PE-RU-NA NECESSARY TO THE HOME

A Letter From Congressman White, of North Carolina.

PE-RU-NA IS A HOUSE-HOLD SAFEGUARD.

No Family Should Be Without It.

Peruna is a great family medicine. The women praise it as well as the men; it is just the thing for the many little catarrhal ailments of childhood The following testimonials from thankful men and women tell in direct, sincere language what their success has been in the use of Peruna in their families:

Louis J. Scherrinsky, 103 Locust street, Atlantic, Iowa, writes: "I will tell you briefly what Peruna has done for me. I took a severe cold which gave me a hard cough. All took one bottle of Peruna and was well. tarrh of the bowels as it is a case of cadoctors' medicines failed to cure it. I "Then my two children had bad tarrh of the head.

coughs accompanied by gagging. My

wife had stomach trouble for years. She took Peruna and now she is well. "I cannot express my thanks in words, but I recommend your remedy at every opportunity, for I can conscientiously say that there is no medicine like Peruna. Nearly everyone in this town knew about the sickness of myself and family, and they have seen tarrh. I have usel it in my family with astonishment what Peruna has and they all join me in recommending done for us. Many followed our ex- it as an excellent remedy." ample, and the result was health.

Mrs. Nannie Wallace, Tulare, Cal., sionary society, writes:

Thanking you heartily, I am."-L. J.

Scherrinsky.

the truth

their son-in-law. In this matter, strange to say, pride and vanity sometimes play a stronger part than love. Two things ought check to William H. Rogers, cashier of Wise Bros. establishment. Wise Bros. to weigh most in making this choice; first, the character, and second, the worldly prospects of the man. Unhappily many mothers—and many daughters, too—allow a man's wealth and social position to count for more than the man himself. Every day one sees fine girls given to dissolute, worthless fellows who happen to have inherited a fortune and a family name. A true mother would rather see her child the wife of a decent bootblack than bound to a drunkard and a rake whatever his wealth and lineage, for a girl mated to a man whom she does not love will be unhappy, and what is the use of glory and splendor if one has not happiness? The man who is most likely to be a good husband is

cleanly, positive man of the girl's own class. He need not be handsome or rich or too good. He ought to be human and to have had some experience with the world, for that quality makes a man liberal and charitable. It will be well if he is

thoughtful of little things, for the man who thinks of small courtesies and kindnesses is unselfish. Let him have enough to support a home without pinching and let him have prospects T is often asserted that the churches are losing their hold upon the people because the revelations of science, an inof improving his fortune. This is very important, for love and poverty do not always get on well together. A girl is a fool to sell herself for an establishment, but she is no less a fool to give herself away for nothing. Men and women love better on a full stomach and affection must be ardent indeed to make up for a lean pantry and a cold stove. Girls should use their church buildings. Not long ago we had descriptions of the great Roman Catholic Cathedral in London, a magnificent heads in the game of love. The marriage of reason, fortunately, specimen of church architecture that might almost suggest a is not an institution in this country, but the marriage of unrea-son is only too common, as the divorce records prove. rivalry with some of the splendid medieval monuments to re-The other day it was reported that the Methodists had paid \$1,650,000 for a site in the same city on which to erect

The mother who encourages her daughter to seek a good match instead of merely a good husband is unworthy of exercising the privileges of motherhood.—San Francisco Bulletin.

Is Success a True Test?

NE of the gravest problems confronting the religious eaders of the twentieth century is the idolization of that magical word "success." American business and social life has become thoroughly permeated with the religion of the man who succeeds in landing certain prizes for which he has striven with every ounce of energy and intelligence he possesses. In fact, the man who succeeds, as the world calls it, does so nine times out of ten at the cost of many entiments that he should cherish.

It is the undoubted province of religion and of the sincere

elievers in Christianity as it was founded by its Divine Leader to attempt to make some headway against the gross materialism that is sweeping over the breadth and length of the land. One of the most distressing signs of the times is the ever ready and apparently final "dollar gauge" that modern society appears to have adopted as its one criterion of a man and his works. The query, Does it pay? is but too often the sole question demanded when some proposal is made. The fellow query, where it is an individual, follows patly, Does he make money Any sensible being understands that these questions have their legitimate and most important sphere, but they have overrun these properly narrowed bounds and crept into the

very home and every social function of American society. A very slight study of the teachings of Christ will reveal clearly that such a condition is intrinsically opposed to a favored growth of true religion and forms the dominant obstacle to that religious revival so eagerly sought and so long delayed.-Baltimore Herald.

structure.

though it is somewat older, is another very imposing and costly

These are but a few instances out of many which indicate

the continuing power and purpose of the churches to erect

elaborate and imposing edifices. And the power is evidence

of vitality, for the contributions to these immense building

funds are more than ever voluntary. They can be explained

only by a large measure of popular approval and by an in-

tense popular desire for extraordinary manifestations of church

But the cathedrals and other costly buildings tell only par

of the story. It is said of the Methodists of this country that

they erect a church every day in the year, and if the assertion

is not strictly true it is a fair as well as a vivid way of sug-

gesting their activity in building. And as other churches are

active also and effective according to their membership we

have each year new churches enough to cover the site of a

good-sized town. Persons who proclaim the decline of the

churches should pause a moment to reflect upon these interesting and significant facts.—Chicago Record-Herald.

The Habit of Worrying.

only two had any substantinal basis, and these were trivial,

try. There is no reason to suppose that worrying ever did

single human being one bit of good, and it has done an im-mense amount of harm. In the first place, there is the time spent in this uncomfortable occupation which should have been

given to rest, recreation or actual work. Then there is the

vitality lost by it, which is often more than would suffice to

remove the cause of the worry, if properly applied. Third, and not by any means least, there is the discomfort caused by

Good Roads.

OOD roads are among the evidences of high civilization or national necessity or an advance in prosperity. They are certainly a luxury. At a more primitive period of our own development, that told about the whole story of their place in public estimation. If a city or smaller community could afford them, well and good; their construction was justifiable, like the erection of statues and fountains. If it could not, why, it didn't lose much. We were a rugged people and jounces and jolts were accepted as a part of our discipline. We didn't need the foads for military purposes, as did the old Romans or as the Spaniards thought they did when they built the splendid highway from Ponce to San Juan without troubling our heads over something which would be in the island of Porto Rico, and we never dreamed that good uncomfortable if it were to happen, but which has not hapcommercial development.

There has at last been an awakening to the value of smooth and hard highways. A new conviction has dawned upon us. We are still stretching ourselves and struggling with it, but it has found lodgment and will in time work its way. Most of us are longing for the day when instead of enjoying a mile or two of improved highway, which only emphasizes the discomfort warry resolutely aside and think of the pleasantest or the most and wretchedness of the ten miles which we may strike later on, we can start out on a half day's or a day's ride over country roads that shall continue from start to finish as good as any of the samples.-Boston Transcript,

What Can We Afford?

OW many times in the course of a year we use the little sentence "I can't afford it," usually with a complaining note in voice or mind as we realize the difference between what we can pay for and what we desire. Yet

W. L. Douglas shoes for style, complaining makes. A trial will convince you.

W. L. Douglas shoes for style, complaining makes. A trial will convince you.

W. L. Douglas shoes for style, complaining makes. A trial will convince you. daughter marry, and young men who call at the house are instinctively classified as eligible or not eligible. No matter how firmly mothers may deny this impeachment, it is people usually, if not always, afford what they want late months, \$1,103,820 late months, \$2,340,000 Even a millionaire can't buy everything on earth; he has to know what sort of a man most mothers would pick out to be to take his choice, like other men, but, like other men, he manages to afford what he wants most.

By what we can or cannot afford we usually mean what the utmost living we are able to make will or will not suffer us to buy. But here is another way to calculate. "The cost of a thing." said Thoreau, "is the amount of what I will call life which is required to be exchanged for it immediately, or in the long run." Stevenson says, "I have been accustomed to put it to myself, perhaps more clearly, that the price we have to pay for money is paid in liberty." Here is a new measure of what we can afford-not how many purchasable things we can manage to barter our life and liberty for, but what amount of life or liberty we can afford to exchange for any purchasable commodity; in a word, what kind of a living we can afford to "Do you want a thousand-dollar income?" says Stevenson, "or a five thousand, or ten thousand? And can you afford the one you want?" What a revolution in the world of economics and finance were every one honestly to ask and answer himself that question!-Harper's Weekly.

Spent \$7,000,000 in Searching for Mother Lode at Cripple Creek.

vided with hot or cold douche baths. Excellent meals are given at a nomi-

gratis. The problem of how a great Alpine tunnel could be properly ventilated was one that long baffled engineers. To sink shafts through the mountains was out of the question, but Sig. Saccardo, a famous engineer of Bologna, has invented a system by which vast volumes of fresh air can be blown into a tunnel by ventilating fans placed near the mouth.

This was first introduced on the Pracchia tunnel beneath the Apennines, but not until after a heavy train with two engines, conveying one of the crowned heads of Europe and his suite, rushed out of the exit of the Pracchia tunnel one day with its engineman and fireman lying almost suffocated.

But the only satisfactory solution to the ventilation question is the adoption of electric traction through tunnels of great length. This system has worked well at Baltimore, where an electric locomotive is attached to the expresses when approaching the long tunnel, which takes them through, steam engine and all, at from fifty to sixty miles the other engine.

Since October of last year the work been much delayed by the flooding of the tunnel with large volumes of water from a source that remained long undiscovered. The water burst in while the tunnel was being bored through a soft marble, and work could not be continued until the engineers had diverted the stream from which the water came.-Pearson's.
