FOREIGN IMMIGRATION MATTERS.

The importance of this subject continues to bring it before the people, and scarcely an issue of our leading daily papers are made without some reference to the subject.

The Chronicle of recent date refers to the fact that "Prince Karl Lichtenstein of Vienna, who has been arrested for obtaining money under false pretenses, has intimated his readiness to emigrate to this country if allowed to escape the clutches of the law. This incident confirms a statement recently made, that is quite the custom in Austria to give certain classes of criminals their choice between the United States and the jail, and that our population is increased every year by convicted felons who accept deportation instead of imprisonment."

What wonder it is that the case, that the tramp element in our country is so rapidly increasing, and that crimes multiply and political corruption becomes rampant.

We have an immigration law intended to meet just such cases, but it fails in its operation because it does not begin far enough back. Instead of having a muster roll of immigrants as they take ship for America we wait until they arrive here before we try to respell them, and it is a pretty stupid immigrant that cannot manage to land after the ship has reached port.

The only effective way to prevent Austria and other European nations from shutting their criminals on to us is to look out for them at the other end of the line. There should be officers of the United States government in each of the great shipping ports of Europe, empowered to make strict inquiry into the status of every intending immigrant, and with instructions to protest against the embarkation of criminals and paupers, even if their sailing for this country cannot be prevented. Then the United States would be in condition to refuse such classes the privilege of landing and to ship them back with a demand for reparation against the nation which tried to foist them upon us.

Every nation on the continent of Europe knows the status of those who come to America from there, except in occasional individual cases of escape, and we have a perfect right to the information on that subject which they possess. Unless some plan that has been suggested shall be adopted our regulation of immigration will continue to be as farcical as ever.

PHENOMINAL GROWTH.

Whatever may be said upon the subject of the recent census report, the facts elicited by Commissioner Porter show a wonderful growth in our country. It shows a growth in the last ten years that is a marvel in the history of nations—a growth that is phenomenal even in our own history, and a growth that is substantial, firm and prophetic of even greater results in the next decade. As Superintendent Porter says, we have in these ten years added a nation to a nation—a nation complete in ever particular. In population, in the increase of the products of the farm, in the multiplication of manufactures, in the development of our mines and quarries, the extension of our railroads, in building up of our commercial industrial centers—in every way, the growth of the United States has been such that it is hard to realize the full meaning of the enormous figures the census puts before us. It is a great field for the student of a nation's progress, and at the same time it is a field that every Ameri-

can citizen can study with profit to himself. Even a brief study is bound to make an American prouder of the land he lives in—prouder of her past record and her present achievements, prouder of the great future laid before her. Take the question of population. Mr. Porter's figures show that the last decade has added thirteen millions of people to our inhabitants—a population almost equal to that of Belgium, Holland and Portugal combined. When it is realized that sixty years ago the total population of United States was not as large as the increase of the past decade, some idea may be obtained of the increase in this direction. And this vast addition to our numbers has spread itself over the land, redeeming, as Mr. Porter puts it 377,000 miles of solitude, or more than three times the area of the United Kingdom of Great Britain and Ireland, increasing the density of the settled area and adding seven millions of people to our town and cities. In these ten years the United States has almost doubled its railway mileage, increased its area for the cultivation of cereals sixty-three per cent, increased its wool products one-half and its cattle interests three-quarters. Its manufacturing products show an increase equal to the total of such products twenty years ago, while to our wage-earners has been added 900,000 men. The coal and lumber output have doubled in the past decade, the pig-iron product has trebled, while the steel product is four times as large as it was ten years ago. And the South shows up well in this great record of development. The number of cotton spindles has more than doubled, the consumption of cotton is 175 per cent greater than it was in 1880. In her iron and other interests the South comes with a record that is truly phenomenal. In many ways with the progress of other portions of the land.

FOUND AT LAST!

—THE WATERPROOF—

OIL BLACKING,

FOR LEATHERS, SHOES, STRAPS, AND BAGS. CANNOT BE EQUALLED.

It is lasting and durable. It does not rub off on the hands or clothes. It is perfectly waterproof. It softens the leather to its natural state. It gives the leather a new and glossy appearance. It contains not one ingredient that is injurious to either the leather or stitching, but is a preserver of them. It can be used on the finest boots and shoes and will prevent the use of the common boot-blacking, but will soften and keep them from cracking. Now, my friends, if such an oil as this would suit you, go to the drug store of Julia Dawson, where you can get it for 50 cents per box. One box will oil more than one set of harness. Receipt for making the oil is sold only for individual use. J. C. DEVINE, Manufacturer and Agent, Albany, Oregon.

make Simmons Liver Regulator One Dose

WORTH 100 Dollars.

DEAR S. L. R. I consider one dose of Simmons Liver Regulator worth \$100.00, was constituted that headache, could not eat, nothing with satisfaction or appetite for the blood, and felt altogether out of sorts. I resorted to Hine Mass, Calomel, Quinin, and every remedy suggested, but only obtained temporary relief. One dose of S. L. R. did me more good than \$100 worth of doctors' attending. Respy, J. C. MARTIN.

I have been a teacher for twenty years, and during that time have had repeated attacks of headache, produced by torpid Liver, and have been entirely cured by Simmons Liver Regulator. I found it to be of so mild a character in its action as not to interfere, in the least with my duty in the school room. To those who are afflicted with a similar ailment, I cannot too highly recommend Simmons Liver Regulator. E. E. CROFT, Campbellville Ky.
