THURSDAY............JAN. 5, 1888

We've Company at the Farm.

We're livin' on the toppest shelf,
We've everything from goose to grouse;
I hain't been licked for 'most a week,
'Cause we've got comp'ny 't our house.

When we're alone my ma is strict,
An' makes me keep as still 's a mouse,
But now I make a heap o' noise,
'Cause we've got comp'ny 't our house.

We've peach preserves an' pumpkin pie,
An' jelly cake three times a day:
An' I'm havin' such a bully time
I wish 't our comp'ny come to stay.
—Boston Globe.

POISON IN THE ASHES

What the Mt. Lebanon Shaker Found—Incident in the History of a Quiet Community.

The Mount Lebanon (New York) Shakers are a quiet community, secluded from the fret and worry of the outside world. They are widely known, however, for their strict honor and probity in business.

The Shakers believe that nature has a remedy for every disease. A few have been found—the rest are as yet unknown. Many were discovered by accident. Others came to light as the result of patient experiment and research.

Nervous Dyspepsia is a comparatively *new* disease, growing out of the conditions of modern life. It is a joint affection of the digestive organs and of the nervous system. These two were formerly treated as separate ailments, and it was left for the clear-sighted Shakers to prove that the basis of this terrible and often fatal complication lies chiefly in the disordered and depraved functions of digestion and nutrition. They reasoned thus:—"If we can induce the stomach to do its work, and stimulate the excretive organs to drive out of the body the poisonous waste matters which remain after the life-giving elements of the food have been absorbed, we shall have conquered Nervous Dyspepsia and Nervous Exhaustion." And they were right. Knowing the infallible power of Shaker Extract (Seigel's Syrup) in less complicated though similar diseases, they resolved to test it fully in this. To have no ground for doubt they prescribed the remedy in hundreds of cases which had been pronounced incurable—with perfect success in every instance where their directions as to living and diet were scrupulously followed. Nervous Dyspepsia and Exhaustion is a peculiarly American disease. To a greater or less extent half the people of this country suffer from it—both sexes and all ages. In no country in the world are there so many insane asylums filled to overflowing, all resulting from this alarming disease. Its leading symptoms are these: Frequent or continual headache; a dull pain at the base of the brain; bad breath; nauseous eructations; the rising of sour and pungent fluids to the throat; a sense of oppression and faintness at the pit of the stomach; flatulence; wakefulness and loss of sleep; disgust with food even when weak from the need of it; sticky or slimy matter on the teeth or in the mouth, especially on rising in the morning; furred and coated tongue; dull eyes; cold hands and feet; constipation; dry or rough skin; inability to fix the mind on any labor calling for continuous attention; and oppressive and sad forebodings and fears.

All this terrible group Shaker Extract (Seigel's Syrup) removes by its positive, powerful, direct yet painless and gentle action upon the functions of digestion and assimilation. Those elements of the food that build up and strengthen the system are sent upon their mission, while all waste matters (the ashes of life's fire) which unremoved, poison and kill, are expelled from the body through the bowels, kidneys and skin. The weak and prostrated nerves are quieted, toned and fed by the purified blood. As the result, health, with its enjoyments, blessings and power, returns to the sufferer who had, perhaps, abandoned all hope of ever seeing another well day.

Lord Salisbury recently sold his property between the Thames embankment and the Strand for £1,000,000. By the increase in the value of house property in London he is now one of the richest men in England.

Cattle are reported poorer and grass shorter this year in Harney valley than was ever known before.

GENERAL NEWS.

New York World: A great many people would like it better if Christmas and New Year's did not come on Sunday this year. And the fact is that if the calendar makers did their duty the year would begin on Monday instead of Sunday. The calendar is twenty-four hours ahead of time. After allowing for the arrangements made for leap year, the calendar gains a little on the true year every twelve months, and this gain since the date was fixed by act of parliament in 1752 amounts to about a day. This will be corrected by the operations of the Gregorian calendar, when the twenty-ninth day of February shall be dropped in the year 1900, which otherwise would be counted a leap year. There is a further discrepancy after this correction (which is in accordance with the law that no century year, e. g. 1900, of which the first two figures cannot be divided by four shall be a leap year) of one day in every 3,323 years.

Last week "Champion," one of the carrier pigeons of J. F. McMunn, of Shedd, Linn county, Oregon, who has for some time been experimenting with carrier pigeons, flew from Gervais to Shedd, a distance of fifty-five miles, in fifty-seven minutes, and the same bird has flown home from Salem, a distance of thirty-nine miles in thirty-five minutes. "Volunteer," a young bird flew from Eugene to Shedd, thirty-two miles, in thirty-five minutes. In two weeks more he will have one liberated at Portland, as it has already been liberated within twenty-five miles of that city, and the next stage will bring it there. Mr. McMunn's birds are doing splendid work and their record is not excelled anywhere, although he considers Oregon a difficult country for them to traverse. They are of the best strains obtainable in New York, Cincinnati and San Francisco.

Commencing with January, the pupils at the mute school will begin the publication of a monthly newspaper, to be devoted to the interest of the deaf mutes of the northwest in general and of Oregon in particular. The material for the new paper is already on hand, and ready for use. It consists of several fonts of long primer and advertising type, stones, chases, and all other apparatus of a printing office, except a press. The sheet will be four pages, 8x12, and 1,000 copies will be issued. Every part of the work will be done by the mutes, under the superintendency of Mr. Knight, except the press work, which will be done in town. In the course of a month or two the paper will be enlarged to eight pages, and the price will be about sixty cents per year. The name has not yet been definitely chosen. There are over forty deaf mute papers in the United States, but this will be the only one on the northwest coast.—Salem Statesman.

Iowa ranks fourth among the coal producing states. According to Saward's tables in "The Coal Trade," a standard authority, only the states of Pennsylvania, Ohio and Illinois out rank the Hawkeye state in this product. The Iowa output for 1886 was 1,000,000 tons. The highest price paid for mining per ton, is at the Brazil, Iowa, $1.00. The lowest is at Allegney, Pennsylvania—40 cents. The average is about 60 cents. Iowa mines employ 5,000 people, and to output 9,250,000 bushels Illinois employs 25,800.

The cost of the Alaska territorial government this year will be $22,500; for the government of Arizona, $38,650 will be paid; for Dakota, $77,860; for Idaho, $40,755; for Montana, $42,448; for New Mexico, $48,300; for Utah, $80,900; for Washington Territory, $17,500, and Wyoming, $16,900. It is a big lot of government for a little lot of money. The territories are profitable property and are not for sale.

Mr Joseph Pulitzer, editor of the New York World, and one of the most able newspaper men of the nation, is in great danger of total blindness. He has been confined to the dark room for several weeks.

How's Your Liver?

Is the Oriental salutation, knowing that good health cannot exist without a healthy Liver. When the Liver is torpid the Bowels are sluggish and constipated, the food lies in the stomach undigested, poisoning the blood; frequent headache ensues; a feeling of lassitude, despondency and nervousness indicate how the whole system is deranged. Simmons Liver Regulator has been the means of restoring more people to health and happiness by giving them a healthy Liver than any agency known on earth. It acts with extraordinary power and efficacy.

NEVER BEEN DISAPPOINTED.

As a general family remedy for Dyspepsia, Torpid Liver, Constipation, etc., I hardly ever use anything else, and have never been disappointed in the effect produced; it seems to be almost a perfect cure for all diseases of the Stomach and Bowels.
W. J. McElroy, Macon, Ga.

HOW BEN BUTLER GOT RICH.

Young Men of To-day May do Likewise if They Follow Advice Given.

General B. F. Butler being asked for some suggestions on gaining success, stated that when he was a young lawyer, practicing in Lowell, Mass., a bank president advised him to take his little deposit and buy real estate, from which he could be deriving some revenue. The general said that he had but little money and was uncertain as to his future.

"Never mind," said the bank president, "go to the next public auction of real estate, bid off a lot with a building of some kind on it, pay down what money you have and give your promissory notes for the balance. You will come out all right."

General Butler says this advice was good. When a man has obligated himself, by his notes, to pay money at a certain time, it inclines him to economy. He followed the advice, and in time became the owner of several parcels of valuable real estate in Lowell.

Two classes will not be likely to heed such advice—the improvident and the over-cautious. The latter will be apt to say: "It would be all right but for those dreadful promissory notes. They are always running on and if a man falls sick they do not wait for him to get well."

There is this danger, of course, but one can make no business venture without some risk, and with the knowledge acquired by recent investigations of the cause of most ordinary ailments, and the means of cure, one runs little risk from that source. It is now known that most of the common ailments have their origin in deranged kidneys. They are the chief blood purifiers of the system and when disordered a breaking down somewhere is soon inevitable, because the poison, which in their healthy condition is eliminated, is carried through the entire system.

Put them in order and health returns. C. D. Dewey, a successful man, president of the Johnston Harvester Company, Batavia, N. Y., gives his experience as follows:

In 1882 my health was failing, my head pained me constantly, my appetite was uncertain, I could not sleep soundly. I attribute this to the extreme pressure of business cares, but I grew worse, and finally was confined to my bed for two months. It seemed as though I would "never recover" my former health. Under the aid of stimulants I gradually gained strength, so that in a few months I was able to attend to business, but I could walk only with the assistance of a cane, and then in a slow and unsteady manner. I continued somewhat in the same condition until February last, when I used Warner's safe cure. It has cured me. I consider it a valuable remedy and can highly recommend it.

Young men have but to use ordinary prudence, and when any derangement occurs if they use the same means as did this successful business man, they may feel a constant assurance of their ability to carry to successful conclusion all ordinary business projects, including the care of their promissory notes when due.

Progress of Ages.

It is a remarkable fact that Sir Isaac Newton, in his work on the prophecies of Daniel and Revelations, said that, "if they were true, it would be necessary that a new mode of traveling should be invented." He said that the knowledge of mankind would be so increased before a certain date of time terminated—namely, one thousand two hundred and sixty years—that they would be able to travel at the rate of fifty miles an hour." Voltaire got hold of this, and true to the [illegible] of all ages, said: "Now look at the mighty mind of Newton, who discovered gravitation! When he became an old man and got in his dotage, he began to study a book called the Bible! and it seems in order to credit its fabulous nonsense, we must believe that the knowledge of mankind will be so increased that we will be able to travel at the rate of fifty miles an hour. The poor dotard!" The self-complacency of the philosophic infidel made his friends laugh. But if he should get into a railway train, even a skeptic of to-day would have to say: "Newton was the philosopher, Voltaire the dotard."—Christian Thought.

Some time during Saturday night some thief or thieves unknown stole from James Lettellier, living ten miles northwest of Eugene, a bay mare and a dark brown horse, both valuable animals. Officers throughout the valley have been notified to look out for the thieves.—Eugene Guard.
