TELLS EXTENT OF UNIVERSE

It Is Believed That Milky Way Is 200,000,000 Times Earth's Distance from Sun.

To determine a single position of any one star involves a great deal of computation, and if we reflect that, in order to attack the problem in question in a satisfactory way, we should have observations of a million of these bodies made at intervals of at least a fraction of a century, we see what an enormous task the astronomers dealing with this problem have before them, and how imperfect must be any determination of the distance of the stars based on our motion through space, writes Simon Newcomb, in Harper's Magazine. So far as an estimate can be made, it seems to agree fairly well with the results obtained by the other methods. Speaking roughly, we have reason, from the data so far available, to believe that the stars of the Milky Way are situated at a distance between 100,000,000 and 200,000,000 times the distance from the sun. At distances less than this it seems likely that the stars are distributed through space with some approach to uniformity. We may state as a general conclusion, indicated by several methods of making the estimate, that nearly all the stars which we can see with our telescopes are contained within a sphere not likely to be much more than 200,000,000 times the distance to the sun. The inquiring reader may here ask another question. Granting that all the stars we see are contained within the limit, may there not be any number of stars without the limit which are invisible only because they are too far away to be seen?

DOG DEFIES FIRE AND WATER

Canine Left to Guard Master's Apartment Sticks to Post Although Flames Rage About Him.

The bulldog's tenacity of grip is proverbial, but he also possesses a grip of quite another sort, one which enables him to stick to his orders in spite of the most untoward circumstances. The Atlanta Constitution gives an example of a dog's faithfulness. "Stub's" master had gone away for the night and had left the dog to guard his apartments. In the evening the house caught fire, and before the fire engine arrived the blaze had gained firm hold and little could be saved. Some of the men discovered the dog and tried to coax or drive him from the room, but Stub held his post. His would-be rescuers did all they could to tole him out, but he would not budge. Warning growls showed that he would use his teeth if the men resorted to force, and finally, in their efforts to save the dog, the firemen turned two streams of water on him. Even this did not dislodge him.

AMERICAN SWINE INDUSTRY

The Hog Has Proved an Important Factor in the Wealth Production of the United States.

The swine industry of the United States is a feature of resources that figures high in the agricultural wealth of our country, says the Nebraska Farmer. To the hog, more than any other influence, are we indebted for the finely improved forms and beautiful tries that have, as by magic, spread out over the vast area of agricultural lands from Ohio in the east to the Missouri valley in the west. The civilizing influence of the corn crop has changed the millions of acres of wild prairie lands to the fertile, cultivated fields, rich with the clovers, grasses and improved crops of modern agriculture. Without the hog this great district of agriculture lands, lying in the center of what is known as the corn belt, could never have attained its present distinction of wealth and business reputation. As a factor in wealth production the hog is justly entitled to the distinction of being a pioneer among our meat-producing animals. The American hog has fastened his hold so firmly, not only upon our own people, but upon those of almost every country on the globe that the industry of swine raising is of

its increase of production as the increase of population demanding pork production.

LEAVES LEGACY TO HORSE

St. Louis Physician Wills \$2,000 to Equine Which Had Served Him 23 Years.

A strange case of the affection a man may have for a dumb brute came to light at St. Louis when the will of Dr. John Gilwee was probated. The first clause of the instrument provided for a trust fund of \$2,000, to be held in the name of a faithful old horse, Tony, which had served the physician continuously for nearly 23 years. The clause in the will was as follows: "In case that my horse Tony, which I have used for nearly 23 years, survives me, I order that \$2,000 of my estate be placed in trust at six per cent. per annum, and said interest used for his food, shelter, and care so long as he lives, and after his death the said \$2,000 shall be divided among my legal heirs."

His Regular Price. They were playing checkers.

"Crown that one," said the lawyer, pushing a piece into the king row.

"That will cost you \$15," said the dentist, absent-mindedly. Chicago Tribune.

Both in Perishable and Other Fruits Metropolis Is Greatest in the World.

The annual fruit crop of the United States has a value of \$132,000,000. The orchard fruits produced each year have a value of \$84,000,000; small fruits, \$25,000,000; grapes, \$14,000,000, and citrus fruits, grown principally in California and Florida, \$8,549,000.

The seven great fruit-growing states in the order of producing are California, New York, Pennsylvania, Ohio, Michigan, Illinois and Indiana.

Michigan has more peach trees than any other state. Chicago's receipts by water of Michigan fruits last year were very heavy, but this year they are still heavier. The receipts for two specified days from St. Joseph, Mich., alone amounted to 300,000 packages, principally of peaches.

Peaches also come by rail from nearly every peach-producing state of the west and south, and the turnover of apples in South Water street increases from year to year. Illinois leads all the western states in apples, with an annual product of 9,200,000 bushels, Michigan coming next with 8,951,000 bushels, and Indiana third with 8,620,000 bushels.

The apple crop of the country, which in 1900 was 175,397,000 bushels, has increased with the extension of orchards in the west. Both in perishable and other fruits, Chicago is the greatest fruit market in the world.

The dog's master was found and notified of the fire. When he reached his home the roof had fallen in and the building was a mass of flames. He gave one clear whistle, and Stub, who had defied fire and water and all human inducements, bounded out of the house and the next instant was licking the hand which caressed him.

California Real Estate.

The value of real estate in California is officially estimated to be worth \$882,104,539, the improvements on real estate \$316,208,123, the value of personal property \$239,623,282, the money and solvent credits, \$42,906,248, and the total value of property as returned by auditors is \$1,480,842,195, exclusive of the railroads, which are assessed at \$69,669,566 by the state board of equalization.

Good Health to the Children

Children especially are fond of dainties, and the housekeeper must look carefully to their food.

As good cake can be made only with good eggs, so also a cake that is healthful as well as dainty must be raised with a pure and perfect baking powder.

Royal Baking Powder is indispensable in the preparation of the highest quality of food. It imparts that peculiar lightness, sweetness and flavor noticed in the finest cake, biscuit, doughnuts, crusts, etc., and what is more important, renders the food wholesome and agreeable to young and old.
