FOREST GROVE, October 15 1874.

## LOCAL NEWS.

SUNDAY EXERCISES.—Last Sunday in the forenoon at the Congregational church Prof. Lyman preached a sermon on the responsibility of men toward each other. He took strong ground in favor of temperance, unequivocally declaring for prohibitory laws and sustaining his views by incontrovertible arguments.

In the evening President Marsh delivered a sermon on the relations of science and the Bible, more especially harmonizing science with revelation, taking the first chapter of Genesis for illustration and comparing it with the scientific theory of celestial and terrestrial cosmogony. The sermon was a brilliant and forcible vindication of the Biblical element of the formation of the universe and was listened to attentively by a large and intelligent audience.

We would like to present an abstract of both these excellent sermons to our readers but our want of space forbids.

The Forest Grove Debating Club reorganized last Tuesday by electing Mr. Hubbard President *pro tem* and Logan Johnson Secretary. The meetings will occur regularly, as usual, on Monday evening of each week at the M. E. Church. The question selected for debate next Monday evening is, "Resolved, That the Usury law should be repealed."

GAYWAMS, ARIZONA.—There will be a meeting of Forest Grove Grange Saturday of next week, Oct. 24th, to decide whether or not the Grange shall build a warehouse at Cornelius. This is an important project for the farmers and it is to be hoped that a full attendance will be had at that time.

W. Kyse has built a new fence fronting his house, conforming it to the new survey, which leaves several rows of fruit trees on the outside. Said trees are now public property. The fruit is good and Kane says pitch in—if you think there is no lightning around there.

The Improved Howe Machine still Troubles.—Everybody likes it, forsooth, the expectations of the people of Washington county are won't let us go straying in swaying upon the various articles exhibited, for understanding its construction in the nests of the engine, etc., etc., taken and it all seems to be just fit to find something at least that has no superior. Satisfying themselves that it is a machine adapted for a general family work now shown by its simple all seeming to be then fitted to Howe agents that they had brought about competition that has satisfied the families at large that the Howe Machine is still ahead and the Pioneer of all.

We would suggest that it is well to the appearance of the College Campus to burn the heaps of straw that lie on it now. Pretty soon it will get so wet that burning will be impossible.
