A firm combination and co-operative movement are the the only things that will bring about these much desired ends. It was the valor and patriotism only, will secure to our descendants of the people that fought the war; those great blessings which our fathers their conscience and sense of right established reconstruction. The people have risen to the height of every emergency. They lave tested every suggestion by the principal of individual freedom and national union, the center and circumference of Republican doetrine, and they have laid the foundations of future policy so broad and strong, that even its enemies admit the work is impregnable."

That was a beautiful idea expressed by a Christian lady on her death-bed. in reply to a remark of her brother, of swindling and robbery made by the who was taking leave of her to return New York Times against the Tammany | to his distant residence, that he should probably never meet her in the land of the living.
