

Eczema

How it reddens the skin, itches, oozes, dries and scales!
Some people call it letter, milk crust or salt rheum.
The suffering from it is sometimes intense; local applications are resorted to—they mitigate, but cannot cure.
It proceeds from humors inherited or acquired and persists until these have been removed.

Hood's Sarsaparilla positively removes them, has radically and permanently cured the worst cases, and is without an equal for all cutaneous eruptions.

THE BLOOD HEALTHY OR DISEASED

When there is a natural and healthy circulation of the blood, the entire quantity, estimated at one-eighth the weight of the body, passes through the heart every five minutes. This rapid flow of the blood through the system prevents the entrance of disease germs and impurities of every description. It filters out all that is not necessary or good for the growth and development of the body and nourishing and strengthening the muscles, tissues, nerves and bones. But, unfortunately, few persons can rightly claim an absolutely pure blood supply and perfect and unpolluted circulation, and in consequence are exposed to innumerable diseases. Contagious Blood Poison, the greatest enemy to mankind, enters the system through the blood, and Cancer, Scrofula, Rheumatism, Catarrh, Eczema, Salt Rheum, Psoriasis, Tetter—in fact the majority of human ailments—are caused by poisonous humors that are engendered and fostered in a sluggish and impoverished blood. Old sores, chronic ulcers and rheumatic pains are common to all. The blood is the source of all strength naturally grows thin and pale because of the lack of the red corpuscles that give color and strength to youthful blood. Sallow complexions and rough, oily skin evidence some constitutional or blood trouble, which, unless removed, will never be cured. Diseases that originate in the blood, whether they manifest themselves as ulcers, tumors, itching eruptions, muscular or bone pains, require a tonic and blood purifier such as S. S. S., which not only antiseptics and neutralizes blood poisons and humors, but possesses health-giving tonic properties that no other blood medicine does. It goes down to the very foundation of the disease and eliminates from the system everything of a poisonous character or that obstructs and clogs the circulation. It builds up and imparts new strength and vitality to the old innutritious blood. The Typewriter Invention.

A statistician has proved that the invention of the typewriter has given employment to 200,000 people, but he fails to state how many cases of weak stomachs and dyspepsia it has induced. All people of sedentary occupation need Fowler's Stomach Bitters. It is a wonderful medicine and helps nature bear the strain which ensues from confinement. It also cures dyspepsia, indigestion, constipation and flatulency. Be sure to try it and you will not be disappointed.

DEAFNESS CANNOT BE CURED

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by restoring the inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness results. Hearing is restored to its normal condition, and the inflammation is forever eliminated. It is not caused by catarrh, which is nothing but an inflamed condition of the mucous surface. We will give One Hundred Dollars for any case of Deafness cured by our Catarrh Cure. Send for circulars, free. J. CHENEY & CO., Toledo, O. Sold by Druggists, 75c. Hall's Family Pills are the best.

A NARROW ESCAPE

An Indiana Woman's Terrible Experience.

"It was a frightful experience and I never expected to come out alive," said Mrs. Ellen Bowman, of No. 82 Windsor block, Indianapolis, Ind., in the course of an interview recently published in the Sun of that city. "I do not suppose it ever would have happened," she continued, "but, some years ago I began to worry and do more work than I ought. This brought on a general physical weakness, my blood became thin and I grew nervous. I went to a doctor and he said I had consumption."
"Did he advise any course of treatment?"
"Yes, he gave me some medicine which I took, but it did me no good. Other doctors failed to help me and I became dependent of ever getting well. My limbs ached, my head was dizzy and I was most miserable."
"You don't look now as if you had ever been sick," ventured the reporter.
"No, and I don't feel as if I ever had," said she. "I owe my present health to the Williams' Pink Pills for Pale People. About four years ago a friend from Ohio recommended the pills to me, saying they had benefited his daughter whose symptoms were similar to mine, so I began to use them. It was only a very short time before I experienced relief. I have recommended the pills to many, for I am confident that benefit will follow their use."
"There is hardly a person who does not worry at times and fret about things that go wrong. And worry is responsible for as much sickness as any other cause. It interferes with the action of the stomach and racks the nerves. The result is that the blood becomes poor and the nervous system impaired. The power of Dr. Williams' Pink Pills for Pale People to derange the nervous system or to injure blood has been demonstrated in thousands of instances as remarkable as the one related above. They cure locomotor ataxia, partial paralysis, St. Vitus dance, sciatica, neuralgia, rheumatism, nervous headache, after effects of the grip, palpitation of the heart, pale and sallow complexion, and all forms of weakness either in male or female. At all druggists, or direct from Dr. Williams' Medicine Co., Schenectady, N. Y., 50 cents per box; six boxes, \$2.50.

He Drew the Line.

"Hold on there!" called Charon to the new arrival at the ferry over the Styx. "You wait until the next trip, and I'll take you over alone."
"Why this distinction?" inquired one of the spirit passengers.
"Oh, he's one of those fools that rock the boat, and I don't want to spoil the trip for the rest of you."—Baltimore American.

The Absence of It.

If there is any truth in the saying that happiness is the absence of all pain, mental and physical, the enjoyment of it can only be found in heaven. But so far as the physical is concerned, it is within easy reach; at least measurably so, as far as cure will go. The sum of human misery in this line is made up of greater or less degrees of physical suffering. The minor aches and pains which afflict mankind are easy to reach and as easily cured. There are none in the whole category, which, if taken in time, cannot be cured. They must in some form afflict the nerves, the bones, the muscles and joints of the human body. They are all more or less hurtful and wasteful to the system. St. Jacobs Oil is made to cure them, to search out hidden pain spots, and to cure promptly in a true remedial and lasting way. Very many have not had the happiness for years they still need it, and very many are putting off cure and happiness because they don't use it.

A Wonderful Echo.

The most remarkable echo in the world is that which comes from the north side of a church in Shipley. It distinctly repeats any sentence not exceeding 21 syllables.

What is "Nothing"?

An old Scotch farmer, being elected a member of the local school board, visited the school and tested the intelligence of the class by his questions. The first inquiry was:
"Noo, boys, can ony o' ye ell me what naething is?"
After a moment's silence, a small boy in the back seat arose and replied:
"It's what ye gie me t'other day for haudin' yer horse!"—London Answers.

PISOS CURE FOR

WHEEZE, COUGH, BRONCHITIS, ASTHMA, CONSUMPTION

A MASTERPIECE IN THE WAY.

How an English Artist Escaped Winding an Uneventful Notoriety.

When Irving Montagu, the war artist, was a very young man, before he had mastered the elementary principles of his art, he narrowly escaped an adventure that he says would have brought him a sudden notoriety in the art world which few would have envied. He was wandering through Marlborough House, then Vernon Gallery, with a party of friends, and as they were exploring deserted passages, his companions playfully shut the door, not knowing that it fastened with a spring lock, and expecting him to turn up presently, ran off to continue their work in the galleries.
Thus "cribbed, cabined and confined," says Montagu, I remained patient enough at first, hoping it would be but a short-lived jest; but half an hour having elapsed, my patience began to diminish and the situation to pall upon me. In vain did I try to make myself heard, so I set about to find some means of exit.
I commenced by slowly feeling of the walls around me. Now, strangely enough, and much to my relief, the back part of my prison house was as flexible as if the paper of the adjoining room were only strained on canvas across it.
An idea struck me. Nothing could be easier than to take my penknife and cut a slit sufficiently long for me to step through into the next apartment. I was just on the point of carrying out this idea when I heard footsteps, and a cheery voice without exclaiming: "Oh, I say, old fellow, you there still?"
"We'd forgotten all about you till a moment ago. This is almost too much of a joke. You might have been there all night."
Then, seeing the knife in my hand, he inquired if I had contemplated suicide during my solitude.
"Certainly not; only I wasn't going to be shut up in such a place when I found that I could cut through that partition."
"Partition! What, that canvas at the back?"
His look of horror startled me.
"Yes, and why not?"
"Good heavens! Why, you were on the point of walking through 'Child Harold's Pilgrimage'—getting through six thousand pounds at one step, to say the least of it!"
It was true enough, too, as I afterward discovered. It was Turner's masterpiece which stopped the way, and not, as I had supposed, a canvas wall. One moment more, and I should have gained a notoriety in the art world which few would have envied me.—Youth's Companion.

How Things Grow in Hawaii.

How great are the possibilities of Hawaii as a fruit and vegetable growing country will be understood when it becomes known that four crops of potatoes have been produced in succession on the same piece of land within twelve months. Root crops become edible ten days after sowing. Strawberry vines bear fruit all the year. The berries are of the finest flavor.
Cabbage grows all the year and it apparently makes no difference whether it is planted in the spring, summer, autumn or winter. Parsley once sown grows forever, apparently. Lima beans continue to grow and bear for over a year, and they have to be gathered every week after starting to bear. Cucumbers bear the entire year and so do tomatoes, which, with proper attention, bear for years. Raspberries bear for months.

"It has been estimated," continued the inventor, "that an ordinary female house fly will lay 20,000 eggs in a season."
"Yes, answered the friend, "but what's the scheme?"
"I propose," replied the genius, "to graft the house fly on the barn yard hen."

An Incomplete House.

We run wild over the furnishings of a house; its furniture, carpets, hangings, pictures and music, and always forget or neglect the most important requisite. Something there should be always on the shelf to provide against sudden casualties or attacks of pain. Such come like a thief in the night; a sprain, strain, sudden backache, toothache or neuralgic attack. There is nothing easier to get than a bottle of St. Jacobs Oil, and nothing surer to cure quickly any form of pain. The house is incomplete without it. Complete it with a good supply.

FAVORITE "ANCHOR" FENCE.

A Boon to the Northwest Which is Liked by Land Owners.

The famous "Anchor" fence that is being so generally introduced now in the northwest, has the universal distinction of being even better than its friends claimed. The Portland Anchor Fence Company has agents all over the country now introducing this really wonderful fence. Its simplicity, extreme durability, and cheapness make everybody marvel.
To satisfy the general interest, an officer of the company was asked to describe the chief points of construction. He said:
"In the first place, it is made of all large wires, the upright stays being of No. 8, and the running of No. 9 wire, which singly stand a breaking strain of 1,500 pounds. In the second place there is not a small, weak or twisted wire used in our fence construction.
"The uprights are so securely fastened that man or beast cannot break the fence down.
"The end, corner and gate posts must be large, and securely braced, and so placed that the center of the posts will be on a line with the face of the line posts. After the posts are set, fasten one end of the wire and run to the other end or corner post, where the wires are cut, passed through the center of post, then attached to the automatic ratchet and tightened to a hard tension. Use a spacing to keep the wires at a uniform gauge before stapling to line posts, and do not drive staples tight, but allow room for the wires to work. Take upright stays and place equal distance, put on the clamps and close with clamp pincers. These clamps will hold, you cannot get the wires to move. This is the secret of our fence. It's the most economical and sturdiest fence ever made. Tell the people to send to the Portland Anchor Fence Co., 742 Nicolai street, Portland, Ore., for free photographs and full description."

Low Grade of Intelligence.

"It's astonishing, Jim Bangs, that you don't know enough to come home before daylight! Why can't you imitate the moon?"
"Why, the moon knows enough to drop out of sight when it's full."—Boston Journal.
