A number of watch parties saw the death of 1905 and the birth of 1906 Sunday evening. There was the usual ringing of bells, shouting, laughing and wishing of good things, together with customary "resolutions" which will endure about a week. Here's to '06 and good luck for our friends.

The elements were boisterous Friday night and Saturday and the wind unusually high for this country. Had one been real certain that his hat would stick to him he could have enjoyed himself immensely by standing in the street and watching the hats of others sail about. Really, there is nothing more amusing than to watch some man of dignity chase his hat for about a hundred yards through a muddy street, reaching for his treasure on an average of about every ten feet. It is funny simply because we've all been there and know exactly how mad the fellow is.

The Pianola Piano

A Piano That Will Give You Ten Times More Actual Pleasure Than Any Piano You Have Ever Owned.

There are two accepted ways of playing the piano today:

- 1. By hand. 2. By the Pianola.

Both of these methods are united in the Pianola. You can turn from one method to the other INSTANTANEOUSLY. The Pianola is built into the piano itself, so that there is nothing to move up to or away from the keyboard. Both piano and Pianola are just as effective as though in separate instruments.

Never has a piano been presented to the public which has met with such a remarkable and enthusiastic reception as the Pianola Piano. Its great success was to be expected, for it represents the logical development of the piano. It enables everyone to obtain from a piano ALL the musical enjoyment the instrument is capable of. In the light of this important improvement in piano-construction, all previous pianos seem incomplete. Hence the Pianola Piano has become universally known as "The First Complete Piano."

Pianos of all makes taken in exchange for the Pianola Piano. Grands and uprights in excellent condition, and bearing the names of the highest

grade manufacturers, are every day being received in part payment. That people everywhere should part with instruments which they have hitherto valued highly, is impressive evidence of the position that the Pianola Piano has attained among music lovers. It is THE piano of the day.

If you have a piano from which you derive comparatively little musical enjoyment why not exchange it for this new type of piano, which will be a daily source of pleasure for every member of the family? Write for terms on which such exchange will be made.

Pianola Pianos are sold only by Eilers Piano House, Portland, Ore., and through its many stores and representatives.

The people of this vicinity will undoubtedly be pleased to know that any further information concerning the Pianola Piano, Pianos, Organs, etc., can be obtained from Professor Tallandier, director of the piano department of Corvallis Agricultural College, and can be seen at his residence on College Hill on Saturday and every evening of the week. A telephone call will bring him to your house, Ind. 155.
