## NEWS OF THE

EXTENSIVE ORE BODY.

Be Worked ugain. Wallace, Idaho, August 27 .- The have a continuous lead of over two ducer is assured. stic development upon it.

sible that a break would occur in the mountain ore. mineral lead on which the claims are A telluride proposition is being Frisco and the Morning mines have foot vein. opened. The Flynn group has two miles of this same lead, between these of Atlin lake is a very extensive body. ore bodies in the Northwest.

property in the year since the claims have been located, but being a deepmine proposition, the owners have been unable to develop it into a producer. Last year a tunnel was run to tap the lead below the monster iron capping of the summit. This iron knoll is an elevation of fully 5,000 feet and covers an era almost as large as Wallace. Altogether over 6,000 feet of tunnel has been run on the various claims, and the mineralization has been good in all of it. None of this tunnel worked was sufficiently extensive, however, to explore the ore bodies. On the Iron-Silver claim the lead was tapped with a tunnel of 404 feet. The face of the a greater part of the distance. From the point where the tunnel cut the lead a drift of 110 feet was run, all showabout 30 feet wide, and the walls are in place and solid.

A tunnel from the Canyon creek side in the vicinity of the Frisco would cut very rich. the lead on the Flynn group at a depth of nearly 3,000 feet, and it has long been contended by practical mining men that this is the most advantageous point from which to open up the prop-

LOOKING FOR IDAHO COAL. Would be a Big Thing for the Railroads and for Lewiston.

The discovery of immense coal debelieved, have great influence in the future railroad construction in that section. The deposits are located about 13 miles from the mouth of the Grand Ronde river, and if the results of development meet the elaborate indications, they promise to exert a material the Snake river country, says the Lewiston Tribune. The O. R. & N. Co., it is said, is anxiously investigating coal prosprects in the basins of the Cocase the discovery of a good quality in sufficient quantity on the Grand Ronde would be a most welcome development to that road.

OREGON COAL FIELDS. The Geological Survey Publishes a Late

Report on Them. Washington, August 27.—The coal fields of Oregon are thus summarized by the latest report of the geological

survey: The coal fields of Oregon, so far as vet known, all lie west of the Cascade range and north of Rozue river. Most of them are among the mountains generally known in Oregon as the Coast range, but others occur at the western foot of the Cascade range. Four fields will be noticed-the upper Nehalem coal field, in Columbia county; the lower Nehalem coal fields, in Clatsop county; the Yaquina coal fields, in Lincoln county and the Coos Bay coal fields, in Coos county. Traces of coal have been fond in many other parts of the state. The greatest hindrance to the development of the Oregon coal fields is the lack of transportation.

Work Progressing on the Kimberley. The tunnel on the Kimberley, in the Kamloops, B. C., district, is in 327 feet. Last week a vein was struck on the top of the tunnel, at a pitch of 45 degrees. Bunches of very good ore have been encountered, of chalcopyrites and black oxides. The present vein matter is very much decomposed, but so far considerably exceeds in value anything hitherto taken from the tunnel. This finishes the contract for the 100 feet of driving. Work is still in progress, and will be prosecuted steadily.

Road to Blue River Mines. Crews of men and teams have gone to the mountains.

Copper in Union County. The copper fields in the eastern part

become valuable property. Property being worked by the North American Mining Company shows ore bearing gray copper in good quantities. Reports say that a great body of copper ore exists in this section.

Thirty Thousand a Month. The Greenback mine, in Josephine county, Oregon, pays its owners \$30,-003 a month in dividends.

Good Idaho Mine Being Developed. The Kondike mine, in the Pierce City di rict, Idaho is being developed by tennels, and about 20,000 tons of ore have been blocked out. It will assay about \$8 per ton. Fifteen men are working on the new site for the mill which will be put up at once. This mine is owned by the Oro Fino Mining

Coal and Petroleum. Several Astoria men have formed a that place. Petroleum is also expect-

ed to develop on this property.

QUARTZ IN ALASKA.

Flynn Group of Claims Near Wallace to Atlin District Claims Lots of the Free-

Milling Variety. Seattle, August 27.-H. C. Diers, of Flynn group of claims are to be worked Skagway, says that an average of 20 at once. The Flynn group consists of filings on quartz are made in the Atlin 22 claims, located in 1887 by the Flynn recorder's office daily. The general brothers. The claims are all on the big successe in placer mining and quartz lead, which is clearly defined from the locations in the camp this season, the Helena-Frisco mine on the Canyon feeling prevails in Atlin that the future creek side to the Morning mine, and of the district as a good permanent pro-

miles in length. Fourteen of the Monroe mountain is producing rich claims have been patented for several free milling quartz, now being worked years and the other eight are to be pat- at Atlin. The mountain is eight miles ented this fall, and after the survey has from Atlin, and not far from discovery been made Montana parties of unlimited on Pine creek. The quartz is being capital will take the entire property on taken to the stamp mills of Lord Hama bond and at once commence system- ilton and crushed. It yields from \$20 to \$90 a ton. The Anaconda property In the minds of mining men there is not now being worked, and the mills has never existed much doubt as to the which were set up there are engaged in Flynn group. Gold-Studded Rock Obtained in Gold Basin Ledge.

Seattle, August 27 -Good tidings of the rapid advance of mining operations in the Mount Baker gold fields were taken to Whatcom by H. G. Anderson, who arrived from Red Mountain, via Chilliwack and Vancouver, B. C. Mr. Anderson was one of the discoverers of

the Anderson-Schrimsher gold ledge on Red mountain. In the Blade he says the prospects of the leading ledges in that district are most encouraging, and tunnel was quite freely mineralized for owners are pushing development work rapidly. Work on the Post-Lambert ledges has been suspended for a few days, awaiting the arrival of engines ing considerable ore. The ledge is and fans with which to drive away the smoke which arises from constant blasting in the tunnel. All miners who have visited the property say that it is

The Gold Basin ledge on Red mountain, in which Charles D. Lane, of San Francisco, and J. O. Carlisle are interested, is said to be a veritable bonanza to the owners. Mr. Anderson met Mr. Carlisle at Chilliwack and that gentleman told him that assays made from ore taken from the Gold Basin ledge run as high as \$30,000 per ton. The gold can be seen with the naked eye and stands out in beads on the quartz. It is similar to the quartz found in the posits near Lewiston Idaho, will it is Lone Jack ledge, owned by English &

It appears that the location of the international boundary line is in question, and fears are entertained that Red mountain and other mountains in that vicinity may possibly be in British Columbia. According to field notes influence on the railroad situation in of Provincial Surveyor Dean, the line is supposed to cross at Box canyon at the confluence of East and West Silicia creeks. Owners of claims at Red mountain have taken out mining lumbia and Snake rivers with the hope licenses in British Columbia and are of providing and adequate supply of also making filings at New Westmin-coal for its system and if such is the ster in order to hold their claims in case they find that their claims lie in

British Columbia.

ENOUGH ORE FOR TEN YEARS.

The Monto Cristo Company Will Soon

Employ More Men. Monte Cristo, Wash., August 27 .-The Monte Critso Mining Company has about 60 men on the pay roll. The concentrator is using only one side of the mill, handling 70 tons every 24 hours. Some repairs are being made and when done the mill will run its full capacity of 300 tons per day. The dynamo will start up in a few days, then the Burleigh dfills will be at work. As soon as a raise is finished, so there will be more air and room, the force will be increased to 200 or 250 men. It is claimed that the Monte Crinsto Mining Company has enough ore in sight to keep the mines working for 10 years. A surveying party is at work on a line to bring more water to the mill.

Dividend-Paying Mines.

The following is a partial list of the dividend-paying mines of British Columbia: Camp McKinley paid up to June, 1899, \$312,964; the Fern, up to June, 1898, \$10,000; the Hall Mines Limited, up to May, 1899, \$120,000; the Idaho, up to January, 1899, \$292, 000; the Last Chance, up to April, 1899, \$45,000; the Le Roi, up to November, 1899, \$1,805,000; the Queen Bess, up to July, 1899, \$25,000; the Crews of men and teams have gone Rambler-Cariboo, up to December, from Brownsville, Oregon, to build the 1890, \$60,000; the Reco, up to Januwagon road from that place to the ary, 1898, \$297,500, the War Eagle Blue river mines. Relays of men will Consolidated, up to February, 1900, be at work until the road is completed \$545,250; the Ymir, up to November, 1899, \$30,000.

Rushing to Dawson, Navigation on the Yukon river closes of Union county, Oregon, are likely to early in October and there is a rush of treight to the Dawson country.

> Quartz Strike Near Detroit. Four quartz claims have been located near Detroit, Oregon, during the week, and the hills are being hunted for loca tions.

Oldest Miner. Douglas county, Oregon, claims the oldest miner, William Kerr, who is 99 and works every day.

Klondike Gold. The yield of gold in the Klondike country this year is estimated at \$16,-

Gold Output This Year. Director of the Mint George E. Roberts, estimates the world's gold output this year at \$300,000,000.

Permanent Gold Veins, Mining experts said in the Portland syndicate to develop coal lands near Telegram, August 22, that they be- 2.50 lieved the gold veins in Eastern Oregon are permanent and of good depth.

NO BACKWARD MOVEMENT.

The Trade Situation Satisfactory, Con R. G. Dun & Co.'s weekly review of

trade says: The sky is not cloudless; but there has been no backward movement of business this week. The chief drawback of the week has been the intense heat in some sections of the West, which was more efficient in retarding business than the lower temperature East, which is stimulating it.

Crop advices continue as cheerful as it any time lately, and the labor situation shows no important changes in vorking forces.

Prices are steady, but there is talk of a decline, perhaps \$10 per ton, in willing to place orders for the ensuing vears' supplies. More good news comes rom the great iron centers, where bridge and boatbuilders and makers of agricultural implements, stoves and cast iron pipe are all eager to secure finished or partially finished material. Prices are sustained, and in a few cases move upward. Iron, generally, is already a solid and better balanced market than for two months past.

Wheat declined still further, touch ing the lowest price since early in

Corn is steady, but a drop last week

above that of 1899. Factories are still working only part tricts, and it is evident that eariler estimates of accumulated stocks were much to small.

There is more activity in the hide corable purchases of harness.

FAMOUS ACTRESS STRICKEN.

Mme. Janauschek, the Tragedienne Ill with Paralysis. Mme. Fanny Janauschek, the famous tragedienne, was recently stricken with paralysis. Mme. Janauschek was born in Prague, Bohemia, and at the age of 18 was a favorite on the European stage. She made her first appearance in this country in 1867 and for four years acted in German. Then she mastered the English language and turned her attention to Shakespearean tragedy, when her real career in this country began. In 1874 she revisited Germany, but returned to this country in 1880 and has since remained here. When not on her professional tours she lives at 717 Jefferson avenue, Brooklyn. As an actress she is noted for her great power and fascinating personality. She has been successful in many roles and her Lady

Macbeth and Meg Merrilles are considered among the best characterizations ever presented on the American stage.

Though during her long stage career Madame Janauschek has been in recelpt of a bandsome salary, she is today dependent upon the actors' fund for sustenance.

The Terror of Hyderabad. It is on record that no fewer than wenty-three persons were killed by a man-eating panther in the Ellichpore district, Hyderabad, during the past twelve months, says the Morning Post of Delhi. The brute remains at large, despite the reward of 300 rupees offered for his capture.

Too Much of a Talker for Him. A young man in Pennsylvania broke his engagement with a girl because on her graduation she took the oratorical prize.

It happens often these days that Aunt Maria has to remember that Marie was named for her, and that Aunt Martha has a namesake in MarSOLDIER'S LIFE EASIER.

Protection, Weapons and Food Much Improved of Late Years. Although soldiering would seem to be more perilous business than it ever was before, in consequence of the greater force, rapidity and range of weapons, and the higher power of explosives, the result may show that modern battles are not more deadly than were those of the Civil War, since an attempt has been made to counteract the destructive forces by stouter protections in forts and by a system of tactics that replaces the old solid formations with something like the skirmish order of former times. It may be, also, that the troops will fight at further distance, allowing for the longer carriage of bullets and shells.

But of one thing we are certain. If the perils of war have been multiplied the comforts of the camp have been increased until they are a partial offset. Clothing is stouter, if the millers choose to make it so; camp outfits include cooking apparatus that can be carried on the back of one man; the canning of meats, vegetables and fruits, the desiccation of other articles of food, and the general cheapening of many things that were luxurles a few years ago make it possible to live in camp almost as in a hotel. The substitution of aluminum for iron in utensils is another advantto both lightness of outfit and extension

5:30. "Well, I'll be at the station at 6:30," "6:30?" "Yes; Dorothy is always an hour late whatever she does."-Life.

Oh, the Flatterer! A Somerville young man is getting to be very popular with the young ladres. When he meets one he says at the first

opportunity: "Oh, by the way, I've got a pretty picture here that I want to show you." Then he takes a little round mirror out of his pocket and holds it up for

her to look in it.-Somerville Journal. Came, Saw, and Was Conquered.

A Scotch farmer, celebrated in his neighborhood for his immense strength and skill in athletic exercises, very frequently had the pleasure of contending with people who came to try their strength against his. Lord D., a great pugllistic amateur, went from London on purpose to fight the athletic Scot. The latter was working in an inclosure at a little distance from his home when the noble lord arrived. His lordship tied his horse to a tree and addressed the farmer.

"Friend, I have heard marvelous reports of your skill, and have come a long way to see which of us two is the better wrestler."

The Scotchman, without answering, seized the nobleman, pitched him over the hedge, and then set about working again. When Lord D. got up: "Well," said the farmer, "have you

anything to say to me?" "No," replied his lordship, "but perhaps you'd be good enough to throw me my horse!"-Golden Penny.

Some people use religion as a cloak and some use it as an umbrella.
