot and killed by a negro named Duncan this morning. No cause is known for the murder. Men are scouring the country in search of the murderer. Died From a Fall. SEATTLE, Nov. 11.—A special telegraph intelligence from Gilman says that Charles Downey, aged 39, a native of Canada, unmarried, was hurt by falling on a skid at Niblock mine on the 3d of this month. He was brought to the Gilman house in Gilman on last Saturday and died to-day.

### Confession as to Divine Guidance.

San Francisco Argonaut. In the early days of Main Methodism it was customary for young ministers to consult the presiding elders before taking a wife. Once during a camping trip in Eastern Maine a young minister approached the presiding elder and said he wished to be married. "Whom do you propose to marry?" asked the elder. "The Lord's lass made known to me very clearly that I should marry Sister Mary Turner." "I know her well," said the elder; "she is a fine girl. I will see you again before the meeting closes." During the week four other young ministers consulted the presiding elder on the subject of marriage. Each of them gave the name of the young woman to whom he proposed to offer himself. They had all prayed over the matter a great deal, and each was certain that it was the Lord's desire that he should marry the person named. Neither of the five young men knew any one else had consulted the elder on that subject but five ministers came to his tent to receive his opinion. He said: "Now, brethren, it may be the will of God for you to marry, but it is not His will that five Methodist ministers should marry little Mary Turner."

### Woman's Discovery.

"Another wonderful discovery has been made and that too by a lady in this county. Disease fastened its clutches upon her and for seven years she languished in its grasp, but her vital organs were undermined and death seemed imminent. For three months she coughed incessantly and could not get the least relief. A bottle of Dr. King's New Discovery for Consumption and so much relieved on taking first dose that she slept all night and with one bottle her vital organs were undermined and death seemed imminent. For three months she coughed incessantly and could not get the least relief. A bottle of Dr. King's New Discovery for Consumption and so much relieved on taking first dose that she slept all night and with one bottle her vital organs were undermined and death seemed imminent. For three months she coughed incessantly and could not get the least relief.
