New Idea Patterns,

HE LOVES AMERICA.

J. E. Halliday May Return to Corvallis. He has sold the furnishings of his mansion in England.

Who, among Corvallisites of any length of residence, does not remember J. E. Halliday, the peculiar little English gentleman, who for many years made this city his home. If there be any such, they as well as later comers, may soon have the opportunity of making his acquaintance, for Mr. Halliday has all the symptoms which indicate his early return to this city.

During his residence here Mr. Halliday made many fast friends, for despite his eccentric manner and odd ways, he was a good friend and conscientious citizen. In the early eighties he was called to England by the death of his father, who bequeathed his mansion and other valuable property at Warminster to his son in Corvallis. After a year's absence in England, Mr. Halliday again visited this city, returning to Warminster in 1885 or 1886.

Some years ago, an article from the London Times, republished in this country, greatly amused former acquaintances of Mr. Halliday in this city, for it showed that change of residence and environments had not altered the eccentric character of the fussy little bachelor who had afforded material for many amusing anecdotes during his residence here.

Among the heirlooms bequeathed by the elder Halliday, was a high-backed pew in the little church at Warminster. A progressive wave struck the parishioners of Mr. Halliday's church and they decided to replace the old pews with new ones, up-to-date. But Mr. Halliday did not propose that his pew should be altered, and there it stood out like a sore finger, marring the beauty of the interior of the little chapel. "That pew must come out," declared the incensed congregation. "I'll stand you a law suit first," retorted Mr. Halliday. And a lawsuit followed which threatened to become as bitter as that celebrated one in "Bleak House." It was finally settled, however, and Mr. Halliday now reluctantly worships in a low-backed pew.

Notwithstanding his foreign birth, Mr. Halliday was at heart an ardent American, and his residence abroad has not dampened his ardor. When war was imminent between this country and Spain, Mr. Halliday was most anxious for the success of United States in the pending conflict. Writing to friends in this city he avowed his desire to become a secret service agent for the American government or to assist in any other way in his power.

A few days ago Mr. Creighton, of this city, received a letter from Mr. Halliday stating that he had sold all the furnishings of his home and intended to return to America, the land that he loved. Accompanying the letter was a catalogue "of the greater portion of the capital furnish of the residence and outdoor effects" of the Mausion Warminster, which was to be sold at auction November 8 and 9, 1900. This catalogue is 5 1/2 x 8 1/2 inches and contains 18 pages of small type enumerating the various articles to be sold.

The sub-heads cover articles in Kitchen and Offices; Hall, Stair-case and Landing; Inner Hall; Breakfast Room; Library; Dining Room; Drawing Room; Bedrooms No. 1, 2, 3 and 4; Cellars, etc. In addition to these are articles of silver, plated articles, china and glass, which would arouse the envy of a Vanderbilt; bottles, cases, casks and barrels of old wine and other choice liquors which would excite the thirst of a missionary. Plants and outdoor effects complete the list.

An Historical Relic.

George H. Himes, assistant secretary of the Oregon Historical Society, is meeting fairly good success in gathering relics that bear on the history of Oregon. The society has succeeded in collecting a vast number of interesting souvenirs of historical interest, relating to pioneer days, the Indians and their customs and traditions, the formation of territorial and state government, etc. The collection of the society is to be seen in their rooms in the city hall at Portland, and it is well worth visiting by everybody. A most cordial invitation is extended to the public. The most interesting relics acquired within the past few months are the ship chest and looking-glass of Captain Robert Gray, who commanded the ship Columbia and who entered the Columbia river on May 11, 1792, was secured. This vessel was the first of American build to circumnavigate the globe. She was constructed at Scituate, in 1773, and served as a privateer during the Revolutionary war. In 1787 she was secured by a commercial company in Boston, headed by Jos. Barrell, and made her first voyage around the world. On the second trip the Columbia river was discovered, and the name of the vessel given to the river on May 19, 1792, by Captain Robt. Gray. The society has two implements used in constructing the Columbia.
