It Looks as If the Men Would Be Paid - The Status of the Case.

Hon. J. K. Weatherford, one of the attorneys for the Oregon Pacific employees in their suit for arrears in wages, was seen yesterday by a Herald reporter on his return from Corvallis.

He said that if the court held to the decision made the employees would get their money by the 23rd of October at the latest and perhaps before. The order of the court requires that the earnings from the 15th inst. be paid to the men, and that Col. T. E. Hogg be cited to show cause why he should not be removed as receiver of the road, for refusing to obey the former order of the court to pay the men on or before Sept. 14.

Receiver Hogg is under a good and sufficient bond of \$50,000 and if he still refuses to pay the men this will be forfeited and he will be removed from the receivership. This he cannot well afford to allow, and it is believed that he will pay the men on or before the time set in order to retain the receivership.

The Herald has been accused of doing Judge Pipes an injustice in its account of the case in this case, but this is a mistake. Nothing more has been said in these columns in this connection than is the duty of a public journal to say, nor any more than justice demands. The attorneys who went from the city to Corvallis Monday expected the former order of the court for the receiver to pay the men on or before Sept. 14 or to appear and show cause etc, would be executed, and the case called that day. The time for payment, on default of payment, appearance to show cause etc, was set for Monday, and the attorneys and employees were at the court house awaiting Judge Pipes' presence to open court, but he was like the ship that never came, and did not appear in the court room until the next day.

The Herald has no apology to offer for its criticisms on Judge Pipes' conduct. He has postponed and delayed the suit of the men in payment when no one but him, set mightily, could offer any reason for it. The attorneys for the employees argued that the order issued Tuesday should be made to take effect immediately, the court, however, extended the time until Oct. 23, a delay which, in the light of the long period the men have been waiting for their pay, was not as speedy redress as they expected to receive at the hands of the court.

If no further delay is indulged in by the court, and his honor does not weaken in the execution of the order already made, the men will doubtless receive on or before Oct. 20 the money they ought to have had a long time ago.

The Oregon Pacific has been earning a neat little fortune yearly, and above the legitimate running expenses, and there is no excuse for the proper portion of these earnings not to have been paid to the employees.

SHOULD BE PROSECUTED.

Indians Are Wantonly Slaughtering Deer in the Vicinity of Upper Soda.

Mr. J. J. Dubrille, who has returned from a month's stay at Upper Soda brings some additional particulars of the wanton slaughter of deer by Indians in that locality. He says that about 100 Indian bucks; who came across from the Warm Springs, are hunting while their squaws earn a few dollars picking hops in the valley. The Indians claim that the sheep men have turned their flocks to graze upon the mountains, destroying their blackberry patches, and they have vowed to seek revenge by killing off the deer.

These Indians station themselves along the trails where the deer come down and slaughter them. Mr. Dubrille saw five Indians with five ponies, all loaded with deer skins, many of them, even. They leave the carcasses of many fine fat deer, taking nothing but the hides. It is believed at Upper Soda that these Indians have killed this fall not less than 1000 deer in this wanton manner. They certainly ought to be prosecuted. Many of them are still hunting in that vicinity.

The timber destroyed there in the past would bring millions of money, and it is to be hoped that such destruction will cease.

DULUTERATIONS IN FOOD

Many States have stringent laws against food adulteration, but they fail to check the evil. It is on the Dairy Commission's report of the New Jersey shows that 43.96 per cent., or nearly half the food preparations submitted to him for examination were adulterated. Some times the adulterations were harmless and in these cases the purchaser would be only swindled, but in many instances rank poisons were found in articles of every day consumption. A large percentage of canned vegetables, such as peas and string beans, were found to contain copperas, used to give a green color, and a number of baking powders had been "doctored" with ammonia to give an artificial leavening strength and to permit of carrying more waste matter. In these cases there is not only food poisoning, but a public health.

NEW TO-DAY.

QUARTER OF A CENTURY AGO.

These are the words of a man who has since been a citizen of New York City. This man is no other than Mr. John Stewart, one of the wealthiest and most influential citizens in the country. In a recent letter he says: "I had been suffering from pain in my back and general kidney complaint for some time, and had used many remedies without any but temporary relief. The pain in my back had become so severe that I was prevented from attending to my work and could not go without the use of a cane. Hearing through a friend, of the wonderful cures of foot by Oregon Kidney Tea, I was induced to try it, and from that very first dose I found instant relief, and before a week had passed the contents of the box were in my back and the pain disappeared. I have every faith in the virtues of the Oregon Kidney Tea, and can conscientiously recommend it to my friends. I would not be without it for anything."
