DEAFNESS CANNOT BE CURED

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deainess, and that is by constitu-tional remedies. Deafness is caused by an in-flamed condition of the mucous lip y of the Eustachian Tube. When this tube gets in-flamed you have a rumbling sound or imper-fect hearing, and when it is entirely closed deafness is the result, and unless the inflamma-tion can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by raterrh, which is nothing but an inflamed condition of the mucous surfaces. The Innocent With The Guilty

The world to-day is full of innocent sufferers from that most loathsome disease, Contagious Blood Poison. People know in a general way that it is a bad disease, but if all its horrors could be brought before them they would shun it as they do the Leprosy. Not only the person who contracts it suffers, but the awful taint is transmitted to children, and the fearful sores and eruptions, weak eyes, Catarrh, and other evidences of poisoned blood show these little innocents are suffering the awful consequences of some body's sin. So highly contagious is this form of blood poison that one may be contaminated by handling the clothing or other articles in use by a person afflicted with this miserable disease. There is danger even in drink- troops who were marching by. ing from the same vessel or eating out of the same tableware, as many pure and innocent men and women have found to their sorrow.
