These are at the back of the mouth, and extend up to a level with the top of the upper jaw. They are very wide and flat, squared on top. The mouth has no other teeth, nor is it supplied with the whalebone that usually decorates the maw of the monster of the deep.

The head of the stranger is equipped with a blowhole, like that of the whale. The eyes are very low, almost underneath the lower jaws. The tail is like that of the whale.

The body is in a good state of preservation, the flesh baving been torn but little by the birds. The head was severed from the body by residents of Newport and taken to the latter place. It will be denuded of flesh and pre-

How is money made?

If you have \$1000 and lock it up in a fireproof safe and leave it there for 10 years. when you open it what will you find? You may find \$1600, certainly no more, If you wish money to increase you must invest it in something growing in valuation and there is no safer or surer investment than good real estate, where if you invest \$1000 it will make you another \$1000, or in proportion as you invest.

We make it our business

To find investments and as a consequence if there are snaps to be had we find them, and if you keep watch of our list you can get them, as we do business for a very small per cent. Therefore, if a bargain is placed in our hands it is a bargain when it leaves our hands. We invite you to look over our list, which will be furnished von on application.
