H. GREGG,
Tailoring & Repairing.

Men's and Boys' clothing made to order or cleaned and repaired on short notice and reasonable rates.
Shop on the street car line, between Third and Fourth streets.

A Perfect Baking Powder.

The constantly growing demand for Dr. Price's Cream Baking Powder, the standard cream tartar powder for forty years, is due to two causes.

FIRST:—The extreme care exercised by the manufacturers to make it perfectly pure, uniform in quality, and of highest raising power.

SECOND:—The recent investigations exposing the fact that certain other brands of baking powder contain ammonia and still others that were found to contain alum. These unscrupulous manufacturers are being found out, and the consumers are giving them a wide birth.

Nothing is left to chance in the manufacture of Dr. Price's Cream Baking Powder. Chemists are employed to test every ingredient as to purity and strength. Hence; its marvelous purity and uniformity. Each can is like every other. It never dissapoints. BEST is ALWAYS the CHEAPEST.

Dr. Price's Cream Baking Powder is reported by all authorities as free from Ammonia, Alum, or any other adulterant. In fact, the purity of this ideal powder has never been questioned.

Notice to Water Consumers.

Water is being wasted to such an extent and so unnecessarily that we are obliged to enforce a strict observance of the rule in regard to hours for sprinkling, viz: From 5 to 9 A. M. and from 6 to 10 o'clock P. M., and to caution all users of water to guard against leaks from faucets or other fixtures. The continuous running of water through closets or other fixtures, or permitting hose streams or sprinklers to run all night, will be deemed sufficient cause for shutting the water off from premises where allowed without further notice.
Albany, Or., July 18, 1891.
A. C. W. T. & L. Co.
WALLACE BALDWIN, Cashier.

TO GOOD TEMPLARS.

Do you know that Moore's Revealed Remedy is the only patent medicine in the world that does not contain a drop of alcohol; that the mode of preparing it is known only to its discoverer; that it is an advance in the science of medicine without a parallel in the nineteenth century; that its proprietors offer to forfeit $1,000 for any case of dyspepsia it will not cure?

Thos. Brink has just received some of the finest lounges ever brought to Albany, and he is selling them at a close margin.

SPECIMEN CASES.

S. H. Clifford, New Cassel, Wis., was troubled with Neuralgia and and Rheumatism, his Stomach was disordered. his Liver was affected to and alarming degree, appetite fell away, and he was terribly reduced in flesh and strength. Three bottles of Electric Bitters cured him.

Edward Shepherd, Harrisburg, Ill., had a running sore on his leg of eight years' standing. Used three bottles of Electric Bitters and seven boxes of Bucklen's Salve, and his leg is sound and well. John Speaker, Catawba, O., had five large Fever sores on his leg, doctors said he was incurable. One bottle Electric Bitters and one box Bucklen's Arnica Salve cured him entirely. Sold by Foshay & Mason, Drug store.

MILES NERVE & LIVER PILLS.

Act on a new principle—regulating the liver, stomach and bowels through the nerves. A new discovery. Dr. Miles' Pills speedily cure biliousness, bad taste, torpid liver, piles, constipationr Unequaled for men, women, children. Smallest, mildest, surest! 50 doses for 25 cents. Samples free, at Stanard & Cusick.

Cakes of all varieties, fancy and plain at the Delmonico restaurant.

THE PULPIT AND STAGE.

Rev. F. M. Shrout, Pastor United Brethren Church, Blue Mound, Kan., says: "I feel it my duty to tell what wonders Dr. King's New Discovery has done for me. My Lungs were badly diseased, and my parishioners thought I could live only a few weeks. I took five bottles of Dr. King's New Discovery and am sound and well, gaining 26 lbs. in weight."

Arthur Love, Manager Love's Funny Folks Combination, writes: "After a thorough trial and convincing evidence, I am confident Dr. King's New Discovery for Consumption, beats 'em all, and cures when everything else fails. The greatest kindness I can do my many thousand friends is to uge them to try it.' Free trial bottes at Foshay & Mason, Drug Store. Regular sizes 50c. and $1 00.

REMARKABLE RESCUE.

Mrs Michael Curtain, Plainfield, Ill, makes the statement that she caught cold, which settled on her lungs; she was treated for a month by her family physician, but grew worse. He told her she was a hopeless victim of consumption and that no medicine could cure her. Her druggist suggested Dr. King's New Discovery for Consumption; she bought a bottle and to her delight found herself benefitted from the first dose. She continued its use and after taking ten bottles, found herself sound and well, now does her own housework and is as well as she was.—Free trial bottle of this great Discovery at Foshay & Mason's Drug Store, large bottles 50c, and $1.00.

SPECULATION DANGEROUS.

Scarcely a day passes without the news of some large failure flashing over the wires—the usual result of speculation in stocks or some equally dangerous venture. The same electric current carries to dear distant friend the sad tidings of death of loved ones—too often the result of speculation in patent nostrums. Moore's Revealed Remedy is no speculation but is sold on positive guarantee. Do not fail to go to your druggist and ask for your money if not satisfied. We known you will go and buy another bottle. For sale by all druggists.

That hacking cough can be so quickly cured by Shiloh's Cure. We guarantee it. Sold by Foshay & Mason.

STATE AND COAST

An Important Piece of Railroad News Given to the Public.

ASTORIA TO SPRINGFIELD.

The Annual Conference of the Methodist Church in Session at the Capital—Notaries Appointed.

SALEM, Aug. 18.—On February 23d last the following articles of incorporation were filed with the secretary of state, but not published at the time, as the incorporators requested that they be withheld from the press. The corporation took for its name that of the Pacific & Eastern Railway Company; incorporators, Frank J. Taylor, M. J. Kinney, H. G. Van Dusen; principal office, Astoria; capital stock, $10,000,000, divided into one hundred thousand shares; declared object of the company, to build a railway south from Astoria to and up Tillamook river, across the Coast range to the headwaters of the Yamhill river and down said river to the east side of the Coast mountains, thence south through the Willamette valley to Springfield, thence easterly, crossing the Cascades by way of the middle fork of the Willamette, to the East Cascades, thence easterly by way of Harney Lake valley and Eastern Oregon and through Southern Idaho to Salt Lake City, Utah. Also a line from Astoria to Portland, thence south through the Willamette valley to a practicable connection with the main line. This piece of railroad news is now given to the public for the first time.

The Oregon annual conference of the M. E. church began its session in this city this evening and will be in convention during all of the week. About 200 ministers and delegates are in attendance. To-day's programme consisted of receiving and stationing delegates. In the evening a public reception was held at the M. E. church. Mayor P. H. D'Arcy delivered an address, welcoming ministers and members of the conference to the City of Churches, and said it was a very appropriate place for the conference to meet, Salem being an old city and the home of the oldest M. E. church or other educational institution in the Northwest. Bishop Fitzgerald responded in an able address of thanks in behalf of the conference. Regular proceedings of the conference will commence to-morrow.

Governor Pennoyer to day appointed L. Bilyeu, of Eugene, a member of the state board of equalization, vice, T. R. Sheridan, of Roseburg, resigned and Chas. G. Schramm, of Portland; vice, George Harold, of Portland, resigned.

The reform school board are advertising for bids for a farm house to be built on the reform school property. It will cost about three thousand dollars. The reform school will probably open about September 15.

MEASURING HEAT.

General Greely Explains the Work of the Signal Service.

It has been a frequent subject of sarcastic comment on the ability and accuracy of the Signal Service reports during the recent heated term that the alledged temperatures known and experienced by every one else. Thus, for instance, the Signal Service would announce, when every one knew that the temperature was anywhere from 92 to 100 degress, and at many places 105 and 110 degrees, that the official temperature of that day had been only 88 or 90 degrees. In other words, the official temperature, as given by the Signal Service, seems to be invariably some ten degrees below the temperature and heat experienced by every one else except the cheerful and lucky gentlemen who sit on some high tower and take temperatures for the Signal Service of the United States army. Your correspondent called on General Greely, Chief Signal Officer, on a particularly hot day here. There was every indication that the man who walked along the street would find the temperature 100 degrees, and there was every reason, to judge from past experence, that the signal officers would announce this morning that the temperature had fallen below 90 degrees. General Greely very cheerfully vouchsafed an explanation of an apparent discrepancy between theory and practice. He said:

"The temperatures of the Signal Service are displayed in such a manner as to allow the moving air to freely pass by the instruments. Our instruments are always protected from radiated and reflected heat.

A citizen walking along the streets, of course, is not. In no other way can temperature observations be comparable than when they are made absolutely free from such extraneous influences. Take such a day as yesterday, for instance. In In the great cities of the country there is no doubt that the same thermometer set in various places in the shade would have recorded from 90 to 100 degrees, this being dependent upon the situation entirely of the thermometer relative to radiated and reflected heat. For instance, one thermometer in the instrument shelter of the Signal Office on the top of some lofty building in any city, as we invariably choose high buildings, reached, say, 90 degrees. It is undoubtedly true that there were many localities in the same town on the north side of a sunny or brick building where the themometer, exposed on the window-frame and free from any reflected or radiated heat would have indicated heat considerably lower than our thermometer. This is because a thermometer being near a stone or brick building which had acquired a lower temperature during the night before would read lower than the temperature of the free air which is indicated by our thermometer. On the other hand, where the thermometer was so situated that the rays of the sun struck an asphalt or wooden pavement at such an angle as to reflect the heat of the thermometer, it is quite likely that the instrument would have reached a height of 105 degrees, or even 110 degrees.

"If you were entirely to wipe out a city from its location, and were to give that place over to green fields, the temperature of the air at that point would be precisely the same as that recorded by our thermometers on the roof of the lofty building—changed, of course, by the correction necessary for the heat of the building, which would be less, as a matter of fact, than 1 degree. You understand, for instance, that the temperature under the wooden shelter, where one can walk in the shade, is higher on the sunny side of the building than under a similiar cover on the sunny side, the difference being as much as 4 degrees or 5 degress or even 10 degrees in some cases. We aim to give the absolute temperature of this particular city, free from radiated or reflected heat, and there is no other way to obtain such temperature than the one we now follow. The Signal Service was well aware of all the objections that would be offered on account of this apparent discrepancy, and much time and expence were devoted to the proper exposure of thermometers. We can understand the discontent that a man may feel at seeing the difference in temperature, but we know that our method is reasonable, and what is of equal importance, our results so obtained are comparable."—Washington Telegram to the Baltimore American.

WHEAT DECLINING.

THE MARKETS OF THE WORLD ARE GROWING MORE QUIET.

There Is a Belief that the Situation Was Exaggerated and the Advance Is Not Warranted by Facts

NEW YORK, Aug. 18.—Wheat—Market opened quietly this morning. In the early part of the session there was little disposition to sell, but what sales were made were at prices somewhat less than yesterday's close. At noon $1.10⅜ was asked for August wheat, which closed last night at $1.11⅛. September was bid for at $1.11¼, a drop of ⅛ of a cent. December opened at $1.12½, a decline of ½ cent, then jumped up to $1.13½, and at 12 o'clock went ¼ of a cent higher. At the close this afternoon another reaction occurred, and August and September closed at $1.10 each, and December at $1.12¼ asked. May wheat fell off to $1.16⅓, which is ⅝c under yesterday's closing.

AT SAN FRANCISCO.

SAN FRANCISCO, Aug. 18.—There was no excitement at this morning's session of the produce exchange. The market was comparatively steady and transactions were light. Buyer season wheat closed at $1.76⅝; buyer year, $1.70⅝ and seller year, $1.63¾.

AT CHICAGO.

CHICAGO, Aug. 18.—September wheat was shoved up to $1.02½ by noon to-day, but rapidly tumbled back to $1.00½ at the close, or a half a cent below closing price yesterday. December wheat opened at $1.03, last night's figure, advanced half a cent and closed at $1.02½. May wheat declined from $1.09¾ to $1.08.

THE OLD WORLD.

BERLIN, Aug. 18.—The grain market opened excited and lower this morning. August rye opened at a decline of 10 marks 50 pfennige. August wheat opened 6 marks lower, and September and October, 5 marks 50 pfennige lower. The decline is caused chiefly by news of the government's action in ordering the substitution of wheat meal for rye in making bread for the army. There is a growing belief that the situation is exaggerated. and that the recent rapid advance in prices is not warranted by the facts in the case.

LIVERPOOL, Aug. 18.—Wheat, weaker; California spot, 8s 10½d; off coast, 44s 3d; just shipped, 45s 3d; nearly due, 44s 9d.

English Flour Advancing.

LEEDS, Aug. 18.—The Leeds Millers' Association has decided to make and advance in poice of flour of 1s 6d.

WENT UP IN SMOKE

Jacksonville, Fla., Visited by a Big Fire.

OVER A MILLION DOLLARS

The Flames Spread in Every Direction Being Fanned by a Brisk Breeze—Several Conflagrations.

JACKSONVILLE, Aug. 18.—A terrible fire is raging here. Sixty-five house are burned and the fire is is not under control.

The path of the smoldering ruins is two blocks wide and six blocks long, as a result of the fire which started at midnight. It caught in Knight & Co.'s grocery, adjoining the large Hubbard building, and in a very short time the block was a mass of flames. Thence they were carried diagonally across to the Tremont hotel, thence to Col. Burbridge's block.

The fire spread on all sides, being fanned by a stiff breeze. Nothing could stay the flames until exhausted for want of material. They were stopped at Beaver street on the north, at Laura street on the west, and Ocean street on the east, At 7 o'clock this morning over twenty-five business houses were burned and over forty dwellings. The loss is about $1,000,000; insurance. $500,000.

From Hubbard block the fire jumped across the street to the Smith and Mather buildings. In the Smith building a large amount of dynamite was stored. This exploded and started fires in blocks away to the northwest. The sound was not heard, but the effect of the explosion was seen fifty miles away. In the city the effect was stunning. Men fell in the streets and many were injured. Plate glass for four or five squares was shattered, and the sidewalks were covered with broken glass.

The firemen could have stopped the fire at this point but for the explosion, which rendered them helpless. Residences, stores and hotels broke into flames, and the fire became a terrible conflagration, and was not stopped until after daylight.

OTHER FIRES.

BOSTON, Aug. 18.—At Cambridge this morning the Damon iron works were burned. The building was valued at $50,000. The entire loss of the Damon Iron Company will approximate $200,000, on which there is a partial insurance. The Kendall machine shop adjoining was destroyed. Loss, $80,000 on contents; insurance, $50,000. The men employed in both places lose their tools, valued at $10,000. The Harvard Dry Plate Company suffered a loss of $9000.

BOSTON, Aug. 18.—Putnam & Co.'s mattress factory was burned this afternoon. Loss, $200,000. The building was a six-story brick and filled with a heavy stock of goods.

ST. LOUIS, Aug. 18.—The Pocock can factory was burned and two or three adjoining establishments destroyed this morning. The loss is $150,000; partially insured.

HARRISON OUT OF TOWN.

He Goes to Vermont to Take Part in the Centennial Festivities.

PHILADELPHIA, Aug 18.—A special train bearing President Harrison and party to Bennington, Vt., to take part in the centennial festivities, left Cape May this morning. Private Secretary Halford accompanied him.

JERSEY CITY, N. J., Aug. 18.—The presidential party arrived promptly at 12:30, and after a stop of only five minutes, proceeded on the way to Albany. There was no demonstration here, as it was seen that the party would stop but a few minutes. Russell Harrison and a number of reporters joined the party here.

A FAST YOUNG MAN.

He Skips With a Beautiful Woman and Leaves Short Accounts.

SAN ANTONIO, Tex., Aug. 18.—A. Phill, a dapper young man who came here a short time ago to manage the San Antonio Electric Light and Power Company, recently sent his wife and two children to Massachusetts to visit friends. When they had gone he installed a dashing brunette in his house, and last Saturday he disappeared with her. His accounts are short several thousand dollars.

A PECULIAR CASE.

A Mind Reader Remains Unconscious Thirty Hours.

SEATTLE, Aug. 18.—Professor J. McIva Tyndall, the mind-reader, who arrived in Seattle from England a few months ago, and who has performed some wonderful feats, fell in a trance at the People's theater during a performance at 2 o'clock Monday morning, and he did not regain consciousness for thirty hours. He was removed to the European lodging house on Washington street, and the physicians who were called could do nothing for him. His respiration was regular, his pulse normal, the trance not taking the cataleptic form generally peculiar to mind readers. However, he had no physical control of himself. His joints worked like an automation. Arms if raised upright from the bed would remain in that position until pressed down. The fingers if doubled up or pressed out would not change their place. Frequently the sleeper's form would convulse with shaking, and then again he would lie apparently resting as easy as a sleeping child.

On his person was found a letter addressed to "attending physician," stating that he was subject to trances, and that he had at one time been unconscious for thirty hours. He asked that he be not buried until it is known for a certainty that he is dead, and if it is proven that there is no life in his body, he gives the doctors permission to examine his brain. When Tyndall regained consciousness this morning, the first thing he wanted was something to eat.

ANOTHER VENDETTA.

Bloody Family Quarrel in Mississippi Just Opened.

PURVIS, Miss., Aug. 18.—A family feud which is likely to prove a bloody one opened here to-day. Jesse Lee and William Boon, well known citizens of Purvis, met at a neighbor's house, and, without wasting any time in words, began firing at each other. Boon was shot twice through the heart, but before he died, and while lying on the ground, he succeeded in wounding Lee, who escaped, but is thought to be fatally shot. Family troubles caused the duel, and, as each man has many connections with fighting blood in their veins, it is not thought that the trouble will end here.

FARMERS' ALLIANCE.

Another Convention Called for September 15 at St. Louis.

ST. LOUIS, Aug. 18.—The executive committee appointed by the Fort Worth farmers' alliance convention has issued a circular to "members of the farmers' alliance and industrial union. and to farmers and laborers of the United States," calling a convention in St. Louis September 15.

Switzerland Will be Represented.

BERNE, Aug. 18.—Charles H. Grosvener, one of the members of the foreign committee of the Chicago Columbian Exhibition commission, has received assurances from the Swiss government that a good exhibit will be made at the world's fair.

THE RISING WATERS

SAN DIEGO THREATENED WITH ANOTHER BIG FLOOD.

There Are Heavy Rains, and the River is a Raging Torrent—Serious Results May Follow.

SAN DIEGO, Cal., Aug. 18.—Recent heavy rains at Campo and the country back toward the desert have again raised the Tia Juana river, and people apprehend more damage to property left by the heavy flood of last winter. The people are very poor because of the heavy losses, and fear a repetition of the former flood. The uncertainty about the location of the line of a new railroad from San Diego to Ensenada causes delay in locating the new town, and hence people have been building temporary houses on the old sites. These new structures are now in anger. There are heavy rains to-day in the country drained by the Tia Juana river, which is already a raging torrent, and should the rains continue long serious results may follow.

TO QUIET THE INDIANS.

Cavalry to be Sent to Tongue River Indian Agency.

WASHINGTON, Aug. 18.—Governor Toole, of Montana, has informed the acting secretary of war that in compliance with a petition of the citizens of Custer county the cavalry detachment at Tongue river is ordered from its camp there to the Indian agency on that river. In the opinion of the military commanders this force will be sufficient to guard the interests of both Indians and settlers.

English Wheat Crop.

LONDON, Aug. 18.—The Times refers to encouraging prospects ahead for the English farmer, saying, if given good weather for a fortnight, the wheat crop of Great Britain will be a good average one.

Beautiful Women.

The magical effects of Wisdom's Robertine as a beautifier and preserver of the complexion have been attested by thousands of leading ladies of society and the stage. It is the only article ever discovered which gives a natural and beautiful tint to the complexion, removing tan, sunburn, freckels and all roughness of the face and arms, leaving the skin soft, smooth and velvety. All remark on its delightfully cooling and refreshing properties, a distinction not found in any other similiar article known, For sale by Foshay & Mason.

Smoke the celebrated Havana filled 5-cent cigars, manufactured at Julius Joseph's cigar factory.
