Get Rid of Scrofula

Bunches, eruptions, inflammations, soreness of the eyelids and ears, diseases of the bones, rickets, dyspepsia, catarrh, wasting, are only some of the troubles it causes. It is a very active evil, making havoc of the whole system.

Hood's Sarsaparilla

Eradicates it, cures all its manifestations, and builds up the whole system. Accept no substitute.

ESKIMOS REUNITED TO WORLD.

Those of Greenland's East Coast Again

in Touch with Civilization.

The Eskimos of the east coast of Greeniand have been reunited to the world, after having forgotten, perhaps for many years, the little they ever knew of it, says the Philadelphia Public Ledger. The Danish supply steamship Godthaab has returned to Copenhagen from a visit to Angmagsalik, a station established by the government for the purpose of improving the condition of the Greenland natives and developing a trade with them. It is an interesting enterprise, because Denmark's dealings with aboriginals are bumanizing and philanthropic, and the material it had to deal with here was in its natural condition.

As far as is known, the natives of Greenland's east coast had never come into contact with the white race until time. Its uses are varied, not only for twenty years ago, when they were discovered by Capt. Holm, a Danish explorer. It was six years later before anything more than fragmentary information about them was given out, and then Denmark published a sumptuous work in three volumes deveted to the for that purpose, and when the right people and their habitat. Probably no other book se exhaustive and costly of primitive people. They numbered only 548 when they were discovered.

The supply steamship reports at with the head of the match ignites the Copenhagen that the East Greenland latter. station is in thriving condition. It has simply transformed the life of the natives. They have knives, timber, metal points for their harpoons and a hundred comforts and conveniences they never knew before. The Danish government buys their oils, furs, skins and feathers. The station takes everything they have to sell in exchange for the commodities they require.

A way has been found around the glaciers jutting out into the sea which so long barred attempts to travel its features, is shown in the illustraaround the south end of Greenland. A tion, and it is a device that could read few parties have made sledge jour- fly be used for a great many purposes neys to the Eskimo settlements of the It is a common sight to see several west coast, and some of them have set- men delivering barrels and storing tled there. They have never heard of them in the cellar of a building, the spirituous liquors.

They are pure-blood Eskimos, the to gradually slip down a pair of ropes. only unmixed natives in Greenland, excepting in the Smith sound region; but their features are thinner and longer than those of other Eskimos, and they are a little taller than those of the west coast. They have the dimmest tradition that their fathers came from the north, and considerable evidence has accumulated pointing to the probability that they are the descendants of natives who reached northwest Greenland from the archipelage north of our continent and then skirted the north and east coasts of Greenland to their present abode.

A Happy Horse. Said the man whose equine acquaint-ances outnumber the humans he knows intimately, and who seems glad of it:

"There is a wise old horse belonging to a grocer in Wentworth avenue, and he might appropriately be called the children's friend. The store is close to a schoolhouse, and this horse friend of mine spends much of his time standing in front of the store when his wagon is not in commission.

"He has a habit of standing with his forefeet on the sidewalk gazing into the store. At such times the children fairly swarm on him. They jump into the wagon and hold the reins; they climb on top of and walk underneath the kindly animal, and he looks benignantly down upon them, and is often rewarded for his good nature with bits of sugar and candy and other things that horses like.

"There are few happier faces in town, if you know how to read horse faces, than this of my four-legged friend. May he live long and always be as happy."-Chicago Inter Ocean.

Animals are capable of what we

should call heroism in man. In one field was a denkey, in another a horse. Through the first went a mastiff and made for the ass, seized him by the throat, pulled him down, and that so suddenly that the donkey looked likely to be killed. The horse in the next field leaned the hedge dividing the two pastures, collared the dog with his teeth, swung him on the fall-ball teeth, swung him and like a baseball player caught him on the fall-with his heels. The mastiff was whisked over the hedge which the horse had just crossed, and the donkey was left in peace to recover from his wounds.
