#### the ruin of the State. TENNYSON'S "IN MEMORIAN."

At the age of 40 a man, blessed with a sound mind in a sound body, should reach the maturity of his intellectual power. At such a period in the year of 1850, Tennyson produced "In Momorian," his most characteristic and significant work: not so ambitious as his epic of King Authur, but more distinctly a poem of this century, and displaying the author's genius in a subjective form. In it are concentrated his wisest reflections upon life, death, and im- and natural explanation of Tilton's mortality, the worlds within and charges, and the statement will clear without, while the whole song is so away the clouds that have been dark largely uttered, and so prevaded and thick about his name. ## Beccher, Tilton, and Mrs. Tilton-How They Look

Strange as it may seem, none the three persons most prominent in this unhappy business are well known by sight to the people who live in the same city with them, outside of their individual circle of influence and acquaintance. Mr Beecher is seldom to be seen in the streets. During several years residence in Brooklyn I can recall meeting him but twice. He still retains his vigorous, sturdy appearance, though he has aged considerably of late years. He walks firmly, and with leonine tread, looking neither to the right nor left, and he has every appearance of a man of power and self-possession. Tilton is frequently to be seen on the ferry-boats, or wending his way between his home publicans elected in the Presidential man, whom most persons will turn ture, which was used in returning deal of Charles Sumner.
