Job Printing.

When you pay out good money for printing, be sure and get good printing for the money! Good printing is correct in spelling—correct in grammar—correct in punctuation—on good stock—printed with good ink—and something that it is a pleasure to look at. That is the kind the Gazette turns out. Prices for good printing are based on the cost of good material, and the labor and taste employed in doing the work. To this every printer adds a percentage for profit. The cheap printer charges the same profit as the good printer—the difference in cost to you comes out of the value of the material used—in fact you pay for all you get. Skill, taste and experience are necessary factors in producing GOOD printing. Examine your "work," and don't pay for it until you know it is all right. It is your own fault if you pay good money for rotten eggs.
