

UNPRIZED VIRTUES.

Sympathizers with labor unions will be quick to condemn the arraignment of those bodies by President D. M. Parry in his address before the National Association of Manufacturers at New Orleans, April 15th.

When the great giants of organized labor and organized capital come to the realization that each is necessary to the existence of the other; that the solution of the problems with which they are confronted are only delayed and made more complex by the resistance which each has to meet from the other, forbearance will be rated higher than unbridled abuse, and self-restraint than uncurbed animal passion.

Proposed Water Franchise.

The specifications call for either a direct or gravity water system. The plant to be sufficient capacity to supply water to the 27 fire hydrants of such size and location as shown on the map accompanying the specifications, and all additional hydrants. A pressure is to be maintained during fires sufficient to throw streams through 50 feet of hose with one and one-quarter inch nozzle a height of 75 feet from three different openings at one time from any part of the mains.

The company is to extend mains and put in additional hydrants at its own expense when required to do so by the city, and the sum of \$3 per month rent shall be paid for each hydrant so required.

Upon ten days written notice by the city, specifying wherein the system is deficient at any time, the company shall meet the requirements specified by making repairs, improvements or building up the system.

The fire company shall be privileged to connect at any time with any hydrant on the system for fire drill or exhibitions.

The company shall furnish all water necessary for sprinkling Second street from Adams to Monroe inclusive; Adams, Jefferson, Monroe between First and Third streets, and Madison street between First and Fourth streets; and for use on such other streets as the council from time to time may require, at the same pro rata rate as the streets specified.

The company will be required to furnish all water necessary for flushing all main and lateral sewers. The same pro rata rate to be charged for sewers hereafter put in, as shall be established for sewers now in use.

All water furnished for family or domestic uses shall be good, pure, wholesome water. Tests and analysis of its purity shall be made whenever the council shall so determine; the expense of such test to be paid by the city.

A pressure of at least 15 pounds per square inch shall be maintained at all faucets for private use.

The franchise is to continue for 50 years; but in 15 years, or at the end of

any five years thereafter, after giving a year's notice of its purpose, the city may buy such water system, the value to be determined upon by an arbitrator chosen by the city and one by the company, or in case the two cannot agree, they to call in a third.

Work is to begin within three months after approval of the successful bid, and the system to be completed within 12 months thereafter. A certified check for \$2,500 shall accompany each bid, said check to be forfeited to the city in case bidder fails to keep his contract.

GRANGER.

Ladybird and San Jose Scale.

Government entomologists have demonstrated that the Asiatic ladybird has a great liking for the larve of the San Jose scale as an article of steady diet, and are now propagating this species of insect for distribution among orchardists in districts affected by scale, says an official report. Efforts have been made heretofore to induce American ladybirds to feed on the scale, without effect; but the Asiatic article seems to have a natural predilection for the pest which has caused more trouble and expense to the orchardmen of the Pacific coast than anything else. In the investigations conducted by the government, it has been found that the original habitat of the San Jose scale was in northern and northwestern part of China. Here also the ladybird flourishes and is known as the deadly enemy of the scale. Hence, when imported to America, the beetle immediately attacked the scale from its instinct. The offspring from a single pair of these beetles number nearly 1,000, and it has been demonstrated by actual count that one beetle will devour 7,000 San Jose scale larvae in one day, so that it can readily be seen that if the Asiatic ladybird ever becomes firmly established in this country, it will result in a considerable diminution of the scale. It is supposed that the scale was imported to this country from its original habitat on Chinese peach trees, brought to California by the late Jas. Lick.

The Benefit of Change.

We are like house plants: We need a change of soil now and then—to be replanted. New scenes, new experiences, new surroundings—a change of climate dry air instead of moisture, sunshine in place of cloud. This is sometimes essential to health. There are conditions near at hand that are better than Europe can offer. Take a month or two in California. Plant your— if for a time where there are no irritations, where the hotel is beyond criticism, the landscape pleasing, and where warm sunny weather invites to walks and drives. Pure and dry air, and the increased electric influences of sunshine are vastly helpful.

You can make this trip at very little expense, and enjoy a ride over the scenic Siskiyou and Shasta mountains, which, at this time of the year with their snow-covered peaks, are unsurpassed for their grandeur.

Reduction in Water Rates.

We are proposing to reduce the rates on water and to arrange with all consumers so that all may be treated the same. To do this we must insist on all bills being in advance, as our rules and regulations call for, and as other cities require. We have no desire to have trouble with any consumer, but to treat all alike our rules must be enforced. If anything should happen that water is not used after being paid for the money will be refunded.

Very truly yours, CORVALLIS WATER CO.
