OREGON PACIFIC TIME TABLE. Arrives Departs

WHAT POWER IT MAKES.

All people are more or less familiar with the wonderful power of water in motion, or hydraulics.

Justice Field of the U. S. supreme court, at a dinner party in Washington recently, made some statements in reference to it, which created some doubt in the minds of listeners, and he felt called upon to corroborate them, and in so doing brings to light some interesting data.

Justice Field, giving ex-Senator For, of Nevada as authority, stated that under a vertical pressure of 100 or 200 feet, the force of the stream is sometimes so great as to hurl away or hold together weighing a thousand pounds; and that it would be no more possible to cut through such a stream with a crowbar or an ax, where it issued from the nozzle, than to sever eight inches of solid iron with a penknife.

Justice Field, giving ex-Senator For, of Nevada as authority, stated that under a vertical pressure of 100 or 200 feet, the force of the stream is sometimes so great as to hurl away or hold together weighing a thousand pounds; and that it would be no more possible to cut through such a stream with a crowbar or an ax, where it issued from the nozzle, than to sever eight inches of solid iron with a penknife.

reason, until a mania has been developed for its possession, is very peculiar, and is not always backed with even the slightest degree of common sense. The Oklahoma mania was an example of this kind, and another similar rush is on hand in Wisconsin, of which the Chronicle says that the men who are eager to locate on the Omaha Indian lands in Wisconsin do not propose to be trifled with. They are reported to be heavily armed and they threaten death to any one who breaks the lines of waiting applicants. If they prove a nuisance the fire department of Ashland should be called out and the usual procedure in case of a conflagration carried out. The most enthusiastic boomer would not stand a stream from a steam fire engine.

We on this genial sunset slope, with the mountains on one side and the warm breath of the Pacific blowing upon us, have little idea of the misery pneumonia and the dreaded gripe now entail in Eastern and Mississippi valley cities. In towns of 8,000 and 10,000 people, 700 and 800 people are suffering from that miserable malady, and the fatality is something awful.

It looks now as if the presidential race in 1892 might be between the old rivals Blaine and Cleveland. Pennoyer of Oregon is not heard of on the democratic side, and will probably not even reach a place in the race for the vice-presidency.

ALBANY will arrange for a becoming reception to President Harrison and party on their arrival in this city.

Fire Kindlers. If you want a good and easy fire kindler, one that will kindle your fire easy every time. Call on or come and see me.

The canvas will be spread near the Southern Pacific depot.

HUMPHREYS'

Dr. Humphreys' Specifics are scientifically and carefully prepared prescriptions, used for many years in private practice with success, and for over thirty years used by the people. Every single specific is a cure for the disease named.

These specific cures without dragging, pinching or robbing the system, and are in fact and deed the sovereign remedies of the world.

There are some peculiarities that crop up in the matter of tariff and immigration considerations, one of which the Economist refers to in the fact that English emigration returns for February of this year show an increased immigration to this country and a decrease in those going to Australia and the Cape of Good Hope, as compared with the returns of 1890—viz., an increase of 1004 in the number of this country and a decrease of 464 to Australia and South Africa. It is a little bit strange that there should be so many additional "monopolists" starting out from that free trade country to enjoy the comforts the McKinley bill is said to confer on that class; and for the past ten years the British Islands have been furnishing us on the average about 150,000 such monopolists.

The insane desire to acquire locations on land that has been withheld from market for any

THE BEST SEEDING IMPLEMENTS IN THE WORLD ARE THE

Hoosier Force Feed Broadcast Seeders and Grain Drills.

These machines are strong, durable, built of the best materials, handsomely finished, and have many improvements over any other machine of their class ever

MADE. AN IMPORTANT IMPROVEMENT IS THE SPRING HOE, By means of which the Machine passes over any obstruction without stopping. All persons who have any grain to sow will save money by purchasing a

Hoosier Seeder or Drill
