TEACHING A SCHOOL. sembled this morning; why is it in

POSITION OF SCHOOLMASTER IS NO SINECURE.

Sometimes He Has to Fight to Maintain Discipline-One Pedagogue Who Whipped Entire Class-Muscle as Important a Requisite as Is Scholarship.

Who hath bleeding at the nose? He who teacheth a country school. Wherefore I say unto you, go not gaily forth to teach them that dwell in the land found about lest ye have wounds and sores, for verily it booteth more to compass ye boxe than to read the stars. -O. K., HIS Maxims.

It is truth the poet sings that he who essays to handle the unruly in a country school has educational work cut out for him not laid down in any reputable text book.

No person on earth is subjected to as many petty persecutions born of riety is speedily mixed. In the early sheer deviltry as the country school teacher. For a week, maybe, after he big boy tells and the scholars dance "takes in" the school he has a fairly about, hoping for victory. In the end easy road to travel; the boys have not in most cases skill, endurance and highfinished sizing him up. But woe to him if he becomes unduly confident, in almost record time Simpson is a 2-cent stamps for postage and we will for things will happen not set forth in licked commodity. He may not actualthe simple rules he has pasted up ly ascend to the roof to correct his er-Cayenne or Ginger or White Pepper or above the blackboard. The second ror of judgment, but the thing is done other variety. We know you'll say it Monday is generally the time set for and the "smoke out" is a dismal fallis the finest you ever used. Send at the opening of hostilities. The big ure. once to Wadhams & Kerr Bros., Port- leader, likely as not bigger than the teacher, has used Saturday and Sun-

day mapping out his program. Subdued snickers, inattention to the business in hand, poorly prepared les- trooper who still wore his blue uniform sons or lessons absolutely unlearned mark the day's proceedings. The teacher reprimands and orders the school to stick to those tasks until they are and skating fine by putting some awlearned. Nobody is kept in at recess or ful things on the big cannon stove. noon rest, for as yet no open defiance The smell sent the school to the tall has marked the demeanor of the pu- grass outside. Wilson was charged pils. They go slowly, for the temper with the trick, but denied it stoutly, of the master is not a revealed thing Then the school reassembled and the yet. Just before school "lets out" the teacher rises, taps his bell and, having ed. THROUGH THE TELESCOPE.

Humble Tragedy of the Siege of Lady-

When the Boers besieged Ladysmith they permitted a "camp of refuge" and tombi, a few miles distant. Here the non-combatants were gathered. And to the hospital, writes George Lynch in the London Daily Express, came every morning the train from Ladysmith, bearing its burden of sick and wound-

To the dwellers at Intombi that train brought the history of the siege, the daily bulletin written in blood and disease. Women who had husbands and brothers and sons in Ladysmith crowded around always to see what news it brought, and went away with a sigh of respite and relief when it carried nothing for them.

And yet, after a fashion, these women at Intombi were more fortunate than the men in Ladysmith, since they could learn from the new arrivals how their loved ones fared. But men were not allowed to go backward and forward to Intombi; those who went had to remain, and somehow or other little or no news seemed to reach the garrison.

In the dearth of news one man in Ladysmith had arranged that twice a week, when he could get off duty, his wife at Intombi should go at 12 o'clock and stand in front of a big marquee where he could see her through the ship's telescope at the 4.7 battery.

She went there regularly with her child, and straining her eyes toward that sandbagged point above Convent's Hill, sometimes fondly imagined that she could see him. And as the months passed her child, like the others in the camp, grew more sickly, thin and pale, till it seemed as if the Erl King spirit of the miasmic fog had wrapped it round and entered it, and made it a changeling of his own.

But delicate as the child was, the mother was the first to fall sick, and the news of her illness reached her husband by his seeing one tiny figure standing alone at the appointed place. waving a handkerchief. And there came a day when it, too, was no longer to be seen. He could not go to them, but ment. Then the bell taps in dismissal the act and received a hot ruler on had to stay and fight on with bitterness

A Vanishing Bird.

If the north German farmer looks with equanimity upon the gradual disappearance of the stork, the Northern tourist in quest of the quaint and pic turesque will hear of the vanishing of

MAN IN THE IRON MASK. incient Cemetery of St. Paul in Paris

His Supposed Rurial Place One of the old houses of Paris, situ ated at 17 Rue Beautreillis, is about to a field hospital to be established at In- disappear, and the place thereof will know it no more. It has been handed over to workmen, who will demolish it to make room for a workshop. Rue Beautreillis is an ancient and narrow street which the omnibuses do not penetrate, remnant of the times when the Place des Vosges was the Place Royal and the home of beaux, "peruked," and red-headed. In the garden of the doomed house, famous in times past as the residence of distinguished persons, is a grave which local tradition says is the resting-place of that mysterious figure in history-the Man with the Iron Mask, says the Paris correspondent of the Pall Mall Gazette. One remembers that this remarkable person died in the Bastile in 1703 and the local register says he was buried in the parish of St. Paul. Now, of the ancient cemetery of St. Paul, fail to decide right. and the church, itself, is near at hand, set in the midst of a cluster of old houses. It is in the garden that the famous Iron Mask is said to have been buried, and the spot is the Mecca of daily pilgrimages. Outwardly, the place is unlovely enough, ragged and uncultivated. A few poor bedraggled flowers try to live on, cut off from the sunshine by the over-topping houses, and prematurely faded by the smoke from a neighboring wash-house, out of sheer respect for a great name. In a corner, where are the decayed trunks of some acacias, and where a pool of stagnant water gives an additional aspect of melancholy, is the reputed grave of the Iron Mask. The old attendant will tell you that 'the water does not run away because there is a vault beneath covered over with a thick beg of cement. In the middle of the garden there is a subterranean passage which leads by gentle descent direct to the cave of burial. The question which is agitating the minds of the "Old Paris" society which watches over these matters is whether the cones of this fascinating figure of a former century are really there. This will be settled, perhaps, when the tomb is opened. Will the strange instrument that he wore for so many years be found, rust-eaten, among the remains? Actually, there is on the grave a column which bears an inscription, cut with a knife, "Here lies Marchiali, the Man with the Iron Mask.' It would appear that the inscription

BUYING BINDING TWINE.

Beware of unscrupulous dealers who misrepresent the quality of this important article.

The best material for Binding Twine is pure Manila fibre. The poorest material for Binding Twine is Sisal fibre. The best Binding Twine is Pure Manila, selected fibre, 650 feet to the pound. The next grade is made partly of Pure Manila fibre and runs 600 feet to the pound.

Twine made of Sisal fibre cannot be spun longer than 500 feet to the pound with proper strength and evenness.

The great question is how many bundles can you bind with one dollar's worth of Twine? Notice the length, per pound and figure how many feet of Twine you get for a dollar. The mixed fibre twine is 20 per cent longer than the Sisal grades. The Pure Manila Twine is 30 per cent longer. It is a simple problem in arithmetic. Use a this garden undoubtedly forms a part little "horse sense" and you cannot Standard Twine is Sisal Twine, col-

ored or dyed to imitate Manila, and is same length to the pound as Sisal, i the same strength and same price at all factories where it is made. Some deafers are selling it for a better grade than Sisal, which it is not. When they misrepresent the twine and use deception to enlarge their profit do they deserve patronage? If Twine is made of Pure Manila fibre the tag attached to each ball will

always bear the words "Pure Manila." If Twine contains any Manila fibre the word "Manila" will always appear Times. on the tag, for no dealer or maker will fail to put on the labels any fact which will recommend his goods. The "Red Clover Leaf" is the best

grade of Twine made and is the favor-

ite with the farmers all over the Pacific coast, and is of guaranteed length and queer. strength. The Manila grades are the smoothest, evenest and most satisfactory in every

The Sisal grades are rough, coarse twine guides and twine holders on the unyielding that the knots are more like- rooster, or something of the kind, and ly to slip and become untied when the young women took part in the exercises. bundle drops from the binder or in shocking and hauling.

Some twines are sold merely by the name of the manufacturer and the salesman is careful not to mention the grade or quality. In buying always require specific information as to the quality of the Twine, and, moreover, be very careful to inspect the tag attached to the balls. The buyer, if well informed, cannot be deceived.

Manila fibre is all brought from the Philippine islands. The Pacific coast should especially encourage trade with these islands, for they now belong to our country, and in Asiatic trade lies the Musee, Carnavalet, of Moliere and our best hope for the future, for the reason that when this trade is developed the Pacific coast will control it and our commerce will increase a thousand fold. The only check that can be put upon

the rapacity of the producers of Sisal fibre in Yucatan (which is the cause of the present high price of twine) is the largest possible use of Manila fibre Reduce the demand for Sisal Twine still find immaculate springs in the 25 per cent and you will see twine

When you strike a stump with the ordinary push cut mower, something happens about as shown in the above illustration, and they are all push cuts, and all will do this except the Champion Draw Cut Mower.

This serves to show that pressure against the bar will raise the wheels from ground, decrease traction and cutting power. With the Champion Draw Cut the contrary is the result-pressure against the bar in heavy cutting gives downward pult, holding the wheels tighter to the ground. Increased traction, more power, making the most powerful cutter on the market. This fact stands undisputed, and if you want the best mower made, buy the Champion Draw Cut.
