**BANKING**

THE FIRST NATIONAL BANK OF Corvallis, Oregon, does a general, conservative banking business. It guarded safely its customers' banking business through the panics of the last two decades, which merits proper consideration. It affords banking privileges at home and abroad, first-class, not excelled by any institution in the United States. The members of the Board of Directors were born and raised in Benton County, except one, and that member has resided in the county forty-six years. The business history of each is as an open book before the people of the county. Loans to customers solicited, properly secured. 40tf

**LAND AGENTS**

WHEN IT COMES TO BUYING lands, new-comers in this county will make no mistake in consulting James Lewis. Mr. Lewis has been in Benton for 30 years and not only knows the county but the entire valley. He has been actively engaged in selling and buying live stock and real estate all of this time and naturally his judgment is sound. He knows soils and values. His knowledge is worth money to anybody desiring correct and sincere information. 25-77\*

H. M. STONE, REAL ESTATE AND Intelligence office—After 42 years in Benton and Linn counties, I feel justified in coming before the home-seekers of Oregon, and feel that I am competent to locate all such as wish to buy homes here, with judgment and competency. For 27 years I was a bridge builder in Benton, Lane, Polk, Yamhill and Linn counties. I have property in the above named counties to sell, and am thoroughly conversant with the same. I ask no exclusive right of sale and unless property is sold by me I ask no pay. Parties wishing to employ help or if looking for a position, will find it a convenience to phone or call at the office. Kindness and courtesy extended to all. Office, South Main street, Corvallis, Oregon. Office phone 378, res. phone 66.

**FOLEY'S HONEY AND TAR**

Young People's (Weekly), Chicago, Ill., W., 50 cents; \$1.50.  
Cincinnati Inquirer, Cincinnati, W., \$1.00; 2.05.

**INTENSIVE AGRICULTURE**

A Timely Address Made by Dr. Withycombe.

At a recent farmers' institute held in Milwaukee, Or., Dr. Withycombe, of this city, made the following address, as set forth by the homestead:

Extensive agriculture is the coming watchword of husbandry. Western Oregon and the irrigated portions of Eastern Oregon are entering upon an era of smaller farms and more extensive culture. The trend of agriculture is towards maximum production. This condition will be found on smaller rather than on large farms. There are contributing agencies conducive to the development of this system of farming. First, conditions here are highly favorable to the system; second, the highly-increasing values of land and consequently increased taxation compel the owner to make the farm more remunerative. This subdivision of farms will not only give rise to better general farming but will give us a more dense population. The increased revenue by reason of more intensive systems of husbandry will stimulate every avenue of trade and help to develop Portland into a great commercial city.

There is no agricultural section in the world more favored by natural endowments for extensive agriculture than our own fair state; also there is not a section of our state better situated for intensive husbandry than here. Your farms are located at the very threshold of the metropolis of the Northwest. There is no reason why the farmers of this section should not be prosperous. Nor is there any reason why agriculture should not be a profitable and pleasurable vocation. Surely the potentiality of our soil and climate, when properly understood will surpass the expectations of the most sanguine.

As an example of what can be done in the line of producing green feed for dairy cows, results obtained at the experiment station this spring will be given. We began cutting on April 3, an acre of rye and vetch, sown Oct. 18, 1904; finished cutting on April 18; yield per acre of green feed, 13,325 pounds. Began cutting second crop on May 23; finished May 30; yield 11,195 pounds. Thus this acre of vetch and rye has yielded this spring 11.75 tons of green feed and there is a good prospect of a third crop.

Began cutting a two-acre field of alfalfa April 19 and finished cutting May 23; yield of two acres twenty tons and eighty pounds of green feed. Thus three acres have produced 31.79 tons of green feed already this spring with a good prospect of cutting two or three more crops of alfalfa this season; or, in other words, three acres of land have furnished the principal feed for fifteen head of grown cattle and four six-months old calves from April 3 to May 30.

This is what is known as the soiling system and plainly illustrates the possibility of small farms when intelligently utilized. These crops are produced under ordinary farm conditions and without any artificial fertilizers.

The same principle may be applied to all branches of husbandry, including poultry, swine, sheep, grain, and market gardening.

Agriculture in all its ramifications is steadily becoming more highly specialized. We advocate diversity of productions only so far as is necessary to maintain the fertility of the soil by rotation of crops. Thus animal husbandry in some form is practically indispensable in general farming.

This state presents splendid opportunities to the small as well as the larger farmer and the time is not far distant when our state will be dotted with small prosperous farms.

**Three Physicians Treated Him Without Success.**

W. L. Yancy, Paducah, Ky., writes: "I had a severe case of kidney disease and three of the best physicians in Kentucky treated me without success. I then took Foley's Kidney Cure. The first bottle gave immediate relief, and three bottles cured me permanently. I gladly recommend this wonderful remedy." For sale by Graham & Wortham.

**FASHION TASTE IN DRUGS**

Doctor Tells What He Thinks of Woman Who Insisted Upon Flavors in Medicine.

Being a man of excellent wisdom, the doctor seldom makes remarks about his patients, but that day he was so mad he couldn't help himself.

"That woman," said he, "is a dashed fool."  
"What has she done?" asked a listener.

"She has insisted upon my flavoring the medicine for which I just wrote out a prescription with Swiss lilac, because that is her favorite perfume."

"Did you do it?" asked the listener.

"Yes, I had to. I won't take the stuff if you don't," said she. "You won't take it if I do, I said. 'You won't be able to. It will be so nasty you can't swallow it.'"

"But that argument never feazed the woman. 'It is lilacs or nothing,' she said. 'I'd rather die than be incontinent.'"

"So I gave her the lilacs."

"It is queer, anyway," proceeded the doctor, "about the flavoring of medicine. I don't know whether you know it or not, but styles in flavoring extracts used by druggists change with the seasons, the same as hats and coats and dinner table decorations. Last spring the majority of prescriptions compounded tasted like sweet peas. Before that peppermint was the favorite, now it is lavender. Peppermint, by the way, has its innings most frequently as a popular essence. There are a good many people who don't like peppermint, but there are more who do, and it comes into favor about three times as often as any other essence. For one thing, it mixes with other ingredients more harmoniously than other extracts, and there are some doctors who are old-fashioned enough to stick to it year in and year out, no matter what their more up-to-date brethren may be using for a time. Fortunately, the flavor of a prescription has nothing to do with its efficacy, so if a doctor feels like it he can make a fool of himself, as I did just now, and satisfy the whim of a fashionable patient by flavoring her pills with an essence that matches her perfumes without endangering her life. However, freak flavors are not calculated to make a disagreeable drug more pleasant to the taste, and after a few experiments of that kind most doctors, at the request of the patients themselves, go back to lavender and sweet peas and the ever reliable peppermint."

"So I gave her the lilacs."

"It is queer, anyway," proceeded the doctor, "about the flavoring of medicine. I don't know whether you know it or not, but styles in flavoring extracts used by druggists change with the seasons, the same as hats and coats and dinner table decorations. The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of *Chas. H. Fletcher* and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

**What is CASTORIA**

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.
