ORIGINALITY IS A POWER.

By Fostering This Characteristic One May Attain Great Things in Life.

There are a thousand people who will do faithfully what they are told to one who can lay out a programme or execute it; a thousand who can only follow to one who can lead. It is a rare thing to find a young man who has the power of accomplishment, the ability to put a thing through with the force of originality, says Orison Sweet Marden, in Success.

Whatever your work in life, do not follow others. Do not imitate. Do not do things just as everybody else has done them before, but in new, ingenious ways. Show the people in your specialty that precedents do not cut much of a figure with you, and that you will make your own programme. Resolve that, whether you accomplish much or little in the world, it shall be original—your own. Do not be afraid to assert yourself in an original way. Originality is power, life; imitation is death. Do not be afraid to let yourself out. You grow by being original, never by copying; by leading, never by following. Resolve that you will be a man of ideas, always on the lookout for improvement. Think to some purpose. There is always a place for an original man.

There is nothing else which will kill the creative faculty and paralyze growth more quickly than following precedents in everything, and doing everything in the same old way. I have known progressive young men to stop growing, become hopelessly rutty, and lose all their progressiveness by going into their fathers' stores, factories or places of business, where everything was done in the same old-fashioned way, and precedents were followed in everything. They lost all expansiveness. There was no motive for reaching out for the new and original, because their fathers would not change; and I have seen these splendid fellows, who might have become great and grand men, shrivel to pygmies in their fathers' ruts.

How many of our business houses are weighted down with machinery, old, antiquated methods, ponderous bookkeeping, and out-of-date appliances, when new devices, or new methods, with short-cut way of doing things, would enable them to economize greatly on room and get along with less help; but they cling to the old with a fatal tenacity. This is why so many old concerns, which have been strong and powerful for generations, gradually shrink, shrivel, get into ruts, and fail, while their newer competitors, the bright young men who have gone out from these houses, do things in a new way, adopt up-to-date methods, keep up with the times, and go on to greater success.

WOMEN WASTE VITAL FORCE

Fair Sex Loses Much Nervous Energy Through Errors Which Might Easily Be Avoided.

Women (according to a lady doctor) lose much nervous force through errors which might be easily avoided.

One notable instance is seen in their manner of walking. Many women have an uneven gait, a nervous, jerky step that jars the whole body and keeps most of the muscles tense and drawn.

A good way of correcting a bad walk is to carry a waltz tune in the mind, and keep step to it as far as possible without actually dancing. After a time the walk will become regular and buoyant, and the habit once formed, there is no occasion of continuing the device of keeping step to a tune.

Women lose much of their vitality in needless excitement and in misplaced sympathies. Their emotions are easily drawn upon, and instead of reserving their powers for important occasions, they dissipate them on the smallest provocation. The remedy here is to practice self-control. It is one of the finest of nerve tonics.

Chinese Cotton Mills.

Thirteen-hours and a half constitute the working day of a Chinese mill hand in the cotton factories, night shifts working but ten hours. In spite of the long hours the pay is very small, the best workers receiving but 12 cents a day.

SQUIREL IS A CRIMINAL.

Little Rodent Declared to Be a Thief and a Murderer by Nature Student.

I wish to take away for all time the character of the squirrel, says Josef Brunner, in Country Life. He is a thief and a murderer. Admired by ignorant city people and by journalists, he devotes his life to eating the eggs and killing the young of harmless and useful birds, which, if permitted to live and increase, would protect the forests from harmful insects. By killing these birds, the squirrel takes rank as a forest destroyer. Moreover, the red squirrel is not the only sinner. In my opinion the gray is almost, if not quite, as bad.

I have killed many squirrels caught in the act of eating eggs or young birds. Any bird that selects a nesting place which is also adapted to the use of squirrels is almost certain to be ejected. When a forest has been destroyed by fires, lumbermen or insects, it is almost impossible for natural reforestation to take place if squirrels are abundant in an adjoining tract, because they eat the seeds. Fifty seeds per head each day would be a low estimate. Yet even this would make 18,250 in a year. And seeds are not the only thing. In winter the ground is often strewn with twigs that have been stripped of buds by squirrels. The trees attacked are generally situated at the border of a dense forest, and would, if left alone, yield the greatest seed crop. A single squirrel thus destroys in one day thousands of seeds in the germ. In Montana I have seen the gray rob birds' nests.

She Tried Five Doctors.

Mrs. Frances L. Sales, of Missouri Valley, Ia., writes: "I have been afflicted with kidney trouble five years; had severe pains in my back and a frequent desire to urinate. When riding I experienced much pain over the region of the kidneys. I tried five physicians without benefit and then concluded to try Foley's Kidney Cure. After taking three \$1 bottles I was completely cured." Sold by Graham & Wortham.
