

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of *Chat. H. Fletcher* and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS

The Kind You Have Always Bought
In Use For Over 30 Years.

THE CENTAUR COMPANY, 77 BROADWAY STREET, NEW YORK CITY.

\$4.00 To \$8.00 GAIN PER ACRE.

That's what a Spreader will do if used as it should be.

If you have 125 loads of manure to spread and you are going to plant 25 acres of corn or wheat, or have a 25 acre meadow we will tell you how you can increase the value of your crop this year from \$4.00 to \$8.00 per acre or more than enough to pay for a spreader. We issued a 49-page book entitled "Practical Experience With Barnyard Manures," which explains the whole situation. Our Plan is not a theory. It is an actual fact, backed up by actual experiments extending over a period of 18 years. To give you an idea of what this book contains, we show results of experiments made with various crops where \$1000 of manure were spread per acre by the old method, and 5 loads by the new method, on corn ground. The latter shows a gain of \$4.50 per acre. On another field and in another state, it shows a gain of \$5.60 per acre, and on a clover and timothy meadow, a gain of \$8.00 per acre. This book will be sent free to anyone writing us. It is worth \$100.00 to you, but it won't cost you a cent. If it doesn't do you any good, it won't do you any harm. Write us now and let us mail it to you. It is brimming full of valuable information.

The Smith Great Western Endless Apron Manure Spreader

Spreads all kinds of manure, straw stack bottoms and commercial fertilizer regardless of their condition. Spreads as much in a day as 15 men can by hand. Spreads the largest load in 2 to 4 minutes. Makes the same amount of manure go three times as far and produce better results. Makes all manure fine and immediately available for plant life. Non-bunching! Rake forms a hopper, holds all hard chunks in contact with beater until thoroughly pulverized. Endless Apron is one continuous apron, (not a 1/2 apron) therefore always ready to load. You don't have to drive a certain distance to pull it back into position after each load or wind it back by hand; it is a great advantage in making long hauls. There is no Gearing about our Endless Apron to break and cause trouble, it is always up out of the way of obstructions as it does not extend below axle. Spreads evenly from start to finish and cleans out perfectly clean. Hood and End Gate keeps manure away from beater while loading; prevents choking of beater and throws out a bunch when starting and acts as wind shield when spreading. It has a graduating lever and can be regulated while in motion to spread thick or thin, 3 to 25 loads per acre. Light Draft because the load is nearly equally balanced on front and rear axles. The team is as near the load as it can work. Front and rear axles are the same length and whole truck beater shaft runs in ball and socket bearings, therefore no friction. Beater is 23 inches in diameter, cast iron core when loading. Machine turns in its own length. Simplicity. There are only two levers on our machine. One which raises the hood, locks it and throws the machine in gear at the same time. It can then be thrown in and out of gear without lowering the hood. One lever which changes feed to spread thick or thin, making it so simple that a boy who can drive a team can handle it. Strength and Durability is one of the most important points to be considered in a manure spreader. The Great Western has a good, strong, durable wheel. Extra strong spokes and rim, heavy steel tires. Strong, well braced box with malleable castings, gears and sprockets all heavy iron. Cabined hood. Every part is made extra strong, regardless of cost. It is made for the man who wants the best, made in four sizes, 35, 50, 70 and 100 bush capacity. Guarantee Should any part break, wear out or get out of order within one year we replace free of charge. Send for free catalog, showing latest improvements. It tells how to apply manure to secure best results.

Write just these words on a postal card or in a letter—"Send me your book 'Practical Experience With Barnyard Manures' and catalogue No. 17758." They will be mailed to you free. Do it now before you haul your manure or prepare for any crop.

Smith Manufacturing Co., 162 Harrison St., Chicago

Tell What They Saw.

Otto and Walter Locke, who arrived home the first of this week from a two months' visit to various points in the East, tell interesting things of San Francisco, where they visited on the way home. They state that the work of cleaning up is in progress but that little has been accomplished save the clearing of the streets where the main car lines operate, and even these are in bad condition. Hundreds of people are still camping in Golden Gate park, and there is general complaint and assertions of "graft" regarding the shady dealings of those who are entrusted with the food supplies and cash contributions that have been shipped in. It is alleged that the food is sold out to the refugees at high prices, while the cash is pocketed by those in command of the funds. Many, in fact nearly all, the basements of the ruined buildings are still filled with debris,

from which a horrible stench arises, and the inference naturally is that there must be corpses innumerable under the wreckage. In many of the ruined hotels and lodging houses, the frames of which still stand, bedsprings are caught out on the steel braces and crossbars and remain suspended in midair, like greswome skeletons. Where the sleepers went when the buildings were shattered is left to the imagination of the spectator. Many visitors are constantly in the city, and the sight presented is said to be worth a long trip. There is a scarcity of laborers and therefore the cleaning-up is more or less delayed. Refugees are still leaving the ruined city every day, and several women who came to Oregon on the train with the Locke boys had no better wearing apparel than calico wrappers, and the baby in the company possessed but one dress, and that had seen much wear.

VALUABLE PUBLICATION.

Book for Farmer, Stock Raiser and Fruit Grower.

An "Agricultural Log Book," prepared at great expense by the Central Publishing Company, in the Manufacturers, Exchange Building, consisting of reputable "up-to-date" Kansas Cityans, soon to appear, is not only novel in its design, but replete with valuable information, especially for all classes of farmers, breeders and raisers of all kinds of domestic animals; for dairymen, fruit-growers and others; with carefully written instructions as to various civil laws in which all wealth-producing classes are personally interested and with many strictly legal, blank and detachable forms of bills of sale, leases, mortgages, notes, receipts, warrants and quitclaim deeds, wills, etc.

One of the most prominent features of the work is its systematic, easily understood, common sense and decidedly complete arrangements for recording all kinds of business transactions universally common among farmers and stock raisers, giving inventories of articles owned, and all liabilities at time of commencing business; clearly exhibiting at the close of each year the results of all kinds of investments, purchases and sales; explaining how and when entries of all "debts" and "credits" are made; how gains and losses are ascertained; interest and other tables, with much additional information to housekeepers, gardeners, and others. It is evidently a work not only of merit, but of genius; its whole "make up" is methodical, clear, scholarly and attractive; its authors certainly have the one thing required in such an undertaking, a complete, comprehensive and practical knowledge of the whole field presented; while their full purpose is to enable each farmer using it to know just where he is in his business at all times, as the mariner does by the aid of his compass and chart on uncertain seas. It is simply a mammoth production, not in size, but significance, in evidence of which several of the largest publishing companies in the United States presented bids for its publication, but the contract for many thousands of copies was finally given to Messrs. Hudson & Kimberly of this city, who are regarded by many as the most artistic as well as reliable publishers in the Great West. The Central Publishing Company, which owns and controls the work, has ample means to bring it speedily and successfully to the front, and to give profitable employment in its introduction and sale to thousands anxious and desiring.

We wish the company great success in placing the work in the home of every farmer, stock-raiser, dairyman and fruit-grower in this fair land of ours, as a stimulus not only to greater efforts of industry, but especially to the keeping before him a complete history of every business transaction in which he may be interested.

COUNTRY CORRESPONDENCE.

BELLEFOUNTAIN.

Hon. W. C. Hawley has been here with his people for a few days. He occupied the pulpit at Simpson chapel last Sabbath.

Three new barns are being erected for the coming crop, that promises a large yield.

M. M. Waltz is filling his silo with ensilage made of vetch.

Haying has commenced on several farms. There is a heavy crop. Grain looks well.

George Hill is having a fireplace put in his house. Mr. Goodman is doing the work.

A large gathering of people is expected at the camp ground the Fourth of July. Preparations are being made to celebrate in a patriotic way. A good program will be rendered. Dr. I. D. Driver, the pioneer preacher, and lecturer of great force, will be the speaker.

N. O. Dodge puts in four and sometimes five days each week gathering and

delivering cream to the Corvallis creamery. Horsebuyers are still gleaning the country for drivin and draft horses. The price is getting so high that one can hardly afford to keep them for one's own use.

For the evening services during July the pastor of the Presbyterian church will preach a course of sermons on the subject: "Striking Personal Interviews With Christ."

PIGEON TALES EXAGGERATE

Experiments in England Show That Birds Seldom Fly a Mile a Minute—Good Time in Race.

So many wild statements are made as to the speed of a carrier pigeon that it is interesting to learn how fast it can actually travel under the most favorable conditions. On a recent Saturday between 200,000 and 300,000 birds were tossed in competitions in various parts of the country, and some thousands of these feathered athletes raced to London from Bedford and Branson, journeys of 127 and 115 miles respectively. The conditions were ideal, the weather was beautifully clear and a fresh wind was blowing to help the birds on their way; and yet under such favorable circumstances few of the birds attained a speed of a mile a minute, which in these days of quick locomotion is beginning to be considered comparatively slow, relates London Tit-Bits.

Notice to Creditors.

Notice is hereby given to all persons concerned that the undersigned has been duly appointed Executor of the last Will and Testament of James C. Taylor, deceased, by the County Court of Benton County, State of Oregon. All persons having claims against the estate of said James C. Taylor, deceased, are hereby required to present the same, with the proper vouchers, duly verified as by law required, within six months from the date hereof, to the undersigned at her residence in Corvallis, Oregon.

Dated this 29th day of June, 1906.
LILLIAN L. TAYLOR,
Executrix of the last Will and Testament of James C. Taylor, deceased.

Postmaster Robbed

G. W. Forts, Postmaster at River-town, Ia., nearly lost his life and was robbed of all comfort, according to his letter, which says: "For 20 years I had chronic liver complaint, which led to such a severe case of jaundice that even my finger nails turned yellow; when my doctor prescribed Electric Bitters; which cured me and have kept me well for eleven years." Sure cure for Billiousness, Neuralgia, Weakness and all Stomach, Liver, Kidney and Bladder derangement. A wonderful Tonic. At Allen & Woodward Drug store. 50c.

NOTICE OF APPOINTMENT OF VIEWERS.

Notice is hereby given that E. Woodward, Virgil E. Watters and W. S. McFadden have been appointed by the Common Council of the City of Corvallis viewers to view the proposed street hereinafter described and make an assessment of the damages of the several owners or other persons interested in the lands hereinafter described to be appropriated for such street on account of the appropriation thereof for such purpose and to assess the value of the benefits and advantages of such proposed street to the lands liable for assessment therefor.

The said viewers will meet on the 3rd day of July, 1906, at the hour of 9 o'clock a. m. at the office of J. F. Yates, police judge, in the City of Corvallis, for the purpose of proceeding to view said proposed street and premises and assess such damages and the value of such benefits and advantages, said time and place being the time and place assigned for such viewers to meet by said Common Council.

The following is a description of the boundaries and termini of the above-mentioned proposed street:
Beginning at a point marked by a section of gas pipe one inch by 30 inches, said point being N 18 deg 30 min., E 5.5 feet from the southeast corner of the land of William Crees, said southeast corner of the land of William Crees being more particularly described as a point 35.6 feet W and 11.9 feet N of a stone set to mark the intersection of Ninth and Harrison streets in the City of Corvallis, being on the west side line of the county road leading from Corvallis to Polk county, thence N 69 deg 49 min W 291 feet, thence S 19 deg 30 min W 5.7 feet, thence S 19 deg 30 min W 69.5 feet, thence S 69 deg 49 min E 296.26 feet to a point marked by a section of gas pipe one-half inch by 24 inches, said point being on the west boundary line of Ninth street, thence N 19 deg

30 min E 68.5 feet thence N 18 deg 30 min E 5.5 feet to the place of beginning, containing 0.494 acres, more or less. The following are the boundaries and description of the several parcels of private property to be appropriated for the purpose of laying out and establishing such proposed street:
Beginning at the southeast corner of the land of William Crees, said beginning point being more particularly described as a point 35.6 feet west and 11.9 feet north of a stone set to mark the intersection of Ninth and Harrison streets in the City of Corvallis, said beginning point being on the west side line of the county road leading from Corvallis to Polk county, thence N 70 deg 30 min W 296.26 feet, thence S 19 deg 30 min W 69.5 feet thence S 69 deg 49 min E 96.26 feet to a point marked by a section of gas pipe one-half inch by 24 inches, said point being on the west boundary line of Ninth street, thence N 19 deg 30 min E 68.5 feet to the place of beginning, containing 0.461 acres, more or less.

Beginning at the southeast corner of the land of William Crees, said beginning point being more particularly described as a point 35.6 feet west and 11.9 feet north of a stone set to mark the intersection of Ninth and Harrison streets in the City of Corvallis, said beginning point being on the west side line of the county road leading from Corvallis to Polk county, thence N 18 deg 30 min E 515 feet to a point marked by a section of gas pipe 1 inch by 30 inches, thence S 69 degrees 49 min W 291 feet, thence S 19 deg 30 min W 4.5 feet, thence S 70 deg E 291 feet to the place of beginning, containing 0.033 acres, more or less.
