MIDDLE-AGED MEN.

There are many at the age of 30 to 60 who are troubled with too frequent evacuations of the ladder, often accompanied by a slight smarting or burning sensation and a weakening of the system in a manner the patient cannot account for. On examining the urinary deposits a ropy sediment will often be found, and sometimes small particles of allumen will appear, or the color will be of a thin, whitish hue, again changing to a dark and torpid appearance. There are many men who die of this difficulty, ignorant of the cause, which is the second stage of seminal weakness. DR. SPINNEY will Guarantee a Perfect Cure in such cases, and a healthy restorration of the genitourinary organs. Those who cannot consult him personally may, by descriing their symtoms, receive
