VERACITY OF MINISTERS

Not Preachers of the Gospel, but Political Diplomats. CHICAGO, Feb. 27.—A morning paper has an article on the "Veracity of Ministers," in which it says: "In Nova Scotia a few days ago Sir Charles Tupper staked his personal veracity that Sir John Macdonald never sought to obtain from the American congress reciprocity on bituminous coal. The facts are Sir John Macdonald wrote an autograph letter to a friend of his offering free coal and other articles, which letter was intended to be shown, and was shown to the members of the senate finance committee at Washington during the discussion of the McKinley bill last summer. It was placed on file among the records of the finance committee, where it remains to this day."
