Freight	3:40pm	7:45 a m

Perhaps as keen a criticism upon the defeat of Parnell, as has appeared in an American newspaper is the following from the Leader of Cleveland Ohio. It says: "The exhibition given in Kilkenny of the overwhelming political strength of the priesthood will go far toward reviving the natural fears Protestant England, and especially of Protestant Ulster, that home rule would mean tyranny on the part of the dominant church and oppression of the Protestant minority. It is perfectly clear that the priesthood is too powerful and too active in politics to make local self-government really safe and free, and in future elections Mr. Parnell's opponents must curb their overzealous clerical supporters, or the cause of home rule will surely be doomed for a long time to come, even if it is not ruined already. They can better afford to let a few more seats in parliament go to the Parnellite faction than to have Great Britain and America see voters marched to the polls under priestly guidance to vote as their religious teachers direct. In this country contributions will not be large for any popular cause or any political movement which is soon to be in the hands of a church."

Some interesting items in regard to iron can be gleaned from the following facts: Add carbon to pure iron and it becomes steel. Add a hydro-carbon to iron, and steel itself becomes so extensively modified that its properties are not recognizable. Thus steel may be as soft as pure iron. Add hydrogen, in varying quantity, and it has the quality of resilience, as in the watch spring, or the quality of tenacity as in the knife or razor, or may be given nearly the hardness of a diamond, as in a file. With steel at a low temperature, from 400 degrees to 450 degrees Fahrenheit, edge-tools are produced, the color in the yellow shades; from 500 degrees to 525 degrees various sorts of springs are produced, color blue; while by heating iron to whiteness and plunging it into water, which is mainly composed of hydrogen, files are produced, or forms even harder.

There seems to be a diversity of opinion among the legislators even upon as plain a topic as the matter of precinct assessors, instead of the present arrangement of county assessor. Some are inclined to the plan of retaining the county assessor and requiring him to appoint property listers for each precinct, the assessor to put on the valuation. A careful consideration of the question would seem to demonstrate that such a system would not compare in excellence with the precinct assessor plan. Certain it is that the vast majority of the people have decided in favor of the precinct assessors.

Senator Sherman has made the best effort in his power, before the United States senate, to prove that the best welfare of the country demands the retention only of the rich man's money—gold, and that the poor man's money—silver—is not good for the country. After all his argument has been carefully considered by the people of the country, they will probably still continue to believe that free coinage is just exactly what is wanted, and that silver money is very good to have.

Governor Pennoyer is honestly possessed with a bee in his bonnet that is buzzing for the White House, and he has a perfect right in that direction. Indeed his candidacy is by no means to be viewed lightly, for there stands as much probability of his success as any other prominent democrat in the country.

One of the unaccountable anomilies of trade is exhibited in the report from the Sound that two carloads of chickens had arrived at Seattle and Tacoma. Supplement this report with the fact that butter and eggs for this coast are an almost daily shipment by the overland routes from the same locality, and that lard, bacon and hams are a staple article of import from the contiguous localities and the picture is complete. And yet all of these products with the exception of corn fed products of the porcine tribe are just as cheaply produced here as there. Why the wherefore? Probably the McKinley bill!

There seems to be no lack of bills in the Oregon legislature. One day's work piles the calendar way up, and it does not begin to lower the plethoric pockets of the members. As usual a larger amount of work will be laid out their can be accomplished and the result will be that many perhaps, meritorious measures will be entirely lost sight of. The wonder is that a continuation of wagon road bills promptly come to the front, when legal decision and the expression of public opinion has distinctly said that such measures were decidedly unconstitutional.

It goes without saying that the most urgent demand for legislation is upon the assessment law. And yet it is said by competent judges that Oregon has as good an assessment law as any of the states, the only need is to faithfully and efficiently fulfill the law. In that case if the legislature will pave the way for precinct assessors and for their faithful discharge of their duties they will do all that is necessary.
