given expositions of a more or less local nature. Such were those that had been held in Russia, Denmark, and Aushad been held in Belgium.

In the British dominions expositions had been held both in Manchester and Leeds, and one in Dublin as early as 1827. It remained for England to promote the first actual international industrial exposition-that of 1851, At

the first meeting of the commissioners it was decided to rely woolly upon voluntary contributions, and when an appeal was made a fund of \$1,500,000 was soon raised. One single contributor headed the list with the large amount of \$250,000. Designs for the building were submitted by architects of all nations. A plan suggested by Sir Joseph Paxton was the one chosen, but to Mr. Fox, of the firm of Fox &Henderson, is due the credit of having originated that new style of architecture which was afterward dubbed the "Ferro Vitreous" style, he having worked out and made possible Sir Joseph's suggestion. Thus originated the first
