There is no doubt that the cheapest way to turn peas into pork is to allow the hogs to do the feeding. This fact has been too often demonstrated in Oregon. The production of porker pigs is reduced by allowing the peas to get ripe before the hogs are turned on. The best way to have the peas fed off is to have a movable fence so that the hogs will clean up all the peas as they go. As is well known hogs are good gleaners, and if handled in this way no peas will be wasted.—Ex.

They have been allotted sufficient space in the pavilion for making an exhibit, which will be fitted up to accommodate the exhibit and furnish them an auditorium for illustrated lectures on agricultural subjects. It interests a great many of the older farmers and arouses in many of the boys an ambition to attend the college.—Rural Spirit.

While the "glorious fourth" is past for the present year, the results are still painfully apparent out in Jobs addition where the little Bullis boy is in a critical condition from the burns received from playing with firecrackers on the fourth in this city. As remarked in these columns before, it is up to the city dads to take steps in time, this year, that will put a stop to the use of firecrackers, bombs and other explosives before next year's celebration. Other valley towns celebrated successfully this year without explosives—why not Corvallis? Something should be done and done in time.
