### Insanity Cured by a Surgical Operation,

Some months ago a colored man named Pyler was brought to the Central Lunatic Asylum, suffering from insanity of the most ferocioes and dangerous REAL ESTATE DEALER, character, resulting from the kick of a horse, which crushed the skull and pushed down a large piece of bone upon the brain. His condition required the severest restraint, and it was found necessary to confine him to a close cell, and to keep him in handcuffs, and even then he found opportunities to attack his attendants. Dr. Conrad, the superintendant, then called the attention of Dr. Hunter McGuire to the case, and Dr. McG., after an examination, determined to attempt the removal of the bone, which was pressing upon and into the brain. The operation was successfully performed, and a piece 21 inches long and I inch wide, was removed. This was three months ago. and though previous to the time the patient had been having constant epileptic fits, and as many as three or four per day, he wholly recovered from them. There is now no insanity and though the mind is considerably enfee bled its powers are fast returning. The wound caused by the surgical operation has healed up, and the man is walking about without restraint, and promises to get well -Richmond Enquirer.
