POLITICAL INFLUENCES.
The weird political influence
is to make it undeniably palpable
that a power is possessed that can
be made available.

It may be humiliating to admit
such a fact, but nevertheless
it remains the most potent fact.
To be sure the abstract right of the
case should rule, but it does not,
it is the availability that becomes
the standard of merit for adoption.

Harvesting operations are in
progress in the Willamette, and
many fields of heavy golden grain
are in the shock. There will be
an enormous crop, and indications
are favorable for good prices.

It is good news that the Upper
Willamette is to be improved.
The river ought to be open to
navigation as far as Albany in the
year round, and it will be if the
proper improvement of the river
is made.

HUMPHREYS'
Dr. Humphrey's Specifics are scientifically
and carefully prepared prescriptions; used
for many years in private practice with
success, and for over thirty years used by
the people. Every single specific is a cure for
the disease named.
These specifics cure without struggling,
purging or roiling the system, and are in
fact and blood the sovereign remedies of the
world.

MAKING RAIN TO ORDER.
Making rain to order would
seem to be difficult business, but
this government is at it, and bal-
loons for this purpose are now being
made in Utica, New York.

sary for balloon making as for
farming. Good buy weather is
good balloon weather.
The rain-producing bombs which
the United States government are
experimenting with are made by
Professor Myers.

In a few words, the plan is to in-
flate a balloon with one part of
oxygen gas and two parts of hydro-
gen gas. A small ordinary car-
tridge connected with two wires is
placed in the balloon and the
whole is sent up. When the bal-
loon is sufficiently high the car-
tridge is exploded by means of
electricity sent through the wires,
and the two gases unite, forming
water. This serves as a nucleus
to precipitate the moisture of the
atmosphere, and there is rain.

The experiments thus far have
been more or less successful.
Last May Professor Myers and
General Drydenforth made their
first experiment in this line in a
ravine a short distance from the
farm. Then a few balloons were
taken to Washington and in pre-
sence of several officers and sci-
entific men another experiment was
made. It was a perfect success.

The balloon was exploded, the
gases ignited with a most terrific
report and brilliant illumination.
It rivalled the sun in brilliancy.
Professor Myers says that the ex-
plosion that would occur if a
twenty-foot balloon were employed
would cause the most terrific re-
port ever heard on the earth.
