Owens a Hawaiian Island.
One of the little islands of the Hawaiian group containing 70,000 acres is owned by an American named Gay. The principal industry of the island is sheep-raising, from which the owner receives a royal income. Excepting Mr. Gay and his wife, who are the only white people on the island, this lot in the ocean is peopled by 100 natives, who are said to be "as black as midnight." The owner is known as "King Gay," and his slightest word is a law among the subjects of his realm.

A Foolish Memorial.
A stone monument, weighing fifty tons, is being raised in the Schorfelde, near Zehdenfeld, Germany, on the spot where the Emperor stood when he killed his one thousandth stag. The stone bears the inscription: "Our most illustrious margrave and lord, Emperor William II., stood here on Sept. 20, Anne Domini, 1893, when slaying his one thousandth stag of twenty times."
The Emperor is so versatile that if monuments were erected to commemorate his achievements in other lines Germany would be studied with them. The places where he wrote his one thousandth poem and where he painted his one thousandth picture should be marked.

"Here's a curious item, Joshua," exclaimed Mrs. Lemington, spreading out "The Billville Mirror" in her ample lap. "The Nellie E. Williams, of Gloucester, reports that she saw two whales a cow and a calf, floating off Cape Cod the day before yesterday."
"Well, ma," replied Mr. Lemington, "what's the matter with that?"
"Why, it's all right about the two whales, Joshua; but what bothers me is how the cow and the calf got 'way out there."

SKIN DISEASES

Altoona, Pa., June 20, 1903.
I was afflicted with Tetter in bad shape. It would appear in blotches as large as my hand, a yellowish color, and scale off. You can imagine how offensive it was. For twelve years I was afflicted with this trouble. At night it was a case of scratch and many times we rest at all. Seeing the good the medicine was doing a friend who was taking it for Eczema, I commenced it, and as a result the eruption began to dry up and disappear, and today I am practically a well man. Only two tiny spots are left on the elbow and shin, where once the whole body was affected. I have every confidence in the medicine, and feel sure that in a short time these two remaining spots will disappear. S. S. S. is certainly a great blood purifier, and has done me a world of good. I am grateful for what it has accomplished, and trust that what I have said will lead others who are similarly afflicted to take the remedy and obtain the same good results that I have.
125 East Fifth Ave. JOHN F. LEAR.

While washes, soaps, salves and powders relieve temporarily, they do not reach the real cause of the disease. The blood must be purified before the cure is permanent. S. S. S. contains no potash, arsenic or mineral of any description, but is guaranteed purely vegetable.

Send for our book on the skin and diseases, which is mailed free. Our physicians will cheerfully advise without charge any who write us about their case.

VACCINATE FOR CONSUMPTION.

The Message Sent to America by a Famous Physician.

An assemblage of physicians in Philadelphia, met to form a national association for the purpose of fighting tuberculosis and discover, if possible, its certain cure, received a message from Dr. Edward Maragliano, a famous physician of Italy, who said consumption in its early stages can be prevented by vaccination.

Dr. Maragliano's conclusions are based upon clinical and laboratory work covering thirty-four years and his experiments led him to announce the following conclusions:
First, that it is possible to produce a specific therapy for tuberculosis; second, that it is possible to immunize the animal organism against tuberculosis, as is done in other diseases, and that there is good reason to hope for an anti-tuberculosis vaccination for man.

The paper told of many experiments with animals and then with men. The Italian physician declares that his vaccination is a certain cure in the early stages of the disease and aids greatly in later stages. Some of the statements in the paper were:
Changes caused by tuberculosis infection in the tissue of an organ and in the organism in general are due to the poisons secreted by the living bacilli and the poisons contained in the body of the bacilli. The former, which contain toxins, we have extracted by means of filtration of the young culture.

When this serum is injected into healthy men or animals there is an increase of defensive substances in the blood of the injected animal, greater than the geometrical proportion, and I am forced to conclude that the organism plays an active part in this tremendous increase. The participation of the organism is necessary to this increase.

In regard to the question of immunizing man, the most easily attained method seems to be the production of a passive immunization by the introduction of immunizing substances prepared in the bodies of healthy animals, by the methods previously indicated. Of course the tests made on animals cannot be repeated on men.

While these researches have shown positively that it is possible in several ways to produce specific immunizing substances in the healthy man, it as yet is impossible to say whether this resistance produced is sufficient or how long it will last. Further investigation of the effects of vaccination will be necessary.

Buxton, N. Dak., Sept. 12 (Special).—Mr. B. L. Skriveth of this place has been added to the steadily growing following that Dodd's Kidney Pills have in this part of the country.

Mr. Skriveth gives two reasons for his faith in the Great American Kidney Cure. The first is that they cured his wife and the second is that they cured himself.

"I must say," says Mr. Skriveth, "that Dodd's Kidney Pills are the best remedy for Kidney Trouble I ever knew. My wife had Kidney Disease for years and she tried all kinds of medicine from doctors but it did not help her any. An advertisement led her to try Dodd's Kidney Pills. The first box helped her so much that she took eight boxes more and now she is cured."

"I also took three boxes myself and they made me feel better and stronger in every way."

Dodd's Kidney Pills have never yet failed to cure any kidney disease from Backache to Rheumatism, Diabetes or Bright's Disease.

OLD-FASHIONED LANE.

It is One of the Institutions of Country Life.

"Speaking of old things, reminds me of a thing which seems to have been forgotten by some of my old friends," said a writer in the New Orleans Times-Democrat, "and it is a rather curious fact since it is so intimately related to some of the more affectionate things of the world. Why should we forget the lane? It is the one thing in the life of the man who knows and appreciates the country in which he lives, and who loves the poetry of it all. The long, dusty lane, with its shading, with its winding and willowy meandering—should we forget it? I think not."

"The 'no-fence law,' which has been so popular in some States may have put the lane out of business to some extent. But I decline to believe that the lane will disappear altogether. There is too much of the poetry of the country associated with it, and we must not lose sight of the gentler things as we go along. Strolling down the lane! Did you ever stop to think what that means? It means a world of things when you come to think of it. It is the story of many lives. Men who have grown up in the country will understand what it means to the men and women, or boys and girls, who happen to live in the country. Let us preserve the lane. We are doing away with many of the old things. But it seems to me there is a point at which we should draw the line. And that point is reached when we come to those things which are so much a part of our life, and so much a part of the lives of persons who have lived in some other time."

A Sioux Indian Custom.
Among the Sioux Indians a common custom exists. When one family borrows a kettle from another, it is expected when the kettle is returned a small portion of the food that has been cooked in it will be left in the bottom. Should this custom be disregarded by anyone, that person would never be able to borrow again, as the owner must always know what has been cooked in her kettle. A white woman on one occasion returned a scoured kettle, intending to teach a lesson in cleanliness, but her act became the talk of the camp, as a fresh example of the meanness of the whites.

Miss Rose Hennessy, well known as a poetess and elocutionist, of Lexington, Ky., tells how she was cured of uterine inflammation and ovaritis by the use of Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKHAM—For years I enjoyed the best of health and thought that I would always do so. I attended parties and receptions thinly clad, and would be suddenly chilled, but I did not think of the results. I caught a bad cold eighteen months ago while menstruating, and this caused inflammation of the womb and congested ovaries. I suffered excruciating pains and kept getting worse. My attention was called to your Vegetable Compound and the wonderful cures it had performed, and I made up my mind to try it for two months and see what it would do for me. Within one month I felt much better, and at the close of the second I was entirely well.

"I have advised a number of my lady friends to use it, and all express themselves as well satisfied with the results as I was."—Miss Rose Nona Hennessy, 410 S. Broadway, Lexington, Ky. — \$500 forfeit if original of above letter proving genuineness cannot be produced.

Deafness Cannot Be Cured by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflammation of the mucous lining of the Eustachian Tube. When this tube is inflamed, you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.
