What S. S. S. Does

for Children

Children are constantly exposed to all sorts of diseases. The air they breathe is filled with germs, sewer gas and dust from the filthy streets are inhaled into the lungs and taken into the blood. At the crowded school

rooms and other public places they come in contact almost daily with others recovering from or in the first

stages of contagious diseases. You can't quarantine against the balance of the world, and the best you can do is to keep their blood in good condition, and thus prevent or at least mitigate the disease. You have

perhaps learned from observation or experience that healthy, robust children (and this means, of course, children whose blood is pure) are not nearly so liable to contract diseases peculiar to them, and when they do it is generally in a mild form. On the other hand, weak,

emaciated and sickly ones seem to catch every disease that comes along. This is because their blood is lack-ing in all the elements necessary to sustain and build

up the body. Poisons of every description accumulate in the system, because the polluted and sluggish blood

In the very dry atmospheres the durability of wood is almost incredible. Pieces of wood, wooden caskets and wooden articles have been withdrawn from Egyptian catacombs of an antiquity 2,000 or 3,000 years antedating the Christian era.

tongue. Automobiles as Transport Wagons. Automobiles as Transport Wagons.

Experiments in France have proyed convincing, and the French believe they are certain to play a role of much importance in modern warfare. It is odd to note the different uses to which nature and science are put. On the battlefield they fight for the destruction of life, while throughout the country, Hostetter's Stomach Bitters fights to preserve it. For fifty years the Bitters has been curing dyspepsia, indigestion constipation and biliousness. It will also prevent malaria, fever and ague.

Logic. "Johnny, your hair is wet. You've een in swimming again."
"I fell in, ma."

"Nonsense; your clothes are perfectly dry." "Yes'm. I knew'd you didn't want me to wet 'em, so I took 'em off before I fell in."

THE BAKER'S DOZEN.

Thirteen Reasons Explaining Popularity the "Anchor" Clamp.

A great deal is heard now about the "anchor" fences that have sprung into wide popularity of late. It is claimed that they are the cheapest and most durable fences on earth, hence their general adoption. Minute inquiry into details of construc-tion reveals the fact that "anchor" clamps hold (rivet tight) the large wires of which the fence is made, thus making the fence five times as strong and durable as any other fence on the market.

The manufacturers, The Portland Anchor Fence Co., 742 Nicolai street, Portland, Or., give a full baker's dozen reasons why the "anchor" clamp is so efficient:

1. It is made of the best hoop steel, therefore is strong and durable. 2. It is simple; can be applied by

3. It does what other ties pretend -makes an immovable anchor.

5. It keeps a fence always in repair. 6. It prevents injury to stock. 7. It makes a fence that stock cannot break down.

8. It can be used on smooth or

barbed wire. 9. It can be used for making new

or repairing old fences.

10. It is the only tie yet devised by which a fence can be made in any manner desired, or repaired without ebuilding.
11. It makes the BEST and

durable fence on the market. 12. IT IS CHEAP. 13. Merit alone can stand the test

WRAPPEDINROMANCE

ROBINSON CRUSOE'S ISLAND, FAMED IN FICTION.

Little Dot in the Pacific That Is Better Known Than Many of the Larger and Much More Important Islands-Scene of a Boys' Classic.

With all of its solitude, writes Douglas White in the Overland Monthly, in regard to Robinson Crusoe's island, there is not a speck of land upon the surface of the Pacific or any other ocean which is better known or more widely discussed than this same island of Juan Fernandez. Strangely enough, it is not the island's history which has made its name so well known throughout the English-speaking world, for to most people there is little of its history known: but the fame of Juan Fernandez has all arisen from a work of fiction which has been since its first publication more widely read than any similar work in the English language. From the passing of Fernandez and his Spanish colonists the Island was seldom visited save by some ship which was pressed for water and fresh food, in which case it furnished both in ample quantities, the goats supplying fresh meat, the fruit trees set by Fer nandez giving of their products, while several kinds of wild vegetables grew in abundance on different parts of the island. History, however, records but few of these visits up to the beginning of the eighteenth century. From a rough survey of the island, it was set down as being about twelve miles long by four miles in its widest portion, curving in a northwest and southwest direction, with its highest peak at the bend of the curve. This peak was named by Fernandez "El Yunque' (The Anvil), from its close resemblance

to that mechanical implement. For considerably over 100 years El Yunque's solitude was broken only by the coming and going of these few visitors, until in 1700 the ship entered Cumberland Bay which was to give to Juan Fernandez its possibility of becoming one of the best known islands upon the world's charts. This was the Cinque Ports galley, under the command of one Capt. Straddling. Now, this British skipper does not seem to have been extremely popular with his men, for upon this first visit to Fernandez more than 40 of his "Jackies' deserted to the island, preferring the life on its solitary shores to existence aboard the galley. Before the ship sailed, however, all but five of these deserters changed their opinions and returned to the galley's decks. Four years slipped by and again Straddling's ship dropped her anchor in Cumber- of coal into a bucket. Oh, it's bound land's waters. Of the five men left in to come, I tell you." 1700 but two remained, the others having been carried away by a French

ship which called in the meantime. But this second visit of the Cinque 4. It prevents loose and sagging Ports was to be productive of the great event in Fernandez's history, for while in the bay the commander of the galley had an argument with his sailing master, one Alexander Selkirk, who demanded that he be given an allowance of stores and landed on the island. His request was complied with, and the galley sailed without him. For four years and four months did Selkirk maintain his lonely vigil at the top of the island's mountain range, scanning the sea for the sail which might come to end his dreary life. In 1704 he was taken off by the Duke, an English privateer, on board of which he returned to England, bringing with him an extensive note book covering his experiences The company will send you an during these years of solicitude. This novelist Defoe, and on it the writer founded what at once became one of the most popular fictional works of that and each succeeding generation. Of course, Defoe used an author's latitude in its construction, but there exists to-day upon Juan Fernandez every one of the principal landmarks described in the chapters of Robinson Crusoe.

TO OUTWIT THE JANITOR.

Flat-Dwellers Fear of Ogre Has De-veloped New Industry.

"All right," said the locksmith, who keeps a little shop in Amsterdam avenue and does odd jobs of no great importance in themselves for the residents of the neighborhood, "all right, sir, I can fix this key to suit you, I

"You see" he explained to a visitor. according to the New York Herald, when the customer had retired, "he wants me to give him a janitor-proof after making a clean sweep of every- sack, N. J. He came to the exposi- key, and I'm just the boy to do it. I tion because the papers say it's a lib- guess you don't know what a janitorproof key is, because I know you live in a house. If you lived in a flat you'd

"When a man moves into a new apartment-that is, an apartment that is new to him-the first thing he begins to worry about is the key proposition. I'll take my oath that New York people are the most suspicious set of citizens that I ever saw in all my life. Why, they don't trust their relatives. After the man of the flat gets his string of two or three keys from the janitor he begins to let his suspicion loose.

"He thinks, of course, that the janitor is predatory by nature. Maybe he is right, but I believe the law holds all persons innocent until they are proved guilty, and it would be a pretty hard thing to do to prove a janitor guilty. Anyway, the man of the flat gets nervous. He has received so many keys. having kept a duplicate key of the apartment? Nothing at all. It would he the easiest thing in the world for the janitor to hold out, turning over all the keys but one and making use of that to enter the flat whenever he saw a good opportunity in the absence of the

family. ures the case out to himself. Then he member, one reason being because he comes around to some locksmith in the always sat on the same group of seats neighborhood and gives one excuse after another to account for his wish to have the lock changed on his front door. It doesn't make any difference to a locksmith what the reason is, so long as he gets paid for the work he dressed man must have made a misdoes, but the 'flatters' seem to think it take, hurried after him to explain. The necessary to spin him a fairy yarn. departing visitor smiled quietly as he Anyway, the matter ends by the lock- replied: "We'll let the mistake pans smith going around to the flat, taking a this time."-London Chronicle.

squint at the lock, marking a place where he can cut off a trifle of the iron so that the key that belongs to it won't work, and then altering the key so that

It will fit the revised lock. "For this the charge is very slight. There is only a few minutes' work to the job, and a locksmith hasn't the heart to make an overcharge, you know Now, this is much cheaper than having the old lock taken off and a new one put on, for then new keys would have to be made, and good keys cost considerable, you know. By simply scraping a piece off the lock at a certain point and scraping a corresponding piece off the key, the 'flatter' gets practically a new protection, and the janitor doesn't stand a chance of paying him a visit when he tried Dr. Williams' Pink without ringing the bell and being regularly admitted."

The End of the Town.

There was nothing about him to indicate the crank. He was neatly but not fashionably dressed, and his goodnatured countenance was of corpulent order, says the New York Mail and Exand Broadway, and for a moment looked serious

"Too much weight," he said to a fellow passenger beside him, nodding his head in the direction of the buildings. "Too much weight entirely. People don't seem to realize that the lower portion of this city is only a crust of rock, with water of great depth beneath it. They keep putting up building after building of great height and weight, and some day there's going to be the greatest catastrophe of the ages. The whole blooming lower part of the city, or a good portion of it, will cave in under the enormous strain put upon It by these sky-scrapers, and the loss of life and property will be incalcula-

has to sustain. Millions of tons of iron arriving here every year to be used for girders and rafters. Millions of tons of brick and mortar are used in constructing the buildings, to say nothing of the marble, granite and other kinds of stone, and all piled upon that frail crust of rock, which must give way some day under the strain.

"Then, there's the bridge, too. can't last forever. Some day it is go-ing to break down under the additional strain put upon it by the trolley and steam cars now running to Brooklyn. Imagine the scene at a rush hour some night; trolley cars on both sides laden with people; the promenade crowded and trucks in a steady stream. Suddenly one of the cables gives way. The other, unable to stand the strain alone. also parts, and people, cars and trucks are dumped into the river like a shovel

"Prince Georgie."

The Duke of Cornwall is devotedly oved in loyal Bermuda, where as a growing boy he once passed a happy vinter. One of his favorite comrades here was a little girl whose greatgrandfather had fought side, by side with Wolfe upon the Plains of Abraham. She used to push her little rocking-chair close beside that of the prince, and laboriously time her small rockers with those of his larger chair.

"We rock together, Prince Georgie," she used to chatter, "always together," thrusting difference of rank into that limbo reserved for sophisticated aduits. Another favorite of the prince was a young American girl who discovered him in the admiral's hallway one day, tugging at his gloves.

as he looked at her bare hands; "only I promised grandmother that I would." A letter from Queen Victoria gave the royal boy much pleasure, but on being asked if he would sell it for two pounds. he eagerly accepted the offer. Whereupon he answered the letter with comnendable promptness, urging his "dear grandmother please to write again."

The death of his older brother, some years later, and the recent death of the queen materially changed the career of the youth to whom the American girl said "you, and he said you to me." On his return from the tour of the British colonies he will receive the honored title of the Prince of Wales, with its pregnant motto, "Ich dien"-I serve.

Why Dinah Wept.

Not long ago a lieutenant in the navy was ordered away on a three years' cruise. The order had been dreaded for weeks, and when it came the young wife, who was to be left in a Brooklyn flat with a baby and a colored servant, was in despair.

She controlled her sorrow very well, however, until the actual moment of parting came, and then she wept as though-her heart would break, says the New York Herald. The cruiser was to leave the navy yard early next morning, and the lieutenant had gone to report for duty.

In the midst of her lamentations the young wife heard a sniffling and sobbing in the dining-room, and upon glancing through the door she saw Dinah, the colored maid, rocking her body to and fro in a chair and weeping "Why, D-D-Dinah, what's the m-mat-

ter?" cried the mistress. "You seem to t-t-take Mr. Blank's departure as much to heart as I do." "'Deed I doesn't, Mis' Blank-'deed 1

doesn't!" sobbed Dinah. "What am bodderin' dis chile am the fac' dat a culled gemman friend o' mine am What is to prevent the janitor from gwine sail hisse'f on dat same old

Duke of Norfolk's Clothes.

A STARTLING STORY

NEWS AGENT.

In an Interview He Relates How He Accomplished What Many Others Have Falled to Do.

Jack Williams, of No. 401 Delaware street, says the Kansas City, Mo., Journal, is well known as an enterprising news agent and a thorough-ly reliable man. He had been a suf-ferer from kidney trouble and endured much pain from it until recently, success that within a short time he was entirely and permanently cured. To a reporter he said:

"For two years I had pains in the back constantly, causing me serious inconvenience. But I did not attempt to do anything for my complaint until the latter part of last press. He glanced reflectively out of the rear window of a Third avenue car at the tall buildings along Park Row plant until the interpretation in the rear window of a Third avenue car at the tall buildings along Park Row plant until the interpretation in the inte they would do for me. I was relieved within one week after I began taking them; the pains disappeared and so complete was the cure that I have not found it necessary to take further treatment nor have I been troubled at all by the disease since.'

Kidney complaint is an insiduous disease. First come almost unnoticed pains in the back and some slight inconvenience. The pains grow gradually worse and the inconvenience greater till finally, if not given medigreater till finally, if not given medical treatment, the person suffers awful to follow said I needed an operation for apendhis ordinary occupation. Blood pois- icitis. That would cost only \$100. oning sets in, the constitution is think I'll let him operate.' wrecked and death often results.

Mr. William stook the one unfailing emedy and was readily cured within a few weeks. His statement was sworn to before Lionel Moise, a notary public, and the facts above will bear the most searching investigation. Dr. Williams' Pink Pills for Pale People will not only effect a cure in cases similar to the one above, but, acting directly upon the blood and nerves, are an unfailing specific for such diseases as locomotor ataxia, partial paralysis, St. Vitus' dance, sci- 2 a. m. atica, neuralgia, rheumatism, nervous headache, after effects of the grip, then," she answered, "for that won't palpitation of the heart, pale and sallow complexions and all forms of And then nothing but the low, hoarse weakness either in male or female. buzzing of the telephone wires answer At all druggists or direct from Dr. Williams Medicine Co., Schenectady, N.
