

These is a propoganda afloat in many Eastern cities that has for its aim a general beautifying of the municipal environment. The plan as it has been reported in the newspapers, says the Telegram, is simplicity itself. It means an organization of the people in each block in the resident district, with a view to securing such co-operation as will not only produce the best results in the way of adornment for the home surroundings, but at the same time bring about the greatest possible harmony in the effect of color and mass. There is nothing in this scheme but what should commend itself to every resident owner who maintains a pride in the appearance of his own property, and has a proper regard for the artistic fitness of things in matters municipal.

In this block organization, which we are told works satisfactorily in Eastern cities, there is a suggestion of small beginnings locally that might lead to marvelous results. In any section of the city where at present there is little attention paid to improvement of this character, the opinion may be safely ventured that if this organized block movement is once launched the first example will find ready followers, and as results show for themselves other sections will fall in line, and good results will follow. The summer travel to the coast will soon set in and many visitors will spend the noon hour in this city, and take advantage of the time to take a look around. Let us make our city so attractive that everyone will want to come again.

It is every good citizens duty to love his home, and it is easy to love it if it is lovable. Make it attractive. Your children will be unconsciously influenced for good and you will be compensated in a hundred ways. Wake up, clean up, spruce up. If you live in a rented house, buy it. If you are unsettled, settle; then trim your lawn, set out rose bushes, train vines and paint the fence. Brush up; and if your wife won't help you—but she will.
