THE REASON WHY,

Why we run for County Judge is, lw cause we think it lest for ourselves an the people of the County. When the Muckles came here they thought of being Democrats verause James Dart way, but their father came fro a Jan da so m and he told them they must be Republicans. They couldn't tell the difference between a Republican and a Democrat, Lincoln, and Janes A. Garfield were and probably cannot now.

This makes us think of a circumstance in the early history of Balti.nore; the sou of a man by the name of Holfman was elected to the Com non Council of the City. He was very ignorant, and kn w only the meaning of the commonest words. A motion came up in the council to have a founta n in the center of the city park. He made a grab for his hat, rushed from his council-chamber, but soon returned breathiess, and sung cannon. Their cause, like the cause of

The Real Relation Between the Human Body and the Weather Scientifically Explained.

Scientific Amorican.

One of the most valuable develop ments of mod rn science along the line of human necessity is the National Weather Bureau at Washington. Experience has shown that eighty-six percont. of the predictions of the signal se. . vice are accurate ; and these predictions vantage to the seaman the agriculturist and the entire commercial world. The service has troven its necessity by its usefulness, for in past times the facilities for for telling atmospheric changes were mag rea in lead. The only indications our fathers had of coming changes in the wather were aching limbs, twinging joints or nainful corns. provement in the penmanship of the in- These " indications " though crude, were usually correct, and hence naturally suggest the inqury as to the relation between the human system and the weather. The body is unquestionably an excellent baro noter. It for tells changes in the at noschere long before they occur, and this fact has been tak in advantage of by physicians who, when all

other agencies fail, prescribe a change of air, thus ho sing the body may find an its needs. And yet the real relation between the human body and the weather has never been fully understood por has ther ever been, nutil now, a currect explanation or whet rhen natism (which seems in league with the atmospher.). is such was treated in the most trange, not to say, ridiculous manner. The theory of the destors as aimva explained finds its confirmation in the fact that when the kidneys have been cured, rheumatism is completely romoved. This is not, of course, always accomplished justantly, for in a disease, so subtle, the cure is often very slow, but under no other plan, can any hops of permanent relief ever be found, There are hundreds of cases on record during the present Winter of persons afflicted with rheumatic troubles of the warst ard r way have been entirely cured by folloving the theory above s sted and using the remedy mentioned. Many of these persons had the very worst possible symptoms. Vague aches in different portions of the body were followed by agonies the most intense in some particular spot. Acute and throbbing pains succeeded each other and the counting prisonous acid inflamed all the venus. Troubles that began with slight disord re increased to derangements the most serious. It is sad to think that all this suff ring was endured when it could have loon so easily relieved. Soon after they came here the idea got into their heads to run the County, so as to corral every dollar in every way and shape. You will notice Cox, Mackle clerk, is nominated for Treasurer on the Republican ticket, and Watkins, a Muckle clork, on the Democratic tocket so whichever party wins, the Muckle rake in the pot. Emerson, the Democratic can lidate for County Judge, is a man against whon nothing can be said, only that he is almost entirely dependent on the Muckles for a living; but this cannot be said of Major Adams, he is entirely antagonistic, and makes common cause with the prople of small means.
