He likes to be helpful to newspaper correspondents, and receives them freely in his office and gives them such information and hints as the proprieties will permit. Even the representatives of the sensational or yellow papers are treated with courtesy, though naturally with due caution. Imagine the Secretary's surprise one afternoon during the heat of the Chinese crisis (says Walter Well-When you take Grove's Tasteless Chill man), when he was up to fils ears in work and anxiety, to hear from the lips of William, his faithful messenger, these words: "Mr. Secretary, the New York ---- wants you to step to the telephone." Mr. Hay gasped, caught his tongue in the nick of time, recovered his diplomatic urbanity, and replied: "Say that the Secretary expresses deep regret that just at this moment he is very much engrossed in important work. Unfortunately what he said under his breath could not, under the rules of the telephone exchange, be sent over the

wires. Theking of Naples, in the plenitude of his absolutism, paid one day a visit to the Neapolitan prisons, in order to see for himself what sort of men his criminals were, and whether they really deserved the punishments they were undergoing. "What is your sentence?" he said to one. "Fifteen years, your Majesty." "And what had you done?" 'Nothing whatever." "Quite innocent?" "Entirely so, your Majesty." "And you?" he asked another. "Thirty years sire. Victim of a false accusation.' "And you?" to a third. "In for life, my King." "And what had you done?" "Everything you can think of, my King: theft, burglary, highway robbery, manslaughter, murder. I only had. Today all first-class places have wonder they did not sentence me to the King. "My name," replied the firstclass criminal, "since I have been here has been 912." After finishing his tour of inspection, the King said to the Govone bad man among them-No. 912. You had better let him out, lest he cor-

Several years ago, while a midshipman in the British navy, he made a brief stop at Vancouver's Island, and was entertained at a ball given by the Governor. He was very much struck by the appearance of a girl who seemed to be the belle of the assemblage when he entered the room, and learned by inquiry that she was the daughter of the Governor, whose wife was a full-blooded Indian. The prince asked the honor of a dance; but the girl, having been educated at a finishing school in Portland, Ore., held her head very high, and, not knowing the prince's social station, responded that the Governor's daughter was entitled to dance with officers of higher rank than midshipmen. The prince took the rebuff good-naturedly. His time for revenge came when one of the Governor's suite, not knowing of what had happened, begged his royal highness' permission to present the Governor's daughter as a partner for the next waltz. The Prince politely declined, remarking that "his mother would be deeply mortified to hear that he had danced with a squaw."

INDIANS SET THE LESSON.

North American Aborigines Taught Other Peoples How to Fight. Anybody who knows anything at all about modern fighting knows that the North American Indian is the man who sets the pace. First the American frontlersmen studied his ways and adopted his tactics and the soldiers took it up. Baden Powell, so the plucky little South African general confesses, first read about American scouts and then took lessons from their teachers, the Indians themselves. But now there is a slip in the chain and France is studying the Indian without going to the trouble of first ascertaining what the best scout in the world, the American soldier, thinks about it. France is trying the "flexicon march."

"Never get the leg straight," are the French instructions. "Keep the back straight, but bent forward. Do not throw the shoulders either back or up." That is about the way an Indian walks, so Captain Uline of the Twen- ter make a livin' fer me; en I wants tieth Infantry confesses, but, he goes on, he never heard of the trick being

tried by military. "I cannot discuss the merits of the 'flexicon,' " the captain said, "because I am not familiar with it. From the description it is just about the way the Indian walks. His knee is never locked' or thrust back, so as to have the leg quite straight. The Indian rever uses the heel to the exclusion of No man ever flatters the woman he the ball of the foot, but puts the sole truly loves.

vhere, even about their camp. "The flexicon movement the French experimentalists are said to be tinkering with and copying from our Indians is about the movement a soldier gets when he is fatigued. I am not prepared to criticise it."

An English army officer, a subaltern, here with the horse buyers, said concerning the new movement:

"The French are the greatest bunglers in the world. They get the wildest no tions, 'fads' I ought to call them, In their pates. I remember once they decided to dress every man in Madagascar in red flannel underclothing. Every man in the place got skin disease. Then they went in for natural wool and the men got worse. They admitted red irritated the skin and then found that natural wool, being already charged with oil, could take no more, so was worthless for absorbing perspiration. Now they are fiddling with the flexicon movement, evidently trying to step ahead of the United States in following the Indian, and overlooking the work the Indian does when he goes ou what we call his 'dog trot,' scouting, they propose to imitate his walk.

"It is my observation that a soldier requires this flexicon movement after he has gone about four miles loaded down with his equipment. The French may teach him to always walk tired to death, but I do not think we shall ever see the British or these American soldiers at it.

KILL THE GERMS!

Spread of Germs Through the Hum System Instantly Checked by "5 DROPS."

Co., San Francisco, Cal.

"5 DROPS."

"5 DROPS." is a germ killer; a preventive of disease; a builder of nerve force; a maker of pure blood; of healthy tissue. Where it is used there can be no disease. It is a natural foe to germ life. Left to themselves, without adequate measures of prevention, the germs which enter the weak human system multiply so rapidly that their numbers become beyond human comprehension, destroying the structures of the body until death comes to the victim's relief. "5 DROPS," if taken in time, is an absolute preventive of disease. It is the only absolute cure for Rheumatism, driving out of the system forever the uric acid and other impurities which cause it in its various forms. It is taken up at once by the blood. Hence its Work is quicker, surer and many times more effective. You should never be without it. Secure a bottle today. You will then be on the safe side. "5 Drops" is harmless and can be used by a child as well as by an adult. It is used with unfailing effect in the following diseases: Rheu natism, Sciatica, Backache, Neuralgia, Gout, Dyspepsia, Asthma, Hay Fever, Catarch, Croup, La Grippe, Liver and Kidney Troubles, Sleeplessness, Nervousness, Ne

I WAS AT DEATH'S DOOR.

Gentlemen: I want to tell you what your "5 Drops" has done for me. I was for two years a sufferer of untoid misery. My feet were swollen so I could not wear shoes and my hands were drawn so I could not open them, nor could I shut them. They cramped half shut. My husband had me try every medicine he could hear of and I still suffered untoid agonies. Nothing I could get would ease my pain, until last November one of my neighbors had Rheumatism so bad he could not walk. He told my husband about "5 Drops" curing him, so he got me a dollar bottle, and in three weeks I walked without a cane and could use my hands, something I had not done for two years. I give all the praise to "5 Drops." My neighbors know that I was at death's door. Now I have used four bottles of "5 Drops." and can do my work with ease. I am still taking it sometimes. If this will do any good toward getting suffering people to use "5 Drops," use this as you please. If any one doubts this, send them to my friends and neighbors. ELISABETH C.
