probable amount expended in this country by foreign visitors and that brought in by immigrants accepted will receive the contract that the net loss is at least \$70,- for the execution of these fullized 000,000 annually. The Chicago models. Tribone revises the figures of the Ledger and points out that the latter omitted the not inconsiderable remittances to assist foreigners to come to this country and the amount sent abroad by persons living her to relieve from distress relatives in the "old country" and other inaccuracies, and includes that last year the net loss to this country by the drain was about \$111,000,000, and the amount will reach nearly \$100,000,000 this year. The stock the second state of the second state knowledge of this vast sum carried be kept in stock. These goods are out of the country may help some | the best in the market and will puzzied statisticians to solve the give entire satisfaction.

THE astute manipulators financial circles, whose personal interest lie in plan the of keeping a single gold standard for the circulating medium, so that the money of the country can be handled at their behests, with persistent intrigue, have finally succeeded in getting a quasi acknowledgement that the silver question is a political issue between the two parties, and the Ohio campaign is being run in that line. If the republicans meet a defeat in that state at the approaching election they can lay it to the making of the free coinage of silver the issue of the campaign. The facts of the matter are that the question has no more business to be made a partisan issue than has the temperance question, nor any other question upon which both parties are so divided upon. The personal interests of the money manipulators have driven it there, and the results may be disastrous.

THE question of the price of woelen goods not being any higher by reason of the McKinley bill, been definitely settled by the fact that prices are, if anything a shade lower than they were before that bill became a law, the next rec. Humphreys Manual, (144 pages) richly bound in cloth and gold, mail-rec. HUMPHREYS MED. O. assertion that is sought to be made into a successful partisan slogan is that the shoddy manufacturer SPECIFICS has driven out the superior article by his inferior goods. This cry is just as fallacious as was the one about the high prices, for it is the universal testimony of dealers that the manufactury of woolen goods has vastly improved in quality during the past year, in fact were never so good before.

THE conservative and selfish British nation very often takes action that, in the end will redound to its discredit. One case of this kind is spoken of by the Chronicle, in saying that it was a sorry ending of the laborers of the people who expedited the Japanese mail by way of Vancover to have the English postal authories fail to lend a helping hand. This action, however, is in harmony with the policy pursued by the London postoffice for years in the forwarding of the American mail by the Cuparders, although it was a notorious fact that these vesse's were much slower than the steamships of several other lines.

PAPERS which discuss the on side of the tariff business, for

tinue to assert that the terrible tax on tin has made articles manufactured from that commodity so high that people with ordinary length purses cannot buy them. They have stuck to this prevarication so long that there is a faint possibility that they actually believe it themselves. The facts of the case are that articles manuficiured from tin and even tin stock tself is not one farthing higher than it was before the McKinley bill became the law. A simple enquiry of any honest local dealer

and manufacturer will prove this

MRS. POTTER PALMER has called

fact beyond a question.

upon women sculptors to send designs in the form of miniature models of their sculpture work for the women's building at the Chicago Exposition. The designs must be delivered to Mrs. Palmer's office before Nov. 15 next. One is a group of figures in high relief to fill the pediment over the main entrance forty-five feet long at the base line and seven feet in ONE of the causes of the lack of the center. The second design of money in our country has been groups of statuary stands free assumed to be the large amount above the attic cornice, resting on that is annually placed in Europe, the base, five feet long, three feet by tourists from this country. deep and two feet high, sixty feet Patriotism and home welfare seems from the ground. These groups to have no weight with him who consist of a central winged figure, ican money caused by the visits by smaller sitting figures. The of citizens of this country to Eu- compositions should be typical of rope has recently been revived. woman and woman's work in The Philadelphia Ledger went in- history. Each design submitted to the matter a few days ago and must be accomplished by an esticoncluded that after educating the mate of cost, with full-sized plaster
