It does not appear to be generally known to everybody that many women against his will are working in factories, and as well as in the offices of industrial concerns, all over the country. For example, a number of women have been employed by the United States Government to work in connection with the census of manufactures and to tabulate returns of various kinds. But the fact is that these women are not employed because they want to work for that particular kind of work, but because they have no other means of support. They are driven into it by circumstances, and this is the case with many others who are working in factories and offices.

The following are some of the facts which illustrate this point.

From what has been said, it is clear that the women who are working in factories and offices are not working for their own good, but for the good of others. They are working because they have no other means of support, and they are working without any wages.
